

REFLECTIONS ON VALUES EDUCATION

(1) Approaches to, and Forms of Values Education

Values Education aims to provide holistic development for learners in order to enhance positive attitudes and possess moral and ethical foundations as they navigate through various information, situations, and academic materials. The provided list showcases numerous vantage points as to where educators may approach values education, as there is no singular template that can deal with a myriad of problematic situations. Learners are prompted to think beyond the written text or from the facts that are presented to them, in order to produce the most probable solution that minimizes any form of damage—which can be dependent on the approach that learners received. For example, learners who underwent moral development and are challenged with real-life situations as part of their action learning activity are able to go beyond their individual ideals and moral stances—but must also consider how these affect their social interactions.

Values education can be effectively exhibited through the ability of the learners to examine, formulate, challenge, and defend their stances on moral, political, and social issues, while also anchoring said arguments on the values they attain and cultivate in their own personal development. Their claims must stem from critical analysis and extensive research on relevant sources. Moreover, they must be able to hold their ground and reason against opposing arguments in an ethical and moral manner. Because of this multivariable and multi-flexible nature, values education places a necessity on specific or mixed approaches that take into consideration the subject matter and the learner's context. As to its forms, educators of values education are able to tailor their lessons to fit their desired objectives. Students are given the ability to act upon various tasks in line with a specific topic through the integration of the properties within the different forms. The structure of every form is aimed to enhance a specific area in the development of the learner, an example being "Individualism" which nurtures one's self-authority and independence.

The approaches to and the forms of values education allow for the centralization of specific skills, attitudes, and values to develop, which may also overlap with other forms and approaches—thus, emphasizing the versatile character of the field. Learners are able to amplify their moral, ethical, analytic, argumentation, character, and social skills, all the while being able to apply them to real-life problems with the purpose of providing gradational or immediate solutions with minimized harm.

(2.2) Values and (2.3) The Value of Dignity

Whenever values are mentioned in any degree of discussion, they are often enumerated and are perceived with a positive outlook which leads to the notion that values can indeed be

Values Education and Quality Teaching Terence Lovat, Ron Toomey, 2009-04-07 Some revision of public schooling history is necessary to challenge the dominant mythology that public schools were established on the grounds of values neutrality In fact those responsible for the foundations of public education in Australia were sufficiently pragmatic to know that its success relied on its charter being in accord with public sentiment Part of the pragmatism was in convincing those whose main experience of education had been through some form of church based education that state based education was capable of meeting the same ends Hence the documents of the 1870s and 1880s that contained the charters of the various state and territory systems witness to a breadth of vision about the scope of education Beyond the standard goals of literacy and numeracy education was said to be capable of assuring personal morality for each individual and a suitable citizenry for

the soon to be new nation As an instance the NSW Public Instruction Act of 1880 cf NSW 1912 under the rubric of religious teaching stressed the need for students to be inculcated into the values of their society including understanding the role that religious values had played in forming that society's legal codes and social ethics The notion therefore that public education is part of a deep and ancient heritage around values neutrality is mistaken and in need of serious revision The evidence suggests that public education's initial conception was of being the complete educator not only of young people's minds but of their inner character as well
