Multiple Intelligences and Adult Literacy Julie Viens, Silja Kallenbach, 2004-01-22 In this breakthrough volume the authors present an overview of Multiple Intelligences MI theory along with concrete examples that educators can use in their classroom with adult literacy students

Becoming a Multiple Intelligences School Thomas R. Hoerr, 2000-02-15 In this invaluable book Tom Hoerr relates a decade s worth of MI experiences at St Louis New City School We learn about the staff s initial exposure to MI theory the many activities some

more successful than others that were undertaken by faculty and staff in teaching curriculum adult development and assessment the challenges that the leader faces in attempting to bring about significant and lasting change Especially compelling are the continuing efforts to develop the personal intelligences during a period when issues of diversity multiculturalism and standards loom so large Hoerr underscores the centrality of collegiality the problems posed by transient students and faculty the complementary role played by public exhibitions and standardized test scores the role of friends in determining the activities and intelligences favored by children the delicate line between support and challenge that the leader must walk the tension between excellence and perfection I value the concrete examples as well as the ties to important conceptual work such as that undertaken by Roland Barth on collegiality Peter Salovey on emotional intelligence and Peter Senge on the learning organization Achieving excellence has always been a process Hoerr makes it abundantly clear that the effort to use MI ideas effectively must remain on the agenda Still I can testify that over a 10 year period clear palpable impressive progress can be made We can improve schools significantly but only if we take the long view and do not settle for patchwork fixes Note This product listing is for the Adobe Acrobat PDF version of the book

Seven Kinds of Smart Thomas Armstrong, 1999-10-01 Based on psychologist Howard Gardner's pioneering theory of multiple intelligences the original edition of 7 Kinds of Smart identified seven distinct ways of being smart including word smart music smart logic smart and people smart Now with the addition of two new kinds of smart naturalist and existential 7 Kinds of Smart offers even more interesting information about how the human psyche functions Complete with checklists for determining one's strongest and weakest intelligences exercises practical tips for developing each type of smart a revised bibliography for further reading and a guide to related Internet sites this book continues to be an essential resource offering cutting edge research for general consumption

Understanding Dyslexia: A Guide For Teachers And Parents Lawrence, Denis, 2009-03-01 Dyslexia affects at least ten per cent of children and is the most common special educational need that teachers encounter However the characteristics of dyslexia can mean that it is often

Gifted and Talented Learners Barry Hymer, Deborah Michel, 2013-12-16 This book sets out the educational challenges benefits and possibilities of embracing a truly inclusive approach to gifted and talented education and provides a framework for a school to create its own inclusive policy in this area of need Calling on international research current educational initiatives and work within the Barrow Education Action Zone EAZ and elsewhere the authors set out to demonstrate that the inclusion and standards agendas can and should take with them the growing interest in the educational needs of gifted and talented pupils The result is a short but comprehensive and fundamentally practical book which will be of value to any school or LEA wishing to create and implement a dynamic reflective and inclusive policy for gifted and talented pupils

Intelligence Reframed Howard E Gardner, 2000-09-18 Harvard psychologist Howard Gardner has been acclaimed as the most influential educational theorist since John Dewey His ideas about intelligence and creativity explicated in such bestselling books as *Frames of Mind* and

Multiple Intelligences over 200 000 copies in print combined have revolutionized our thinking In his groundbreaking 1983 book *Frames of Mind* Howard Gardner first introduced the theory of multiple intelligences which posits that intelligence is more than a single property of the human mind That theory has become widely accepted as one of the seminal ideas of the twentieth century and continues to attract attention all over the world Now in *Intelligence Reframed* Gardner provides a much needed report on the theory its evolution and revisions He offers practical guidance on the educational uses of the theory and responds to the critiques leveled against him He also introduces two new intelligences existential intelligence and naturalist intelligence and argues that the concept of intelligence should be broadened but not so absurdly that it includes every human virtue and value Ultimately argues Gardner possessing a basic set of seven or eight intelligences is not only a unique trademark of the human species but also perhaps even a working definition of the species Gardner also offers provocative ideas about creativity leadership and moral excellence and speculates about the relationship between multiple intelligences and the world of work in the future
