clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do. This award-winning twelve-volume reference covers every aspect of the ever-fascinating discipline of psychology and represents the most current knowledge in the field. This ten-year revision now covers discoveries based in neuroscience, clinical psychology's new interest in evidence-based practice and mindfulness, and new findings in social, developmental, and forensic psychology.

Forms of Desire Edward Stein, 2013-04-15 Perhaps the foremost issue in the emerging area of inquiry known as lesbian and gay studies is the social constructionist controversy. Social constructionism is the view that the categories of sexual orientation are cultural constructs rather than naturally universal categories. *Forms of Desire* brings together important essays by social constructionists and their critics representing several disciplines and approaches to this debate about the history and science of sexuality.

Behavioral Biology Trevor Archer, Stefan Hansen, 2013-09-05 This book is the result of an international symposium in biological psychology held in honor of Knut Larsson. This renowned researcher in his search for the true meaning of mind vs. matter became involved in many divergent areas of the field such as the neurobiology of sexual behavior and sexual differentiation, aspects of functional neuroanatomy, behavioral endocrinology, and psychopharmacology. Through experimentation and much consultation with other area specialists, Larsson observed such phenomena as the adaptation of behavior determining neuroendocrine events to the physical environment and the hormonal regulation of sexual behavior and differentiation. This tribute to his research presents important features of necessary paradigms for the analysis and study of experimental psychology within the biological perspective.

Behavioral Pharmacology of 5-HT Paul Bevan, 2013-05-13 This volume reviews the current state of research within the behavioral pharmacology of 5-HT. The book opens exciting new approaches to the interdisciplinary study of behavior and pharmacology with special reference to ethology, endocrinology, neuroanatomy, and comparative aspects of drug action and notes new developments in therapeutic drugs of the future.
