Reference Sources In Library And Information Services

Carolyn M. Mulac

Reference Sources In Library And Information Services:

Reference Sources in Library and Information Services Gary R. Purcell, Gail A. Schlachter, 1984 Reference Service and Sources C.K. Sharma, 2006 The rapid developments in computer technology, telecommunications, printing, reprography etc. have important implications for the provision of information by libraries to their users. Great advances have been made in the automation of indexing and abstracting services. Despite such advances and technological impacts, the actual search process and the end result remain the same as in the traditional approach. Hence, the significance of reference sources and services cannot be overemphasised. The reference service offered by the libraries enables the readers to obtain the required information from the huge collection of libraries in no time. The book is structured into two parts. The first part acquaints the readers with the purpose, functions and kinds of reference service, qualities and duties of a reference librarian, varied sections in the libraries, reference service in public, academic and special libraries, sources and classification of information and reference queries. Part II of the book is devoted to reference sources, beginning with the evaluation of reference sources. It includes a detailed study on directories, bibliographies, encyclopaedias, biographies, maps and atlases, dictionaries, gazetteers and guide books. It is hoped that the present book will prove useful for all library users. While the teachers, researchers and students of library science will find it indispensable, the reference librarians are expected to acquire additional skills through this book which shall stand them in good stead in the technological environment.

Reference and Information Services Melissa A. Wong, Laura Saunders, 2024-08-22 Written as a textbook for LIS students taking reference courses, this fully updated and revised seventh edition of *Reference and Information Services* also serves as a helpful handbook for practitioners to refamiliarize themselves with particular types and formats of sources and to refresh their knowledge on specific service topics. The first section grounds the rest of the textbook with an overview of the foundations of reference and an introduction to the theories, values and standards that guide reference service. The second section provides an overview of reference services and techniques for service provision, establishing a foundation of knowledge on reference service and extending ethical and social justice perspectives. The third part offers an overview of the information life cycle and dissemination of information, followed by an in-depth examination of information sources by type as well as by broad subject areas. Finally, the concluding section guides the reader through the process of developing and maintaining their own vision of reference practice. This textbook is essential reading for all preservice and working librarians, particularly those concerned with ethical and social justice perspectives on reference work.

Reference and Information Services Richard E. Bopp, Linda C. Smith, 2011-05-23 Reflecting the dramatic changes shaped by rapidly developing technologies over the past six years, this new fourth edition of *Reference and Information Services* takes the introduction to reference sources and services significantly beyond the content of the first three editions. In Part I, Concepts and Processes, chapters have been revised and updated to reflect new ideas and methods in

the provision of reference service in an era when many users have access to the Web In Part II Information Sources and Their Use discussion of each source type has been updated to encompass key resources in print and on the Web where an increasing number of freely available sources join those purchased or licensed by libraries A number of new authors are contributors to this new edition bringing to their chapters their experience as teachers of reference and as practitioners in different types of libraries Discussions of services in Part I integrate digital reference as appropriate to each topic such as how to conduct a reference interview online using instant messaging Boxes interspersed in the text are used to present scenarios for discussion to highlight key concepts or to present excerpts from important documents Discussions of sources in Part II place more emphasis on designing effective search strategies using both print and digital resources The chapter on selection and evaluation of sources addresses the changing nature of reference collections and how to evaluate new types of sources Each chapter concludes with an updated list of additional readings to guide further study A new companion website will provide links to Web accessible readings and resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the text

INFORMATION SOURCES, SERVICES AND SYSTEMS GURDEV SINGH, 2013-01-10 Reference and information services are considered an important activity of a modern library This comprehensive and student friendly book discusses in detail different types of information and reference sources and services such as encyclopaedias directories yearbooks dictionaries geographical sources biographical sources statistical sources and handbooks The book is organised into four parts Part I deals with various types of information sources such as documentary and non documentary sources Part II discusses different types of reference services organisation of reference section and the role of the librarian in the digital age Part III describes the wide range of information service such as Current Awareness Service CAS and Selective Dissemination of Information SDI Part IV provides an overview of important information systems such as National Information System for Science and Technology NISSAT and International System for Agricultural Science and Technology AGRIS The book is intended for the undergraduate and postgraduate students of library science Besides it will also be very useful for librarians information scientists and information professionals Salient Features Deals with both theoretical and practical aspects of information sources and services Discusses various types of information sources and services keeping in view the latest trends and developments in the field Presents the concepts related to information sources and services in a systematic and accessible way
