Psychology In Modules Ir:

Psychology in Modules David G. Myers, C. Nathan DeWall, 2015-01-12 In this version of Psychology Twelfth Edition David Myers and Nathan DeWall break down the new edition's 16 chapters into 53 modules assignable in any sequence and brief enough to be read in one sitting. It's a format favored by a wide range of students and instructors, one that's supported by substantial research showing that students working with shorter reading assignments develop a deeper understanding of the material. The new edition of Modules includes the same new features and content of Psychology Twelfth Edition, including hundreds of new citations and new infographics. And like Psychology Twelfth Edition, it is more than ever a fully integrated text/media learning package with the modular edition's LaunchPad now featuring dozens of new Concept Practice activities.

Cardiovascular Health in Children and Adolescents: Present and future Shikai Yu, Shaun Chen, Zhen-Yu Zhang, 2025-01-13 Cardiovascular disease is the most common chronic non infectious disease and ranked as the number one cause of death in the world Although usually manifested at older ages cardiovascular disease may originate from younger ages Massive studies have shown that cardiovascular risk factors tracked from childhood adolescence to adulthood

Keeping an ideal cardiovascular health in childhood and adolescence is thus highly important for preventing the development of cardiovascular disease. As cardiovascular disease is often perceived as a problem for the older population, cardiovascular health in children and adolescents is usually neglected, resulting in a long-lasting exposure to unhealthy behaviors and factors of cardiovascular risk, as well as lower detection and poor management of cardiovascular disease in children and adolescents. The incidence and prevalence of cardiovascular disease and its risk factors in young people have been increasing over the past few decades, as reported by many studies. Recent data based on the National Health and Nutrition Examination Surveys 2005-2010 emphasized the worrying situation of the cardiovascular health in US adolescents. More data are needed to reveal the current situation of cardiovascular health and the related organ damage in children and adolescents, especially in low and middle income countries. Also, investigations are warranted to predict future trends and to develop potential intervention strategies aiming at the improvement of cardiovascular health in children and adolescents.

Spatial Learning Strategies Charles D. Holley, Donald F. Dansereau, 2014-05-10. *Spatial Learning Strategies: Techniques, Applications, and Related Issues* reviews the state of the art in spatial learning strategies and suggests ways in which such strategies, for example, spatial and semantic network representations may be more powerfully instantiated in text design and technology applications. Some of the most promising work in the field of learning strategies is documented. Comprised of 15 chapters, this book begins with an introduction to some of the theoretical underpinnings of spatial learning strategies, as well as selected theories of information processing. The next section contains reports on specific learner-oriented techniques that have been developed to improve the performances of students with respect to text processing. The discussion then turns to reports on specific techniques that have been developed and applied to other types of processing tasks, for example, test-taking, problem solving, or to teacher-author communication, including text analysis and instructional strategies. The application of networking as a learning strategy to hearing-impaired students is also considered, along with schematizing, mapping, and concept structuring. The book concludes by assessing the implications of spatial strategies for education and applied research. This monograph will be of interest to behaviorists, cognitive and educational psychologists, teachers, school administrators, and policymakers.

Face Recognition Sam S. Rakover, Baruch Cahlon, 2001. Annotation. In 1997, Rakover, U. of Haifa and Cahlon, Oakland, U. Michigan, won an award from the Minister of Internal Security of the State of Israel for developing the Catch model for face recognition. Since then, they have proposed the Law of Face Recognition by Similarity. Here, they describe the computer and mathematical research they have conducted and some of their results.
