Complete works Klaus-Peter Gast, Louis I. Kahn, 2001 Louis Khan is considered to be one of the most outstanding architects of the 20th Century whose impact can only be compared to that of Le Corbusier This book discusses Kahn's late modernist works including the Richards Medical Building *Hugo Häring* Peter Blundell Jones, 1999 Peter Blundell Jones Professor of Architecture at the University of Sheffield has long been concerned with the organic movement in architecture and has written extensively about it including a substantial work on Hans Scharoun The present book is not just a biography of Häring but an unusually detailed analysis of his architectural work including many unbuilt projects which have never before been published It also includes an account of Häring's theory with translated extracts from his many writings Through setting Häring within his historical context and differentiating his position from figures such as Mies Le Corbusier and Hannes Meyer Peter Blundell Jones suggests a radical reframing of the early Modern Movement He was aided in the development of the book by Häring's personal assistant in the late years Margot Aschenbrenner who was trained as a philosopher Jaquette **Louis I. Louis I. Kahn in Rome and Venice Elisabetta Barizza,2021-07-22 This book examines the idea of organism in the work of Louis I Kahn from the turning point of Rome to the project for Venice It presents an original interpretation of the work of Kahn during one of the most fruitful periods of his career when he was working on a particular design method based on an entirely novel way of interacting with the past Beginning with a meticulous documentation and analysis of Kahn s experiences in the twenty years from 1930 to 1950 the book sheds new light on the relationship between Kahn s work and the modern movement The arguments are supported by case studies including that of the Palazzo dei Congressi in Venice based on Kahn s words like his lessons in Venice at IUA International University of Art in 1971 and others as the Trenton Bath House the Salk Institute La Jolla the Kimbell Museum Fort Worth the Yale Gallery and the Mellon Center for British Art New Haven and more Unlike much of the by now well established literature on Kahn s work Louis I Kahn in Rome and Venice suggests that the basic premise of Kahn s invention is the idea of spatial constructive organism which explains how he created forms that were inextricably anchored in the past without imitating any one kind of ancient architecture The main objective of the book is to explain Kahn s methodology to architects and students showing how he was able to design an architectural object with the characteristics of the best designed objects organisms in which each part contributes with the whole to creating something made of indivisible parts
