Globalisation and Economic Security in East Asia Helen Sharmini Nesadurai, 2006 What is the relationship between globalization and economic security Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis Viewing traditional neorealist conceptions of economic security as overly narrow this new study suggests that any conception of economic security in the contemporary era needs to also pay close attention to the nature of global capitalism and the insecurities it generates for societies and individuals This uniquely open ended approach to conceptualizing economic security is supported by the East Asian experience The country case studies included here reveal that while economic security has largely been posed as one of ensuring sustainable economic growth and equitable social development particularly following the 1997 to 1998 Asian financial crisis other more realist conceptions of economic security have not become irrelevant This is also an exploration of whether and how national regional and multilateral institutions as well as non state regional mechanisms help policy makers meet the task of governing in the interests of economic security This book will be of great interest to all students and scholars of international relations international political economy of East Asia globalization and security studies

Regional Community Building in East Asia Lee Lai To, Zarina Othman, 2016-09-01 This volume is a collection of papers written by nationals or former nationals of the respective country in ASEAN and Northeast Asia Unlike other works written by scholars outside ASEAN or East Asia it offers an insider's point of view of the 10 ASEAN states China Japan and South Korea on regional community building While a nationalist

perspective may permeate throughout the study it is also clear that pursuing regional cooperation is considered to be important by the respective author denoting the non exclusivity between nationalism and regionalism and the mutual reinforcement of the two Each author of this volume has made a deliberate effort to introduce and survey the developmental challenges and experiences of his or her country from a historical perspective All authors without exception have emphasized the importance and advantages in staying with ASEAN or linking up with ASEAN by China Japan and South Korea in political security economic and socio cultural terms Their papers also reveal that the self help and self strengthening mechanism emphasized by the ASEAN Plus Three process will take time to bear fruits In the meantime it seems that bilateral interactions and cooperation between ASEAN and Northeast Asian states remain to be more dominant as shown in this study One can argue that bilateral interactions are the building block of multilateralism interactions To be sure there is a deliberate effort in this study to highlight unity in diversity in East Asia in general and ASEAN in particular
