Setting The Context Suppression Of Enemy:

Setting the Context James R. Brungess, 1994 **Setting the context suppression of enemy air...** , **Setting the Context** Air University Press, U. S. Military, Department of Defense (DoD), James R. Brungess, U. S. Air Force (USAF), 2018-04

Colonel Brungess proposes using joint suppression of enemy air defenses JSEAD to address the problem of reduced SEAD resources available to individual services. He contends that the demise of the Soviet Union presents the perfect transitional period for SEAD planners to create new approaches to countering the information based integrated air defense system nets. He looks at the foundations and evolution of SEAD, identifies pertinent variables and shows how they have changed. Colonel Brungess concludes that fiscal reality demands that the services forge joint SEAD tactics and doctrine.

Breaking the Phalanx Douglas A. Macgregor, 1997-01-30. This work proposes the reorganization of America's ground forces on the strategic, operational and tactical levels. Central to the proposal is the simple thesis that the U.S. Army must take control of its future by exploiting the emerging revolution in military affairs. The analysis argues that a new Army warfighting organization will not only be more deployable and effective in Joint operations, reorganized information age ground forces will be significantly less expensive to operate, maintain and modernize than the Army's current Cold War division based

organizations And while ground forces must be equipped with the newest weapons new technology will not fulfill its promise of shaping the battlefield to American advantage if new devices are merely grafted on to old organizations that are not specifically designed to exploit them It is not enough to rely on the infusion of new expensive technology into the American defense establishment to preserve America's strategic dominance in the next century The work makes it clear that planes ships and missiles cannot do the job of defending America's global security issues alone The United States must opt for reform and reorganization of the nation's ground forces and avoid repeating Britain's historic mistake of always fielding an effective army just in time to avoid defeat but too late to deter an aggressor *Innovation and Adaptation in War*

Matthew A. Tattar, 2025-05-20 An analysis of advances in military technology that illustrates the importance of organizational flexibility in both an attacker's innovations and an opponent's adaptations How important is military innovation in determining outcomes during armed conflict In *Innovation and Adaptation in War* Matthew Tattar questions the conventional wisdom that to succeed military organizations must innovate early and often Because successful methods of warfare are soon widely imitated or countered on the international stage the advantages of a particular innovation quickly evaporate Therefore Tattar argues large scale innovations at the cost of organizational flexibility and the ability to adapt to an adversary's innovations may not be the optimal path not just because force readiness is vital but also because innovation does not provide as long lasting and decisive an advantage as may have been previously thought Although other scholars have analyzed the sources of military innovation Tattar is the first to focus on the relationship between innovation and specific military outcomes Looking at several different types of military organizations and many different types of battles he draws on theoretical works in depth historical research and case studies and finds that the initial advantages that are generated by innovation disappear far too rapidly in wartime for militaries to depend on them for victory Furthermore as Tattar demonstrates emphasizing innovation in defense planning at the expense of organizational flexibility can have significant negative consequences The decisive factor in successful adaptation more often than not is a well positioned and flexible organization Providing both a new framework for studying military innovation and a comprehensive review of the current literature in this field *Innovation and Adaptation in War* offers crucial policymaking insights into when and under what circumstances militaries should innovate and adapt *AU Press, Your Air and Space Power Publisher, 2003*, 2003

Parameters, 1994 **The Arms of the Future** Jack Watling, 2023-09-07 From sensor fused munitions and autonomous weapons to ground moving target indication radar laser vibrometers and artificial intelligence the weapons of warfare are undergoing a rapid transformation with modern technologies reshaping how armies intend to fight in the twenty first century *The Arms of the Future* analyses how the emergence of novel weapons systems is shaping the risks and opportunities on the battlefield Drawing on extensive practical observation and experimentation the book unpacks the operational challenges new weapons pose on the battlefield and how armies might be structured to overcome them At a time when defence spending

across NATO is on the rise and conflict with Russia raises new questions of what it means to fight a truly modern war Watling examines not just the arms to be employed but how they can be fielded and wielded to survive and prevail in future wars

Display and Interface Design Kevin B. Bennett, John M. Flach, 2011-03-09 The reason that good interfaces are few and far between is really quite simple they are extremely difficult to design and build properly While there are many books available that address display design most of them focus on aesthetic principles but lack scientific rigor or are descriptive but not prescriptive This book elucidates an overarching framework for design that can be applied to the broad spectrum of existing domains The authors delineate analytical tools and principles of design that are general and powerful but very abstract accompanied by concrete examples of their use in a variety of domains of application The book includes access to a web site containing examples of the dynamic properties of displays
