## **Sight Our Senses:**

**Sight and the Ancient Senses** Michael Squire, 2015-12-22 It is to Greek critical thinking about seeing that we owe our conceptual framework for theorizing the senses and it is also to such thinking that we owe the lasting legacy of Greco Roman imagery Sight and the Ancient Senses is the first thorough introduction to the conceptualization of sight in the history visual culture literature and philosophy of classical antiquity Examining how the Greeks and Romans interpreted what they saw the collection also considers sight in relation to the other senses This volume brings together a number of interdisciplinary perspectives to deliver a broad and balanced coverage of this subject Contributors explore the cultural social and intellectual backdrops that gave rise to ancient theories of seeing from Archaic Greece through to the advent of Christianity in late antiquity This series of specially commissioned thematic chapters demonstrate how theories about sight informed Graeco Roman philosophy science poetry rhetoric and art The collection also reaches beyond its Graeco Roman visual framework showcasing how ancient ideas have influenced the longue dur e of western sensory thinking Richly illustrated throughout including a section of color plates Sight and the Ancient Senses is a wide ranging introduction to ancient theories of seeing which will be an invaluable resource for students and scholars of classical antiquity

**The Senses of Scripture** Yael Avrahami, 2012-06-15 The Senses of Scripture reveals the essence of biblical epistemology the ways in which ancient Israelites thought about and used their sensorium The theoretical introduction demonstrates that scholars need to liberate themselves from the Western bias that holds a pentasensory paradigm and prioritises the sense of sight The discussion of the biblical material demonstrates that biblical scholars should follow a similar path Through examination of associative and contextual patters the author reaches a septasensory model including sight hearing speech kinaesthesia touch taste and smell It is further demonstrated that the senses according to the HB are a divinely created physical experience which symbolised human ability to act in a sovereign manner in the world Despite the lack of a biblical Hebrew term sense it seems that at times the merism sight and hearing serves that matter Finally the book discusses the longstanding dispute regarding the primacy of sight vs hearing and claims that although there is no strict sensory hierarchy evident in the text sight holds a central space in biblical epistemology

**Engaging Jesus with Our Senses** Jeannine Marie Hanger, 2024-08-27 Jesus took on flesh he was embodied And the Gospels use multisensory language to reveal that his teaching ministry and interactions with people engaged the senses Consider the raging storm on the Sea of Galilee the perfume filling the house as Mary anointed Jesus s feet the significance of touch as Jesus healed people Jesus even described himself in sensory terms as the bread of life the light of the world the vine to whom his disciples are connected Our physical senses are crucial to gaining knowledge of the world around us Yet when it comes to Bible reading we often reduce it to a mere cognitive experience ignoring the Psalmist s invitation to taste and see that the Lord is good This book offers a fresh way to read the Gospels with an emphasis on embodiment focused on a life abiding in Christ The goal is a greater more tangible knowledge of God

Jeannine Hanger points to the importance of engaging our physical senses in Bible reading shows an approach to doing so with an emphasis on sparking the imagination and looks at how utilizing our primary senses plays out in reading the Gospels Each chapter includes sensory practices and questions for personal reflection The book includes a foreword by Grant Macaskill

The Senses Fiona Macpherson, 2010-11-23 The senses or sensory modalities constitute the different ways we have of perceiving the world such as seeing hearing touching tasting and smelling But how many senses are there How many could there be What makes the senses different What interaction takes place between the senses This book is a guide to thinking about these questions Together with an extensive introduction to the topic the book contains the key classic papers on this subject together with nine newly commissioned essays One reason that these questions are important is that we are receiving a huge influx of new information from the sciences that challenges some traditional philosophical views about the senses This information needs to be incorporated into our view of the senses and perception Can we do this whilst retaining our pre existing concepts of the senses and of perception or do we need to revise our concepts If they need to be revised then in what way should that be done Research in diverse areas such as the nature of human perception varieties of non human animal perception the interaction between different sensory modalities perceptual disorders and possible treatments for them calls into question the platitude that there are five senses as well as the pre supposition that we know what we are counting when we count them as five or more This book will serve as an inspiring introduction to the topic and as a basis from which further new research will grow

**Coming to Our Senses** Dierdra Reber, 2016-02-02 Coming to Our Senses positions affect or feeling as our new cultural compass ordering the parameters and possibilities of what can be known From Facebook likes to Coca Cola loves from emotional intelligence in business to emotional contagion in social media affect has displaced reason as the primary catalyst of global culture Through examples of feeling in the books film music advertising cultural criticism and political discourse of the United States and Latin America Reber shows how affect encourages the public to reason on the strength of sentiment alone Well being represented by happiness and health and ill being embodied by unhappiness and disease form the two poles of our social judgment whether in affirmation or critique We must then reenvision contemporary politics as operating at the level of the feeling body so we can better understand the physiological and epistemological conditions affirming our cultural status quo and contestatory strategies for emancipation
