Basements and Attics, Closets and Cyberspace Linda

M Morra, Jessica Schagerl, 2013-01-24 Women's letters and memoirs were until recently considered to have little historical significance Many of these materials have disappeared or remain unarchived often dismissed as ephemera and relegated to basements attics closets and increasingly cyberspace rather than public institutions This collection showcases the range of critical debates that animate thinking about women's archives in Canada The essays in Basements and Attics Closets and Cyberspace consider a series of central questions What are the challenges that affect archival work about women in Canada today What are some of the ethical dilemmas that arise over the course of archival research How do researchers read and make sense of the materials available to them How does one approach the shifting unstable forms of new technologies What principles inform the decisions not only to research the lives of women but to create archival deposits The contributors focus on how a supple research process might allow for greater engagement with unique archival forms and critical absences in narratives of past and present From questions of acquisition deposition and preservation to challenges related to the interpretation of material the contributors track at various stages how fonds are created or sidestepped in response to national and other imperatives and to feminist commitments how archival material is organized restricted accessed and interpreted how alternative and immediate archives might be conceived and approached and how exchanges might be read when there are peculiar lacunae missing or fragmented documents or gaps in communication that then require imaginative leaps on the part of the researcher

Secondary Liability of Internet Service Providers Graeme B. Dinwoodie, 2017-06-28 This book analyses the doctrinal structure and content of secondary liability rules that hold internet service providers liable for the conduct of others including the safe harbours or immunities of which they may take advantage and the range of remedies that can be secured against such providers Many such claims involve intellectual property infringement but the treatment extends beyond that field of law Because there are few formal international standards which govern the question of secondary liability comprehension of the international landscape requires treatment of a broad range of national approaches This book thus canvasses numerous jurisdictions across several continents but presents these comparative studies thematically to highlight evolving commonalities and trans border commercial practices that exist despite the lack of hard international law The analysis presented in this book allows exploration not only of contemporary debates about the appropriate policy levers through which to regulate intermediaries but also about the conceptual character of secondary liability rules
