

The image shows a detailed view of a classical building's facade. On the left, a large, dark stone arch is partially visible. To its right is a rectangular window with a dark frame and sheer curtains. The wall between the arch and the window, and above the window, is decorated with a repeating diamond-shaped pattern. Above the arch, there is a decorative frieze with a series of small, arched motifs. The overall color palette is warm, with shades of brown and gold.

Arts — A Creative Symbiosis of Existential Powers M. Kronegger,2013-03-09 Regardless of the subject matter our studies are always searching for a sense of the universal in the specific Drawing etchings and paintings are a way of communicating ideas and emotions The key word here is to communicate Whether the audience sees the work as laborious or

poetic depends on the creative genius of the artist Some painters use the play of light passing through a landscape or washing over a figure to create an evocative moment that will be both timeless and transitory The essential role of art remains what is has always been a way of human expression This is the role that our participants concentrate on as they discuss art as the expression of the spirit a creative act through which the artist makes manifest what is within him Spirit suggests the unity of feeling and thought Avoiding broad generalities our participants address specific areas in orchestration with music architecture literature and phenomenology Profs Souiller Scholz Etlin Sweetser Josephs show us at what point art is an intimate profound expression and the magic of a civilization as a whole springing from its evolving thoughts and embodying ideals such as the Renaissance the Baroque Modernism and at what point it reflects the transformation of a particular society and its mode of life

Sullivan-esque Ronald E. Schmitt, 2024-04-22 *Sullivan-esque* offers a visual and historical tour of a unique but often overlooked facet of modern American architecture derived from Louis Sullivan Highly regarded in architecture for inspiring the Chicago School and the Prairie School Sullivan was an unwilling instigator of the method of facade composition later influenced by Frank Lloyd Wright William Gray Purcell and George G Elmslie that came to be known as *Sullivan-esque* Decorative enhancements with botanical and animal themes Sullivan's distinctive ornamentation mitigated the hard geometries of the large buildings he designed coinciding with his form follows function aesthetic Sullivan's designs offered solutions to problems presented by new types and scales of buildings Widely popular they were also widely copied and the style proliferated due to a number of Chicago based interests including the Radford Architectural Company and several decorative plaster and terra cotta companies Stock replicas of Sullivan's designs manufactured by the Midland Terra Cotta Company and others gave distinction and focus to utilitarian buildings in Chicago's commercial strips and other confined areas such as the downtown districts of smaller towns Mass produced *Sullivan-esque* terra cotta endured as a result of its combined economic and aesthetic appeal blending the sophistication of high architectural art with the pragmatic functionality of building design Masterfully framed by the author's photographs of *Sullivan-esque* buildings in Chicago and throughout the Midwest Ronald E Schmitt's in depth exploration of the *Sullivan-esque* tells the story of its evolution from Sullivan's intellectual and aesthetic foundations to its place as a form of commercial vernacular The book also includes an inventory of *Sullivan-esque* buildings Honorable Mention recipient of the 2002 PSP Awards for Excellence in Professional Scholarly Publishing

Henri Labrouste Henri Labrouste, Corinne Bélier, Barry Bergdoll, Marc Le Cœur, Martin Bressani, 2012 Henri Labrouste is one of the few nineteenth century architects consistently lionized as a precursor of modern architecture throughout the twentieth century and into our own time The two magisterial glass and iron reading rooms he built in Paris gave form to the idea of the modern library as a collective civic space His influence was both immediate and long lasting not only on the development of the modern library but also on the exploration of new paradigms of space materials and luminosity in places of great public assembly Published to accompany the first

exhibition devoted to Labrouste in the United States and the first anywhere in the world in nearly 40 years this publication presents nearly 225 works in all media including drawings watercolors vintage and modern photographs film stills and architectural models Essays by a range of international architecture scholars explore Labrouste's work and legacy through a variety of approaches

The Architecture of Luxury Annette Condello, 2016-03-16 Over the past century luxury has been increasingly celebrated in the sense that it is no longer a privilege or attitude of the European elite or America's leisure class. It has become more ubiquitous and now practically everyone can experience luxury even luxury in architecture. Focusing on various contexts within Western Europe Latin America and the United States this book traces the myths and application of luxury within architecture interiors and designed landscapes. Spanning from antiquity to the modern era it sets out six historical categories of luxury: Sybaritic Lucullan architectural excess rustic neo-European and modern and relates these to the built and unbuilt environment taking different cultural contexts and historical periods into consideration. It studies some of the ethical questions raised by the nature of luxury in architecture and discusses whether architectural luxury is an unqualified benefit or something which should only be present within strict limits. The author argues how the ideas of permissible and impermissible luxury have informed architecture and how these notions of ethical approval have changed from one context to another. Providing voluptuous settings for the nobles and the leisure class luxury took the form of not only grand palaces but also follies country and suburban houses private or public entertainment venues and ornate skyscrapers with fast lifts. The Architecture of Luxury proposes that in Western societies the growth of the leisure classes and their desire for various settings for pleasure resulted in a constantly increasing level of luxury sought within everyday architecture.
