The Aging Family Terry Hargrave, Suzanne Midori Hanna, 2013-06-17 As the population of the United States ages and the lifespan increases so does the number of living generations The mental health care delivery system therefore faces new challenges The United States is heading into the 21st century with multigenerational families now commonplace with up to four or five generations co existing at the same time And each generation is forced to deal with its own developmental transitions as well as complex cross generational issues When a therapist steps into this situation his or her role has to take on board the complexity of the whole family system This text highlights the issues that hold families

together and often tear them apart. It offers core perspectives that seek to make the work of intervention easier and more effective for the clinician. Whether the therapist is called upon to intervene on behalf of elder members to deal with issues such as depression or to step in when younger members are trying to determine how best to provide eldercare, the perspectives presented in *The Aging Family* aim to enrich the strategies used.

[Handbook of Social Work in Health and Aging](#) Barbara Berkman, 2006-02-09

The *Handbook of Social Work in Health and Aging* is the first reference to combine the fields of health care, aging, and social work in a single authoritative volume. These areas are too often treated as discrete entities while the reality is that all social workers deal with issues in health and aging on a daily basis regardless of practice specialization. As the baby boomers age, the impact on practice in health and aging will be dramatic and social workers need more specialized knowledge about aging, health care, and the resources available to best serve older adults and their families. The volume's 102 original chapters and 13 overviews, written by the most experienced and prominent gerontological health care scholars in the United States and across the world, provide social work practitioners and educators with up-to-date knowledge of evidence-based practice guidelines for effectively assessing and treating older adults and their families, new models for intervention in both community-based practice and institutional care, and knowledge of significant policy and research issues in health and aging. A truly monumental resource, this handbook represents the best research on health and aging available to social workers today.

Religion, Spirituality, and Aging Harry R. Moody, 2012-12-06

Learn how to make a more positive impact with your social work with the aged. Religion is an important coping mechanism for many aging adults. *Religion, Spirituality, and Aging: A Social Work Perspective* presents the latest research that shows how religion and spirituality can improve quality of life for elders. Respected social work researchers and scholars provide insight and practical methods for fostering positive aging while also considering how spirituality and religion can affect practitioners themselves. The full range of advantages and ethical implications are discussed in clear detail from a social work viewpoint. Case studies plainly illustrate the positive impact that the inclusion of spirituality and religion in an aging person's life may have on their physical and mental welfare. Organized social work in the early twentieth century actively tried to distance itself from its roots as a form of religious charity in favor of becoming a scientific and professional endeavor. *Religion, Spirituality, and Aging* once again bridges the gap between social work and spiritual matters by presenting penetrating articles that discuss the issues of the aging soul while examining ways to improve care. Creative strategies are offered to contribute to the spiritual side of aging while considering every implication and ethical question. The compilation is extensively referenced and includes helpful figures and tables to clearly illustrate data and ideas. *Religion, Spirituality, and Aging* discusses the latest social work trends and attitudes toward spirituality, prayer, meditation, and acts of altruism as interventions. An empirical study of how social workers use religion and spirituality as an intervention, ethical considerations, and best practices, religion and spirituality during long-term care, the Postcards to God project, dreams, and their relationship to the search for meaning in

later life a spiritual approach to positive aging through autobiography dementia and spirituality creating new rituals for sacred aging spiritual master Henri Nouwen s principles of aging and his approaches to caring for older people an interview study on elders spirituality and the changes manifested in their views of religion Religion Spirituality and Aging is a remarkable reminder that elders are our future selves This erudite well reasoned examination of aging and spirituality from a social work perspective is crucial reading for social workers human service professionals who work with the aged and gerontology scholars
