Strangers in the House William R. Beer, 2017-07-28 If present trends in divorce and remarriage continue before the end of the century the stepfamily will outnumber all other types of family in the United States In 1980 one out of five children under the age of eight were living in stepfamilies and there were at least two million households in which the children were related only by marriage stepsiblings or who shared only one parent in common half siblings How are these new kinds of family relationships working out In particular how are children faring in these kinds of families There are a number of books on the successes and difficulties of second marriages that involve children but most of these look at problems from the perspective of one or both spouses Popular literature in particular had emphasized the problem of the new spouse who inherits a family without really focusing on the relationships among stepsiblings *Strangers in the House* focuses on the children of these marriages both stepsiblings and half siblings and the relationships among them with the parents It is a report on how they are faring drawn from the results of original research by the author case studies of stepfamilies interviews with stepsiblings and half siblings a survey of members of the Stepfamily Association of America and participation in three step family self help groups The result is a vivid portrait of nontraditional family constellations that provides an overview of changes in American families the increased divorce and remarriage rates and how stepfamilies differ from other families Beer identifies major problem areas in stepsibling relations and shows how youngsters are adapting to these special situations He examines classic rivalries over love attention space and property shows how these are worked out within these special circumstances The book concludes with an overview of the dynamics of sibling relations in these special families and analyzes how the stepsibling subsystem fits into the large

American Stepfamilies William R. Beer, While statistics indicate that nearly half of all first marriages in America today terminate in divorce more than three quarters of these divorces also result in remarriage producing stepfamilies Although they have become increasingly common stepfamilies are still poorly understood by stepfamily and non stepfamily members alike This book looks at the internal and external dynamics of this new family form taking the reader through a series of case studies and examining characteristic pitfalls and opportunities The author begins by comparing the basic building block of the stepfamily the remarried couple to the first married couple In successive chapters the structure of the stepfamily is considered in terms of increasing complexity from the simplest in which one of the partners has never married before and has no children to the most complex yours and ours stepfamilies in which there are children from both previous marriages and the present one The author probes the conflicts that arise between parents and children and among stepsiblings and

explores the different strategies that stepfamilies devise for resolving these tensions In the later chapters the sociohistorical origins of today's stepfamilies are traced in terms of changing values and new technologies Professor Beer argues that stepfamilies are proliferating as a result of attitudes and patterns of behavior that more than ever encourage divorce and remarriage He demonstrates on the basis of large scale evidence that stepfamilies produce children who are just as well adjusted as children brought up by both biological parents and that they will turn out to be adults who are almost as socially well adapted as those from conventional families The author concludes that stepfamilies are types of families in their own right with foreseeable difficulties and rich rewards
