Manifestation Math Thoughts + Choices + Actions = Your Life Richard Spitzer, 2018-08-30 For over 2 000 years philosophers teachers scientists and everyday people have been interested in manifestation and attraction concepts And now science and quantum physics support many of the original observations about how people are connected to the vast universe of energy and information But how can we update the centuries of wisdom to a modern practical and usable manifestation process to achieve our individual goals Richard used his research expertise to analyze the historical teachings and the everyday evidence to create a new practical manifestation concept with simple to use practices If you believe that you are what you think and attract what you think about there is now a process to manage your thoughts choices and actions to achieve your goals We see the evidence of

successful manifestation all around us people achieving their goals every day Manifestation has three stages thoughts process outcomes We can easily observe the original thoughts and the eventual outcomes But what happens in the middle to create a successful outcome What is the formula for success Richard has reverse engineered manifestation we can observe and filled in the steps that have been missing for how to transform thoughts into successful outcomes Every thought does not become your reality But there is a process and math based goal to achieve the critical balance of positive thoughts to negative thoughts to enter the successful manifestation zone Its almost that simple if you have the right guidance and a way to monitor to your progress Manifestation Math is a practical simple process to manifest goals using the basic math of the universe As Willie Nelson said if you replace negative thoughts with positive thoughts you will have a positive result Manifestation Math has created a simple process to bring this wisdom to everyone      **Mathematics for Game**
