Balchin, 2021-07-11 Originally published in 1990 this book examines the extent to which the north south divide in the UK has been a reality in recent years

It also reveals the degree to which the gap between the two parts of Britain has worsened An issue of enduring relevance particularly given the political drive to level up the regions the book focusses particularly on the 1980s a period when regional assistance became a victim of both monetarism and free market ideology The book reviews legislation and considers whether regional policy has been effective and consistent To widen the debate the author questions some common assumptions about regional imbalance and argues that intraregional disparities and the plight of Inner London were causes of concern no less serious than the problem of the north south imbalance

Institutions, Discourse, and Regional Development Henrik Halkier, 2006 Why are some regional development strategies adopted and others rejected Only limited systematic attention has been paid to the politics of regional policy including the role of institutions discourse and political debate in shaping this major area of public policy The book develops an institutionalist approach to the study of regional policy capable of spanning major European development paradigms and accounting for the dynamic relationship between organisations policies and political discourse This conceptual framework is then applied to the Scottish Development Agency a development body famed across Europe for its innovative policies but surrounded by political controversy in Scotland A detailed study of corporate strategies policy implementation and the wider British environment questions existing interpretations of the organisation which tend to vilify anti interventionist Thatcherites or glorify shrewd development professionals Instead the author proposes an alternative synthesis which highlights the interplay between institutions discourse and regional development in the politics of regional policy

A United Kingdom? John Mohan, 2014-04-23 The human geography of the UK is currently being reshaped by a number of forces such as globalisation transition in the organisations of production the changing character of state intervention and changing relationships with Europe A consideration of the impacts of these forces on economic social and political landscapes is

therefore an urgent task At the same time enduring institutional features of the British economy and polity are also having important influences on socio economic processes The result is a complex mosaic of uneven development which belies the notion of simplistic regional contrasts Rather than simply mapping spatial inequality A United Kingdom charts the processes underpinning uneven development at a range of scales and for a number of key topics The book draws upon and synthesises the latest contemporary research findings and places emphasis on the interrelated nature of economic social and political geographies It treats the human geographies of the UK in a coherent and integrated way and asks whether contemporary processes of change are tending towards the reduction of socio spatial divisions or their reproduction in new forms
