Reference And Truth:

Frege's Detour John Perry, 2019-10-10 John Perry offers a rethinking of Gottlob Frege's seminal contributions to philosophy of language. Frege's innovations provided the basis of modern logic but his influence in other areas should not be understated. For instance, the view that he developed in *On Sense and Reference*, the most studied essay in the philosophy of language, dominated twentieth-century work in the field and continues to be very influential. Perry explains and charts the development of Frege's views in this area and argues that his doctrine of indirect reference directed philosophy of language on a long detour from which only now can we emerge. Perry advocates a move away from indirect reference and presents an alternative framework which does not require the abandoning of circumstances in the references of sentences. *Reference, Truth, and Reality* Mark de Bretton Platts, 1980 *A Referential Theory of Truth and Falsity* İlhan Inan, 2022 This book proposes a novel theory of truth and falsity. It argues that truth is a form of reference and falsity is a form of reference failure. Most of the philosophical literature on truth concentrates on certain ontological and epistemic problems. This book focuses instead on language. By utilizing the Fregean idea that sentences are singular referring expressions, the author develops novel connections between the philosophical study of truth and falsity and the huge literature in the philosophy of language on the notion of reference. The first part of the book constructs the author's theory and argues for it in length. Part II addresses the ways in which the theory relates to and is different from some of the basic theories of truth. Part III takes up how to account for the truth of sentences with logical operators and quantifiers. Finally, Part IV discusses the applications and implications of the theory for longstanding problems in philosophy of language, metaphysics, and epistemology. *A Referential Theory of Truth and Falsity* will appeal to researchers and advanced students working in philosophy of language, epistemology, metaphysics, and linguistics. *Thought and Things: Experimental logic, or genetic theory of thought* James Mark Baldwin, 1908 **Meaning and Normativity** Allan Gibbard, 2012-12-13 What does talk of meaning mean? All thinking consists in natural happenings in the brain. Talk of meaning though has resisted interpretation in terms of anything that is clearly natural, such as linguistic dispositions. This Kripke's Wittgenstein suggests is because the concept of meaning is normative on the ought side of Hume's divide between is and ought. Allan Gibbard's previous books *Wise Choices*, *Apt Feelings*, and *Thinking How to Live* treated normative discourse as a natural phenomenon but not as describing the world naturalistically. His theory is a form of expressivism for normative concepts, holding roughly that normative statements express states of planning. This new book integrates his expressivism for normative language with a theory of how the meaning of meaning could be normative. The result applies to itself: metaethics expands to address key topics in the philosophy of language topics which in turn include core parts of metaethics. An upshot is to lessen the contrast between expressivism and nonnaturalism in their strongest forms: the two converge in all their theses. Still, they differ in the explanations they give. Nonnaturalists' explanations mystify, whereas expressivists render normative thinking intelligible as

Chapters XVII-XX Emanuel Swedenborg,1912 **Truth in Fiction** John Woods,2018-02-23 This monograph examines truth in fiction by applying the techniques of a naturalized logic of human cognitive practices The author structures his project around two focal questions What would it take to write a book about truth in literary discourse with reasonable promise of getting it right What would it take to write a book about truth in fiction as true to the facts of lived literary experience as objectivity allows It is argued that the most semantically distinctive feature of the sentences of fiction is that they are unambiguously true and false together It is true that Sherlock Holmes lived at 221B Baker Street and also concurrently false that he did A second distinctive feature of fiction is that the reader at large knows of this inconsistency and isn't in the least cognitively molested by it Why it is asked would this be so What would explain it Two answers are developed According to the no contradiction thesis the semantically tangled sentences of fiction are indeed logically inconsistent but not logically contradictory According to the no bother thesis if the inconsistencies of fiction were contradictory a properly contrived logic for the rational management of inconsistency would explain why readers at large are not thrown off cognitive stride by their embrace of those contradictions As developed here the account of fiction suggests the presence of an underlying three or four valued dialethic logic The author shows this to be a mistaken impression There are only two truth values in his logic of fiction The naturalized logic of Truth in Fiction jettisons some of the standard assumptions and analytical tools of contemporary philosophy chiefly because the neurotypical linguistic and cognitive behaviour of humanity at large is at variance with them Using the resources of a causal response epistemology in tandem with the naturalized logic the theory produced here is data driven empirically sensitive and open to a circumspect collaboration with the empirical sciences of language and cognition Simulating Minds Alvin I. Goldman,2006-07-06 People are minded creatures we have thoughts feelings and emotions More intriguingly we grasp our own mental states and conduct the business of ascribing them to ourselves and others without instruction in formal psychology How do we do this And what are the dimensions of our grasp of the mental realm In this book Alvin I Goldman explores these questions with the tools of philosophy developmental psychology social psychology and cognitive neuroscience He refines an approach called simulation theory which starts from the familiar idea that we understand others by putting ourselves in their mental shoes Can this intuitive idea be rendered precise in a philosophically respectable manner without allowing simulation to collapse into theorizing Given a suitable definition do empirical results support the notion that minds literally create or attempt to create surrogates of other peoples mental states in the process of mindreading Goldman amasses a surprising array of evidence from psychology and neuroscience that supports this hypothesis Conceptual Relevance Joseph Grünfeld,1989
