Proceedings:

Natural Language Processing - NLP 2000 Dimitris N. Christodoulakis, 2003-06-26 This volume contains the papers prepared for the 2nd International Conference on Natural Language Processing held 2-4 June in Patras Greece. The conference program features invited talks and submitted papers covering a wide range of NLP areas: text segmentation, morphological analysis, lexical knowledge acquisition and representation, grammar formalism and syntactic parsing, discourse analysis, language generation, man-machine interaction, machine translation, word sense disambiguation and information extraction. The program committee received 71 abstracts of which unfortunately no more than 50% could be accepted. Every paper was reviewed by at least two reviewers. The fairness of the reviewing process is demonstrated by the broad spread of institutions and countries represented in the accepted papers. So many have contributed to the success of the conference. The primary credit of course goes to the authors and to the invited speakers. By their papers and their inspired talks they established the quality of the conference. Secondly, thanks should go to the referees and to the program committee members who did a thorough and conscientious job. It was not easy to select the papers to be presented. Last but not least, my special thanks to the organizing committee for making this conference happen.

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2003-06-29 CICLing 2001 is the second annual Conference on Intelligent text processing and Computational Linguistics, hence the name CICLing (see www.CICLing.org). It is intended to provide a balanced view of the cutting edge developments in both theoretical foundations of computational linguistics and practice of natural language text processing with its numerous applications. A feature of the CICLing conferences is their wide scope that covers nearly all areas of computational linguistics and all aspects of natural language processing applications. The conference is a forum for dialogue between the specialists working in these two areas. This year our invited speakers were Graeme Hirst (U Toronto, Canada), Sylvain Kahane (U Paris 7, France) and Ruslan Mitkov (U Wolverhampton, UK). They delivered excellent extended lectures and organized vivid discussions. A total of 72 submissions were received, all but very few of surprisingly high quality. After careful reviewing, the Program Committee selected for presentation 53 of them: 41 as full papers and 12 as short papers by 98 authors from 19 countries: Spain 19, authors Japan 15, USA 12, France 9, Mexico 9, each Sweden 6, Canada 6, China 6, Germany 6, Italy 6, Malaysia 6, Russia 6, United Arab Emirates 3, each Argentina 2, Bulgaria 2, The Netherlands 2, Ukraine 2, UK 2, and Uruguay 1, each.
