Spencer, Geraldine K. Brookins, Walter R. Allen, 2013-04-15 How does the therapist begin psychotherapy How that is does she conceptualize the needs of the patient while simultaneously enlisting him or her as an active partner in formulating an individualized working plan And how should supervisors teach the skills needed to make the intake procedure truly the beginning of treatment In *Beginnings The Art and Science of Planning Psychotherapy* Mary Jo Peebles Kleiger tackles these and other questions in an authoritative manner that draws on the cumulative experience of the outpatient department of the Menninger Psychiatric Clinic Peebles Kleiger outlines an approach that gives equal weight to the need for a diagnostic case formulation with specific treatment recommendations and the need to make the patient an active partner in the process right from the start Clinicians of every persuasion will appreciate her sensitive discerning grasp of the dyadic interaction of the initial sessions when the therapist must refine preliminary hypotheses and simultaneously engage the patient in a process of discovery and self reflection that lays the groundwork for the therapeutic alliance Peebles Kleiger s elegant synoptic discussions of the major categories of psychological dysfunction and the different treatment strategies appropriate to them are carefully calibrated with actual examples to the limits and opportunities of the first sessions Of particular value is her unusual capacity to articulate patients

various difficulties in forming and maintaining an alliance and then to show how such difficulties feed back into the clinician's interventions in the first few sessions In this manner she illustrates how potential treatment obstacles difficulties in affect regulation in reality testing in conscience formation among others can be assessed and subjected to trial interventions from the very start Skilled in various psychodynamic and behavioral approaches from psychoanalysis to hypnotherapy Peebles Kleiger consistently advances an integrative approach that cuts across specific modalities and combines sophisticated psychodynamic understanding with the fruits of empirical research Both primer and sourcebook *Beginnings The Art and Science of Planning Psychotherapy* fills a niche in the literature so admirably that clinicians will find it indispensable in planning humanely responsive treatment in an increasingly complex therapeutic world **Radical and Marxist Theories of Crime**

Lauren S. Berliner, 2018-06-14 *Producing Queer Youth* challenges popular ideas about online media culture as a platform for empowerment cultural transformation and social progress Based on over three years of participant action research with queer teen media makers and textual analysis of hundreds of youth produced videos and popular media campaigns the book unsettles assumptions that having a voice and gaining visibility and recognition necessarily equate to securing rights and resources Instead Berliner offers a nuanced picture of openings that emerge for youth media producers as they negotiate the structures of funding and publicity and manage their identities with digital self representations Examining youth media practices within broader communication history and critical media pedagogy she forwards an approach to media production that re centers the process of making as the site of potential learning and social connection Ultimately she reframes digital media participation as a struggle for rather than in itself evidence of power *Crime Human Nature*

the congressional papers of Henry B Gonzalez to present an intriguing and highly readable account of this turbulent period Montejano divides the narrative into three parts In the first part he recounts how college student activists and politicized social workers mobilized barrio youth and mounted an aggressive challenge to both Anglo and Mexican American political elites In the second part Montejano looks at the dynamic evolution of the Chicano movement and the emergence of clear gender and class distinctions as women and ex gang youth struggled to gain recognition as serious political actors In the final part Montejano analyzes the failures and successes of movement politics He describes the work of second generation movement organizations that made possible a new and more representative political order symbolized by the election of Mayor Henry Cisneros in 1981 A most welcome addition to the growing literature on the Chicano movement of the 1960s and 1970s Pacific Historical Review
