Sino-Japanese Reflections Joshua A. Fogel,Matthew Fraleigh,2022-05-09 Sino Japanese Reflections offers ten richly detailed case studies that examine various forms of cultural and literary interaction between Japanese and Chinese intellectuals from the late Ming to the early twentieth century The authors consider efforts by early modern scholars on each side of the Yellow Sea to understand the language and culture of the other to draw upon received texts and forms and to contribute to shared literary practices Whereas literary and cultural flow within the Sinosphere is sometimes imagined to be an entirely unidirectional process of textual dissemination from China to the periphery the contributions to this volume reveal a more complex picture highlighting how literary and cultural engagement was always an opportunity for creative adaptation and negotiation Examining materials such as Chinese translations of Japanese vernacular poetry Japanese engagements with Chinese supernatural stories adaptations of Japanese historical tales into vernacular Chinese Sinitic poetry composed in Japan and Japanese Sinology the volume brings together recent work by literary scholars and intellectual historians of multiple generations all of whom have a strong comparative interest in Sino Japanese studies

Social Construction and the Logic of Money J. Samuel Barkin,2012-02-01 While other studies of international leadership have looked at a variety of measures to predict behavior this book demonstrates that the key factor is international finance J Samuel Barkin uses an innovative blend of rationalist and constructivist methodologies approaches to international political economy that normally exist in isolation from one another Barkin argues that the level of a country s involvement in international finance specifically motivates it to lead This is particularly relevant today given the on going discussions on how to respond to local and global financial crises Barkin illustrates his theory with an episodic history of international monetary leadership over the last four centuries Dutch leadership in the seventeenth century British leadership in the nineteenth the failure of leadership in the interwar era and Great Depression and the role of the U S in the construction of an international economic infrastructure since World War II

Decolonizing the Social Sciences and the Humanities Bernd Reiter,2021-12-30 In Decolonizing the Social Sciences and the Humanities Bernd Reiter contributes to the ongoing efforts to decolonize the social sciences and humanities by arguing that true decolonization implies a liberation from the elite culture that Western civilization has perpetually promoted Reiter brings together lessons learned from field research on a Colombian indigenous society a maroon society also in Colombia from Afro Brazilian religion from Spanish Anarchism and from German Council democracy and from analyzing non

Western ontologies and epistemologies in general He claims that once these lessons are absorbed it becomes clear that Western civilization has advanced individualization and elitism The chapters present the case that human beings are able to rule themselves and have done so for some 300 000 years before the Neolithic Revolution Self rule and rule by councils is our default option once we rid ourselves of leaders and rulers Reiter concludes by considering the massive manipulations and the heinous divisions that political elitism dressed in the form of representative democracy has brought us and implores us to seek true freedom and democracy by liberating ourselves from political elites and taking on political responsibilities

Decolonizing the Social Sciences and the Humanities is written for students scholars and social justice activists across cultural anthropology sociology geography Latin American Studies Africana Studies and political science *Egypt's Legacy* Michael Rice,2004-03-01 Drawing on Jungian psychology to show why Egypt has been so important in the history of Western civilisation Michael Rice explains the majesty and enduring appeal of Egyptian civilization Jung claimed that there exist certain psychological drives dormant in our shared unconscious these are the archetypes From the omnipotent god to the idea of the nation state the formulation of most of these archetypes is owed to ancient Egypt Michael Rice sets out to recover the sense of wonder that the Egyptians themselves felt as they contemplated the world in which they lived and the way they expressed that wonder in the religion art and literature He traces the story of Egyptian civilization from its emergence in the third millennium BC to its transformation following the Macedonian conquest in 30 BC History of Political Ideas Eric Voegelin,1997 The series will publish all of philosopher Voegelin s 1901 1985 works including the previously unpublished multi volume History of Political Ideas of which this is the second volume Completed in 1944 it is not a conventional chronological account but an original comprehensive account of the political thought and experiential underpinnings that typified the medieval period A survey of the structure of the period is followed by analysis of the Germanic invasions the fall of Rome and the rise of empire and monastic Christianity climaxing in a study of Saint Thomas Aquinas Annotation copyrighted by Book News Inc Portland OR
