Reinventing Cities For People And The Planet:

Reinventing Cities for People and the Planet Molly O'Meara Sheehan, 1999 Introduction An urbanizing world Closing the water and waste circuits Toward greater self reliance in food and energy Linking transportation and land use Financing the sustainable city Building political strength Appendix **Cities** Ian Douglas, 2013-05-30 Cities are amongst our greatest creations Yet with cities now home to over half the world's population there is increasing concern over their unchecked expansion and the detrimental effect this is having on the planet This unfettered growth is affecting every ecosystem on Earth from the deepest oceans to the highest mountains as induced climate change and ever increasing demands upon the world's resources take effect As the pace of urbanisation quickens how can we make the world's cities more sustainable Ian Douglas tells the story of cities He shows why they exist how they have evolved and the problems they have encountered revealing how from the very beginning environmental management played a key role in urban life He addresses specific problems such as noise and air pollution water supply and waste management as well as the vulnerability of cities to hazards such as earthquakes and flooding And he considers strategies to make cities more sustainable and help them adapt to climate change such as waste recycling energy conservation dual water systems sustainable housing as well as initiatives to retrofit existing cities Written by an acknowledged international authority this unique volume will be welcomed by students and specialists in environment planning geography ecology and the built environment **Reinventing cities for people and the planet**, 1999 **Cities in a Globalizing World** Un-Habitat, 2012-06-25 The world has entered the urban millennium Nearly half the world's people are now city dwellers and the rapid increase in urban population is expected to continue mainly in developing countries This historic transition is being further propelled by the powerful forces of globalization The central challenge for the international community is clear to make both urbanization and globalization work for all people instead of leaving billions behind or on the margins Cities in a Globalizing World Global Report on Human Settlements is a comprehensive review of conditions in the world's cities and the prospects for making them better safer places to live in an age of globalization I hope that it will provide all stakeholders foremost among them the urban poor themselves with reliable and timely information with which to set our policies right and get the machinery of urban life moving in a constructive direction From the Foreword by Kofi Annan Secretary General United Nations Cities in a Globalizing World presents a comprehensive review of the world's cities and analyses the positive and negative impacts on human settlements of the global trends towards social and economic integration and the rapid changes in information and communication technologies In this Global Report the United Nations Centre for Human Settlements Habitat draws on specially commissioned and contributed background papers from more than 80 leading international specialists The report focuses on recent trends in human settlements and their implications for poverty inequity and social polarization It develops advance knowledge for urban planning and management policies in support and promotion of inclusive cities and good urban governance This major

and influential report is the most authoritative and up to date assessment of human settlements conditions and trends Written in clear non technical language and supported by informative graphics case studies and extensive statistical data it should be an essential tool and reference for academics researchers planners public authorities and civil society organizations around the world

Cities, Disaster Risk and Adaptation Christine Wamsler,2014-01-23 Worldwide disasters and climate change pose a serious risk to sustainable urban development resulting in escalating human and economic costs Consequently city authorities and other urban actors face the challenge of integrating risk reduction and adaptation strategies into their work However related knowledge and expertise are still scarce and fragmented Cities Disaster Risk and Adaptation explores ways in which resilient cities can be built and sustainable urban transformations achieved The book provides a comprehensive understanding of urban risk reduction and adaptation planning exploring key theoretical concepts and analysing the complex interrelations between cities disasters and climate change Furthermore it provides an overview of current risk reduction and adaptation approaches taken by both city authorities and city dwellers from diverse contexts in low middle and high income nations Finally the book offers a planning framework for reducing and adapting to risk in urban areas by expanding on pre existing positive actions and addressing current shortfalls in theory and practice The importance of a distributed urban governance system in which institutions and citizens adaptive capacities can support and complement each other is highlighted This book takes a holistic approach it integrates perspectives and practice from risk reduction and climate change adaptation based on a specific urban viewpoint The text is richly supplemented with boxed case studies written by renowned academics and practitioners in the field and test yourself scenarios that integrate theory into practice Each chapter contains learning objectives end of chapter questions suggested further reading and web resources as well as a wealth of tables and figures This book is essential reading for undergraduate and postgraduate students of geography urban studies and planning architecture environmental studies international development sociology and sustainability studies

Public Perception of Climate Change Bjoern Hagen,2015-11-06 Despite the findings on global climate change presented by the scientific community there remains a significant gap between its recommendations and the actions of the public and policy makers So far scientists and the media have failed to successfully communicate the urgency of the climate change situation in such a way that long term comprehensive and legally binding policy commitments are being made on the national and international level This book examines the way the public processes information how they perceive threats and other perceptual factors that have a significant effect on how and to what degree climate change mitigation and adaptation strategies are supported Understanding public risk perception plays a vital role in communicating the challenges of global climate change Using a diverse range of international case studies this book explores the nature of public perceptions of climate change and identifies the perception factors which have a significant impact on the public s willingness to support global climate change policies or commit to behavioral changes to reduce greenhouse gas emissions

and improve urban resiliency The comparative study of social and cultural factors beliefs attitudes and trust provides an international overview of best practices regarding the design implementation and generation of public support for climate change policies at a global level Offering valuable insight into climate change and risk communication the book should be of interest to students and scholars of environment studies politics urban planning and media and cultural studies The Social Construction of Ancient Cities Monica L. Smith, 2013-04-09 What made ancient cities successful What are the similarities between modern cities and ancient ones The Social Construction of Ancient Cities offers a fresh perspective on ancient cities and the social networks and relations that built and sustained them marking a dramatic change in the way archaeologists approach them Examining ancient cities from a bottom up perspective the authors in this volume explore the ways in which cities were actually created by ordinary inhabitants They track the development of urban space from the point of view of individuals and households providing new insights into cities roles as social centers as well as focal points of political and economic activities Analyzing various urban communities from residences and neighborhoods to marketplaces and ceremonial plazas the authors examine urban centers in Africa Mesoamerica South America Mesopotamia the Indian subcontinent and China Collectively they demonstrate how complex networks of social relations and structures gave rise to the formation of ancient cities contributed to their cohesion and sustained their growth much as they do in modern urban centers The authors analyses draw from ancient texts as well as archaeological surveys and excavations of urban architecture and other material remains including portable objects for daily use and comestibles They show clearly how early urban dwellers consciously developed dense interdependent social networks to satisfy their needs for food housing and employment forged their own urban identities and generally managed to thrive in the crowded bustling and competitive environment that characterized ancient cities Not least of all they suggest how urban leaders and urban dwellers negotiated a consensus that enabled them to achieve both mundane and extraordinary goals in the process establishing their unique ritual legal and social status **Environmental and Natural Resource Economics** Jonathan M. Harris, Brian Roach, 2013-07-05 **The Great Transition** Lester R. Brown, 2015-04-13 The great energy transition from fossil fuels to renewable sources of energy is under way As oil insecurity deepens the extraction risks of fossil fuels rise and concerns about climate instability cast a shadow over the future of coal a new world energy economy is emerging The old economy fueled by oil natural gas and coal is being replaced with one powered by wind solar and geothermal energy The Great Transition details the accelerating pace of this global energy revolution As many countries become less enamored with coal and nuclear power they are embracing an array of clean renewable energies Whereas solar energy projects were once small scale largely designed for residential use energy investors are now building utility scale solar projects Strides are being made some of the huge wind farm complexes under construction in China will each produce as much electricity as several nuclear power plants and an electrified transport system supplemented by the use of bicycles could reshape the way we think about mobility

World Development Indicators [computer File] World Bank, 2004 Annotation Chapters in this book focus on the people economy environment states and markets world view and global links for 148 countries As a whole these chapters present an expanded view of the world economy Introductions highlight recent research on major development issues worldwide
