Setting Genes To Work:

Genes and the Bioimaginary Deborah Lynn Steinberg, 2016-03-03 *Genes and the Bioimaginary* examines the dramatic rise and contemporary cultural apotheosis of the gene. The book traces not only the genetification of modern life but is also a journey through the complex relationship between science and culture. At the heart of this book are three interlinked questions. The first concerns the paradigmatic transformations of the genetics revolution: how can we understand the impact of genes on social arenas as diverse as law and agriculture, politics and medicine, genealogy and jurisprudence? Second, how has the language of genes come to pervade public discourse as much a trope of personal narrative as of the popular imaginary? And third, how can we gain critical purchase not only on the conditions and consequences of a particular science but on its projective seductions, the terms of its persuasion and the dilemmas and anxieties provoked in its wake? Through a series of illuminating case studies ranging from gay genes to Jew genes to genes for crime from CSI to the Innocence Project from genetics post racial imaginary to its phantasies of redemption, the book examines the emergence of the gene as a pre eminent locus of both scientific and social explanation and as a powerful object of spectacle, projective phantasy and attachment. *Genes and the Bioimaginary* makes a distinctive contribution to our understanding of how knowledge comes to be not only powerful but plausible.

Working Inter-Culturally in Counselling Settings Aisha Dupont-Joshua, 2003-09-02 Explores how racial issues can be recognised and worked with in a practical clinical setting looking at how this setting can influence practice.

Health, Medicine and Society Michael Calnan, Jonathan Gabe, Simon J. Williams, 2002-09-11 Taking as its point of departure recent developments in health and social theory, *Health, Medicine and Society* brings together a range of eminent international scholars to reflect upon key issues at the turn of the century. Contributors draw upon a range of contemporary theories both modernist and postmodernist to look at the following themes: health and social structure, the contested nature of the body, the salience of consumption and risk, the challenge of emotions. *Health, Medicine and Society* provides a state of the art assessment of health related issues at the millennium and a cogent set of arguments for the centrality of health to contemporary social theory. Written in a clear, accessible style, it will be ideal reading for students and researchers in health studies, public health, medical sociology, medicine and nursing.
