Santoso, 2015-03-12 This book constitutes the refereed proceedings of the 4th International Conference on Soft Computing Intelligent Systems and Information Technology ICSIIT 2015 held in Bali Indonesia in March 2015 The 34 revised full papers presented together with 19 short papers one keynote and 2 invited talks were carefully reviewed and selected from 92 submissions The papers cover a wide range of topics related to intelligence in the era of Big Data such as fuzzy logic and control system genetic algorithm and heuristic approaches artificial intelligence and machine learning similarity based models classification and clustering techniques intelligent data processing feature extraction image recognition visualization techniques intelligent network cloud and parallel computing strategic planning intelligent applications and intelligent systems for enterprise government and society *On the Move to Meaningful Internet Systems 2005: OTM 2005 Workshops* Zahir Tari, 2005-10-11 *Handbook of Enterprise Integration* Mostafa Hashem Sherif, 2009-11-09 Maintaining compatibility among all affected network and application interfaces of modern enterprise systems can quickly become costly and overwhelming This handbook presents the knowledge and practical experience of a global group of experts from varying disciplines to help you plan and implement enterprise integration projects that respond to bu *Collaborative Computing: Networking, Applications and Worksharing* Elisa Bertino, James Joshi, 2009-07-25 CollaborateCom is an annual international forum for dissemination of original ideas and research results in collaborative computing networks systems and applications A major goal and feature of CollaborateCom is to bring researchers from networking systems CSCW collaborative learning and collaborative education areas together CollaborateCom 2008 held in Orlando Florida was the fourth conference of the series and it reflects the accelerated growth of collaborative computing both as research and application areas Concretely recent advances in many computing fields have contributed to the growing interconnection of our world including multi core architectures 3G 4G wireless networks Web 2.0 technologies computing clouds and software as a service just to mention a few The potential for collaboration among various

components has exceeded the current capabilities of traditional approaches to system integration and interoperability. As the world heads towards unlimited connectivity and global computing collaboration becomes one of the fundamental challenges for areas as diverse as eCommerce, eGovernment, eScience and the storage management and access of information through all the space and time dimensions. We view collaborative computing as the glue that brings the components together and also the lubricant that makes them work together. The conference and its community of researchers demonstrate the concrete progress we are making towards this vision. The conference would not have been successful without help from so many people.

SOA Design Patterns Thomas Erl, 2008-12-31. In cooperation with experts and practitioners throughout the SOA community, best-selling author Thomas Erl brings together the de facto catalog of design patterns for SOA and service orientation. More than three years in development and subjected to numerous industry reviews, the 85 patterns in this full color book provide the most successful and proven design techniques to overcoming the most common and critical problems to achieving modern day SOA. Through numerous examples, individually documented pattern profiles and over 400 color illustrations, this book provides in-depth coverage of Patterns for the design, implementation and governance of service inventories, collections of services representing individual service portfolios that can be independently modeled, designed and evolved. Patterns specific to service level architecture which pertain to a wide range of design areas including contract design, security, legacy encapsulation, reliability, scalability and a variety of implementation and governance issues. Service composition patterns that address the many aspects associated with combining services into aggregate distributed solutions including topics such as runtime messaging and message design, inter-service security controls and transformation. Compound patterns such as Enterprise Service Bus and Orchestration and recommended pattern application sequences that establish foundational processes. The book begins by establishing SOA types that are referenced throughout the patterns and then form the basis of a final chapter that discusses the architectural impact of service oriented computing in general. These chapters bookend the pattern catalog to provide a clear link between SOA design patterns, the strategic goals of service oriented computing, different SOA types and the service orientation design paradigm. This book series is further supported by a series of resources sites including soabooks.com, soaspecs.com, soapatterns.org, soamag.com and soaposters.com.
