Primary Source Tropical Forests And Our Future:

The Primary Source Norman Myers, 1992 Explains the ecological importance of tropical forests examines the current threat to their survival and tells how these forests can be preserved **Tropical Forests and Climate** N. Myers, 2013-06-29 Tropical forests affect climate and the removal of the forests will change climate Or not This book discusses basic questions on how far if at all tropical deforestation leads to climatic change The question of this uncertainty is particularly addressed One important consequence of the uncertainties of whether deforestation affects climate is how scientific findings best illuminate the policy making process **Tropical Forests and Their Crops** Nigel J. H. Smith, J. T. Williams, Donald L. Plucknett, Jennifer P. Talbot, 2018-05-31 The tropics are the source of many of our familiar fruits vegetables oils and spice as well as such commodities as rubber and wood Moreover other tropical fruits and vegetables are being introduced into our markets to offer variety to our diet Now as tropical forests are increasingly threatened we face a double fold crisis not only the loss of the plants but also rich pools of potentially useful genes Wild populations of crop plants harbor genes that can improve the productivity and disease resistance of cultivated crops many of which are vital to developing economies and to global commerce Eight chapters of this book are devoted to a variety of tropical crops beverages fruit starch oil resins fuelwood fodder spices timber and nuts the history of their domestication their uses today and the known extent of their gene pools both domesticated and wild Drawing on broad research the authors also consider conservation strategies such as parks and reserves corporate holdings gene banks and tissue culture collections and debt for nature swaps They stress the need for a sensitive balance between conservation and the economic well being of local populations If economic growth is part of the conservation effort local populations and governments will be more strongly motivated to save their natural resources Distinctly practical and soundly informative this book provides insight into the overwhelming abundance of tropical forests an unsettling sense of what we may lose if they are destroyed and a deep appreciation for the delicate relationships between tropical forest plants and people around the world **Tropical Forest Ecology** Florencia Montagnini, Carl F. Jordan, 2005-03-24 Importance of tropical forests characteristics of tropical forests classification of tropical forests deforestation in the tropics management of tropical forests plantations and agroforestry systems approaches for implementing sustainable management techniques **Shadows in the Forest** Peter Dauvergne, 1997 This book is the first to analyze the environmental impact of Japanese trade corporations and aid on timber management in the context of Southeast Asian political economies It is also one of the first comprehensive studies of why Southeast Asian states are unable to enforce forest policies and regulations **Changes in Land Use and Land Cover** William B. Meyer, Billie Lee Turner, University Corporation for Atmospheric Research. Office for Interdisciplinary Earth Studies, 1994-09-15 This book analyses the impact of human activities on the Earth's surface and environment **Amazonian Rain Forests** Carl F. Jordan, 2012-12-06 DEVELOPMENT AND DISTURBANCE IN AMAZON FORESTS Contrasting

Impressions 6 2 The rain forests of the Amazon Basin cover approximately 5 8 x 10 km Salati and Vose 1984 Flying over even just part of this basin one gazes hour after hour upon this seemingly infinite blanket of green The impression of immensity is similar when viewed from the Amazon River itself or from its tributaries From a hammock on the shaded deck of a riverboat the immensity of the forest presents an incredible monotony as one view of the shoreline blends unnoticeably into another From both perspectives the overwhelming reaction to the sea of trees that stretches from horizon to horizon is a sense of the vastness of the rain forest In September 1985 I got a different impression of the rain forest Several students and I journeyed in a self propelled car along the single track railroad that stretches almost 1000 km from the Carajas iron ore mine in the rain forest of Para State Brazil all the way to Sao Luis on the coast Fig 1 1

Eating Apes Dale Peterson, 2003-05 *Eating Apes* is an eloquent book about a disturbing secret the looming extinction of the African great apes In bringing the facts of this crisis into a single accessible book Peterson takes readers one step closer to averting one of the most disturbing threats to our closest relatives 16 photos Maps

Logging the Globe M. Patricia Marchak, 1995 With the growth of industrial forestry in the southern hemisphere and the restructuring of forestry in the northern hemisphere the industry is undergoing tremendous change *Logging the Globe* investigates the transformations that are taking place and their ecological social and economic impact

Small Country Development And International Labor Flows Anthony Maingot, 2019-06-26 This book examines policies that nations of emigration and immigration can use to maximize the flow of resources from the emigrants to the home country It explores interaction of factors such as migration trade and foreign investment on local and economic development in Mexico and the Caribbean

Forest Certification: A Policy Perspective Chris Elliott, 2000-01-01 This paper analyses the development of certification programmes in three countries Indonesia Canada and Sweden using the Advocacy Coalition Framework ACF as a theoretical reference point The ACF is an actor based framework for analysing policy processes and has not previously been applied in a developing country Actors in the three countries took different approaches to certification In Canada in a programme development process supported by the forest products industry a management systems approach was taken In Sweden performance standards were developed in a process initially driven by NGOs In Indonesia certification was led by an NGO within a framework established by government and a performance standards approach was used The paper concludes that forest certification can be best understood as a policy instrument that promotes and facilitates policy orientated learning among actors and provides indirect incentives for improved forest management Learning occurs both as the standards to be used for certification are developed and as they are implemented The benefits of learning and consensus building among actors such as NGOs forest companies private forest owners indigenous peoples governments etc who have traditionally been in conflict with each other can be significant On the other hand where fundamental changes in forest policy such as tenure and forest revenue reform are needed certification should not be seen as a substitute for these A further conclusion is that while public policies change over periods of decades the

private policies of retailers and forest product companies can adapt more rapidly to changing circumstances The concept of a fast track of private policy change compared to the slower track of governmental policy change is therefore proposed and described A number of interesting theoretical and empirical avenues for further research on certification are discussed

Ecology of Kalimantan Kathy MacKinnon, Gusti Hatta, 2013-02-05 The Ecology of Kalimantan is a comprehensive ecological survey of one of Indonesia's largest and most diverse islands This book presents a complete summary of our current scientific knowledge about Borneo including the rainforest and riverine habitats that are endangered by logging and industrial development along with a discussion of land use patterns and current problems Kalimantan is the Indonesian portion of the huge island of Borneo Kalimantan has played a key role in Indonesia's economic development and is a major earner of foreign revenue due to the island's rich natural resources forests oil gas coal and other minerals In this book the authors argue that Kalimantan can be developed but within tight ecological constraints and with great care This book remains a standard reference for scientists anthropologists writers and anyone interested in the region

The Literature of Forestry and Agroforestry Peter McDonald, J. P. Lassoie, 1996 Discusses the evolution of forestry and agroforestry and presents the core literature in these fields covering both traditional and emerging areas Topics include changes in forest science in the 20th century the development of agroforestry literature the role of professional societies and the US

Society and Exploitation Through Nature Martin Phillips, Tim Mighall, 2014-06-06 Society and Exploitation Through Nature offers an integrated approach to the environment linking the philosophical social and physical sciences to environmental problems and issues The text covers three main themes exploitation of nature and society the limits of exploitation through sustainability and managing environmental problems These themes are illustrated throughout the book with global case studies

Global Biopiracy Ikechi Mgbeoji, 2011-11-01 Legal control and ownership of plants and traditional knowledge of the uses of plants TKUP is a vexing issue The phenomenon of appropriation of plants and TKUP otherwise known as biopiracy thrives in a cultural milieu where non Western forms of knowledge are systemically marginalized and devalued as folk knowledge or characterized as inferior Global Biopiracy rethinks the role of international law and legal concepts the Western based Eurocentric patent systems of the world and international agricultural research institutions as they affect legal ownership and control of plants and TKUP The analysis is cast in various contexts and examined at multiple levels The first deals with the Eurocentric character of the patent system international law and institutions The second involves the cultural and economic dichotomy between the industrialized Western world and the westernizing developing world The third level of analysis considers the phenomenal loss of human cultures and plant diversity Exhaustively researched and eloquently argued Global Biopiracy sheds new light on a contentious topic The impact of intellectual property law on indigenous peoples and informal or traditional innovations is a field of study that currently includes only a handful of scholars Biopiracy will be an invaluable resource for students teachers and legal practitioners

Environmentalism David Pepper, Frank Webster, George Revill, 2003 **Ecology for Nonecologists** Frank R. Spellman, 2008 Written for anyone who works with chemicals or has a general interest in ecology this book examines the interrelationship of life forms in our environment and provides straightforward explanations about the complicated interactions among nature and humans Emphasizing basic concepts definitions and descriptions the author presents illustrative problems in terms of commonly used ecological parameters to provide readers with enough information to make technical and personal decisions about ecology Funneling the broad multidisciplinary field of ecology which incorporates aspects of biology chemistry physics geology meteorology agriculture forestry and more into a single stream the author provides those with backgrounds in only a handful or even none of these disciplines with an easy to read understanding of the functions and values of ecology and its interrelationships with other sciences including ecology s direct impact on our lives Organized into three parts this book examines the fundamentals of ecology the role of biodiversity and the practical side of ecology Readers will examine such topics as biogeochemical cycles ecological pyramids and the laws of population ecology They will also examine species terrestrial ecosystems and aquatic systems Each chapter ends with a Chapter Review Test

The Human Impact on the Natural Environment Andrew Goudie, 2000 The book also discusses the development of ideas on global change BOOK JACKET Protection of Global Biodiversity Lakshman D. Guruswamy, Jeffrey A. McNeely, 1998 The rate of extinction of biological species is greater today than at any time in the last 65 million years Some predict that if this rate continues two thirds of all living species will disappear during the next century Because reaching consensus on specific courses of action involves complex issues any adequate response to this impending crisis must include coverage of many areas of inquiry and understanding Protection of Global Biodiversity features essays by distinguished international experts who communicate with each other across disciplinary boundaries to address the challenge of formulating policies to protect biodiversity Although the global community has recently adopted a Convention of Biological Diversity the agreement sets forth only abstract goals Contributors to this volume advance the Convention s initial steps by providing workable solutions that can be implemented regionally nationally and locally The contributors including natural social and political scientists economists lawyers and environmentalists and decisionmakers in business agriculture and government have united to create a common discourse and to evaluate and propose strategies for halting this alarming loss of biodiversity In recognizing the diverse aspects of this task scientific economic institutional moral and legal this book presents a new picture of emerging action Contributors S James Anaya Gregory Benford Graciela Chichilnisky S Todd Crider Yvonne Cripps Robert T Fraley Anil K Gupta Lakshman D Guruswamy G M Heal Brent Hendricks Robert B Horsch Laura L Jackson Annie Lovejoy Ariel E Lugo Jeffrey A McNeely Brian G Norton Elinor Ostrom Peter H Raven John W Reid Walter V Reid Mark Sagoff Roger A Sedgo R David Simpson Ana Sittenfeld Christopher D Stone Gary H Toenniessen *Bottle Biology* Mrill Ingram, 2003 Observing the adventures of slime molds breeding spiders and pickling your own cabbage are just a few of the great ideas that fill this book
