Lower Extremity Amputation

Joan Edelstein, Akex Moroz

Lower Extremity Amputation:

Lower Extremity Amputation Wesley S. Moore, 1989 Physical Therapy Gertrude Mensch, Patricia M. Ellis, 1986
Practical guide featuring easy to understand explanations of the complex medical and rehabilitation problems of lower extremity amputees Gives clinical guidelines for treatment at each level of amputation with handy reference charts and over 300 photographs Lower Limb Amputation Adrian Cristian M. D., Adrian Cristian, 2010 Limb loss can occur due to trauma infection diabetes vascular disease cancer and other diseases Regardless of the cause it often has a profound impact on a person's life Many amputees experience feelings of loss and grief frustration in learning to walk with an artificial limb and difficulty adjusting to a new and challenging lifestyle This book provides the practical knowledge needed to cope with the many changes caused by lower limb amputation In clear accessible language it covers the medical physical and psychosocial issues and answers crucial questions such as How do I cope emotionally with the loss of a limb What steps can I take to prevent additional amputations How do I treat and care for my post surgery wound What are the best prostheses for my particular needs Can I play sports and exercise with a prosthesis And much more This unique resource aims to educate those with lower limb amputation so that they can better care for themselves and maximize their independence The practical advice tips and extensive references within its pages will help individuals meet the challenges of leading full and fruitful lives

Lower Limb Amputations Gloria T. Sanders, Bella J. May, 1986 The primary initial effort in every case of disease or injury should be to save the extremity Amputation is seldom necessary following bone and joint injuries More often it is an admission of defeat in the medical management of the patient with vascular disease In such cases it should be performed only as a last resort The longest possible lever arm consistent with primary healing should be maintained for maximum proprioceptive and kinesthetic feedback and thus rehabilitation potential Lower Extremity Amputation Linda A. Karacolloff, Frederick J. Schneider, 1986 **Lower Limb Amputation** Dr. Adrian Cristian, MD, 2005-09-01 Limb loss can occur due to trauma infection diabetes vascular disease cancer and other diseases Lower limb amputation is relatively common and has a profound impact on a person's life regardless of the cause Feelings of loss and grief difficulties in learning to walk with an artificial limb and readjustment to an interrupted life all pose considerable challenges Nevertheless there are countless stories of people who have successfully overcome these problems This book provides the practical knowledge needed to cope with the life changes caused by lower limb amputation It demystifies the medical process and technical jargon by using plain easily understandable language And it is the first book to combine medical prosthetic and psychosocial factors in one convenient volume including Causes of lower limb amputation especially diabetes and ways to prevent further amputation Surgical techniques for lower limb amputation Learning to walk with a prosthesis The unique challenges faced by children and elderly people living with an amputation Exercising and sports with a lower limb prosthesis And much more The outlook of this book is ultimately an optimistic one Well informed knowledgeable individuals with amputations are better able

to take care of themselves and are more effective self advocates This book gives them the tools they need to forge a productive satisfying and high quality life The Management of Lower-extremity Amputations Ernest M. Burgess,Robert Leonard Romano,Joseph H. Zettl,1969 **Prosthetic Restoration and Rehabilitation of the Upper and Lower Extremity** Alicia Davis,Brian Kelly,Mary Catherine Spire,2013-12-19 Prosthetic Restoration and Rehabilitation of the Upper and Lower Extremity is a well illustrated state of the art reference on the science and practice of post amputation care prosthetic restoration and functional rehabilitation designed to maximize patient independence and quality of life Chapters are written by physiatrists prosthetists surgeons and therapists at the University of Michigan clinicians and teachers who work with amputees on a daily basis Clinically oriented it covers both lower and upper extremity restoration and rehabilitation and serves as a handy reference for busy practitioners to support sound clinical decision making Beginning with basic anatomy kinesiology and a recap of surgical decisions principles and post operative care for amputees the book discusses biomechanics clinical assessment prosthetic options how to write a complete and detailed prescription for the prosthesis restoration and management of specific problems by region and rehabilitation programs and strategies Common medical issues such as phantom limb sensation and pain skin problems and sexual and psychological considerations are discussed as well In depth coverage of prosthetic restoration is provided for special populations such as infants children the elderly athletes multi extremity amputees and those who have lost limbs to cancer Chapters are written in expanded outline format for ease of use and feature numerous full color diagrams photos and other illustrations This text will guide physicians trainees and other members of the care team through the fundamentals of restoring function to individuals who have lost limbs or body parts Key Features Provides a state of the art accessible clinical approach to post amputation care prosthetic restoration and functional rehabilitation Covers both upper and lower extremities Addresses prostheses for special populations and sports and recreation Includes boxed clinical pearls at the start of each chapter illustrated quick reference tables and full color photos throughout Supports clinical decision making and addresses practical questions and problems Advises on new requirements for Medicare and Medicaid patients and includes patient education materials and sample prescription forms that can be customized for use in any clinic Outlines important information for returning to the community after amputation **Limb Amputation** R. Ham,L. T. Cotton,2013-12-20 The majority of amputations in the western world today are due to vascular disease Despite the advances in surgical treatment of this disease particularly by reconstruction it is a sad fact that the number of amputations performed in these countries each year for vascular disease is increasing Most of these amputees are elderly and their life expectancy is short so it is important that the treatment and rehabilitation that they receive is informed appropriate efficient and swift to enable them to return successfully to life in the community for their remaining years Management of this group of patients has proved to be successful only if a multidisciplinary team approach is adopted Until recently in the UK this approach sadly has only been implemented by a few centres However with

the publication of the McColl report into the prosthetic and wheelchair service in 1986 interest in the care of the amputee is growing throughout the country This book covers all aspects of amputation from disease and diagnosis to rehabilitation and community discharge with emphasis on the management of the largest group the vascular lower limb amputee A team approach is described and emphasized as being essential for good results and subsequent successful return into the community The role of each of the important disciplines is described in relation to the appropriate part of the rehabilitation phase

Lower Extremity Amputation Linda A. Karacolloff, Carol Stube Hammersley, Frederick J. Schneider, 2005-01-01

Ulcers of the Lower Extremity Ajay K Khanna, Satyendra K Tiwary, 2016-01-14 This book focuses on the clinical evaluation and management of ulcers of the lower limbs There are numerous causes for ulceration in the lower limbs and each variety requires careful clinical evaluation and management approach In 29 chapters written by highly experienced surgeons the book covers prevalence types healing mechanisms clinical evaluation and microbiology of the ulcers followed by detailed review of each ulcer variety Chapters on pyoderma gangrenosum diabetic foot grafts and flaps amputation pain control strategy and documentation of these cases provide a complete coverage from management stand point The book is essential reading not only for general surgeons and vascular surgeons but also has relevance for orthopedic surgeons podiatrists dermatologists and oncologists who manage such cases Also serves as reference guide for post graduate examination
