Rosario, M.D.,2013-01-11 Science and Homosexualities is the first anthology by historians of science to examine European and American scientific research on sexual orientation since the coining of the word homosexual almost 150 years ago This collection is particularly timely given the enormous scientific and popular interest in biological studies of homosexuality and the importance given such studies in current legal legislative and cultural debates concerning gay civil rights However scientific and popular literature discussing the biology of sexual orientation have been short sighted in representing it as objective new scientific work This volume demonstrates that the quest for the biological cause of homosexuality and other sexualities is as old as the term itself These essays explore the active role experimental subjects played in shaping scientific theories of homosexuality and cultural perceptions of sexuality and sexual identity Finally this anthology studies the way in which this doctor patient interaction shaped not only scientific theories of homosexuality but also cultural perceptions and self identities as well Contributors include Garland E Allen Erin G Carlston Julian Carter Alice D Dreger Anne Fausto Sterling Margaret Gibson Stephanie Kenen Hubert Kennedy Harry Oosterhuis James Steakley Richard Pillard Jennifer Terry

Panic! David A. Zimmerman,2006-12-08 During the economic depression of the 1890s and the speculative frenzy of the following decade Wall Street high finance and market crises assumed unprecedented visibility in the United States Fiction writers published scores of novels in the period that explored this new cultural phenomenon In *Panic* David A Zimmerman studies how American novelists and their readers imagined and in one case incited market crashes and financial panics *Panic* examines how Americans attitudes toward securities markets popular investment and financial catastrophe were entangled

with their conceptions of gender class crowds corporations and history Zimmerman investigates how writers turned to mob psychology psychic investigations and conspiracy discourse to understand not only how financial markets worked but also how mass acts of financial reading including novel reading could trigger economic disaster and cultural chaos In addition Zimmerman shows how by concentrating on markets in crisis novelists were able to explore the limits of fiction s aesthetic economic and ethical capacities With readings of canonical as well as lesser known novelists Zimmerman provides an original and wide ranging analysis of the relation between fiction and financial modernity The Annual of Psychoanalysis, V. 24 Jerome A. Winer,2013-05-13 Volume 24 of The Annual opens with a memorial tribute to the late Merton M Gill 1914 1994 a major voice in American psychoanalysis for half a century Remembrances of Gill by Robert Holt Robert Wallerstein Philip Holzman and Irwin Hoffman are followed by thoughtful appreciations of Gill s final book Psychoanalysis in Transition A Personal View Analytic Press 1994 by John Gedo Jerome Oremland Arnold Richards and Arthur Lynch Joseph Schachter and Bhaskar Sripada and Shara Kronmal Section II offers four papers from a major conference on Mind Brain held in Osaka Japan In addition to publishing two clinical papers by the Chicago analyst John Gedo The Annual introduces readers to two prominent Japanese neuroscientists whose work is relevant to psychoanalysis Hiroshi Utena links brain development to the individual s freedom to make optimal adaptive choices whereas Makoto Iwata outlines the modular organization of vision in the brain and then illustrates each modular potential by examining the paintings of four artists Mondrian Duchamp Seurat and Rothko Kenneth Newman s sensitive consideration of analyst self discourse as the outcome of successful management of the countertransference and Frank Summers astute assessment of the place of self psychology in the history of psychoanalytic ideas are followed by three engaging and instructive studies in applied analysis Elaine Caruth and Milton Eber s examination of Woody Allen s The Purple Rose of Cairo as a metaphoric depiction of the blurring of boundaries in psychotherapy Frank and Annette Lachmann s study of the creative process of Henrik Ibsen as a self transformational response to narcissistic injury and W W Meissner s exploration of the role of shame in Vincent van Gogh s life and art The volume concludes with a provocative contribution to psychoanalytic history J Bos s social constructivist rereading of the Minutes of the Vienna Psycho Analytic Society with an eye to illuminating why and how psychoanalysis changed during its early years True to its distinguished lineage volume 24 of The Annual continues to broaden the conceptual clinical and historical vistas of its readers Moreover with its revealing reminiscences and substantive appraisals of Merton Gill this volume becomes a fascinating marker in the very psychoanalytic history it helps recount Bibliography of the History of Medicine ,1979 **Real-Life Monsters** Stephen J. Giannangelo,2012-07-06 This book presents an in depth psychological analysis of the development of the serial killer personality that will fascinate all readers from the experienced criminology student to the casual true crime reader Real Life Monsters A Psychological Examination of the Serial Murderer takes a different approach than most titles on a similar topic the author develops and proposes an original psychological explanation

rather than simply repeating some of the long held theories for these criminals heinous actions The work addresses current issues presents detailed commentary and personal observation and contains photographs that will fascinate general readers interested in the subjects of true crime serial killers and psychopathology The first part of the book carefully examines the research past and present regarding clinical psychological societal and biological bases for violent behavior specific to the serial murderer Part two establishes a novel theory of the pattern of violence and then explores this hypothesis through eight case studies interviews with serial killers and elemental analysis The work also contains a chapter based on conversations between the author and a convicted serial murderer Queering the Color Line Siobhan B. Somerville,2000 The interconnected constructions of race and sexuality at the turn of the century *Madness and Enterprise* Nima Bassiri,2024-01-18 This book explores the economic norms embedded within psychiatric thinking about mental illness in the North Atlantic world Over the course of the nineteenth century the concept of madness was subjected to an economically saturated style of psychiatric reasoning Psychiatrists across Western Europe and the United States attributed financial and even moral value to an array of pathological conditions such that some mental disorders were seen as financial assets and others as economic liabilities By turning to economic conduct and asking whether patients such as eccentrics appeared capable of managing their financial affairs and money psychiatrists could often circumvent uncertainties about a person s psychiatric health What we learn is how in psychiatry an economic lens was used to reveal mental illness and uncover the hidden economic value of pathology itself The psychiatric turn to economic reasoning signaled a transformation of the very idea of value in the modern North Atlantic For the differences between the most common forms of social valuation moral value medical value and economic value were flattened and rendered equivalent and interchangeable If what was good and what was healthy was increasingly conflated with what was remunerative and vice versa then a conceptual space opened through which madness itself could be converted into an economic form and subsequently redeemed and even revered

The Emergence of Sexuality Arnold Ira Davidson,2001 Moving between philosophy and history Arnold Davidson elaborates a powerful new method for considering the history of concepts and the nature of scientific knowledge a method he calls historical epistemology He applies this method to the history of sexuality *The Vestiges of Japanese Spirituality* Brian J. McVeigh,2025-10-02 By positioning Japan within a global perspective this work challenges the black box approach to psyche dominating studies in the history of religion Brian J McVeigh employs a cultural psychological analysis by first highlighting the conceptual obstacles hindering the psychology of religion such as neglecting sociohistorical forces that shape mental processes Next by exploring shamanism divination and the mountain asceticism or Shugendo he contextualizes the historical background of Japanese religion He argues that current practices of Japan s new religions are relics of an earlier mentality that has been creatively renovated and re adapted for the present day This is demonstrated by investigating spirit possession a vestige of an obsolete neurocultural arrangement Unlike other works this book treats possession as a

legitimate phenomenon in and of itself requiring explanatory analysis rather than dismissing it as a mere epiphenomenon This genuinely interdisciplinary work transcends mainstream academic fields and will appeal to readers interested in Japanese and Asian religions and the psychology of religion *History of Psychiatry and Medical Psychology* Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s D B Weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease Dissociation and the Dissociative Disorders Martin J. Dorahy, Steven N. Gold, John A. O'Neil, 2022-09-30 This second edition of the award winning original text brings together in one volume the current thinking and conceptualizations on dissociation and the dissociative disorders Comprised of ten parts starting with historical and conceptual issues and ending with considerations for the present and future internationally renowned authors in the trauma and dissociation fields explore different facets of dissociation in pathological and non clinical guises This book is designed to be the most comprehensive reference book in the dissociation field and aims to provide a scholarly foundation for understanding dissociation dissociative disorders current issues and perspectives within the field theoretical formulations and empirical findings Chapters have been thoroughly updated to include recent developments in the field including the complex nature of conceptualization etiology and neurobiology the various manifestations of dissociation in clinical and non clinical forms and different perspectives on how dissociation should be understood This book is essential for clinicians researchers theoreticians students of clinical psychology psychiatry and psychotherapy and those with an interest or curiosity in dissociation in the various ways it can be conceived and studied Current Catalog National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70
