Natural Remediation Of Environmental Contaminants Its Role In Ecological Risk Abatement And Risk Management:

Natural Remediation of Environmental Contaminants Michael Swindoll, Ralph G. Stahl, Stephen John Ells, 2000

Human and Ecological Risk Assessment Dennis J. Paustenbach, 2017-05-22 Human and Ecological Risk Assessment Theory and Practice assembles the expertise of more than fifty authorities from fifteen different fields forming a comprehensive reference and textbook on risk assessment. Containing two dozen case studies of environmental or human health risk assessments, the text not only presents the theoretical underpinnings of the discipline but also serves as a complete handbook and how to guide for individuals conducting or interpreting risk assessments. In addition, more than 4 000 published papers and books in the field are cited. Editor Dennis Paustenbach has assembled chapters that present the most current methods for conducting hazard identification, dose response and exposure assessment and risk characterization components for risk assessments of any chemical hazard to humans or wildlife, fish, birds and terrestrials. Topics addressed include hazards posed by Air emissions, Radiological hazards, Contaminated soil and foods, Agricultural hazards, Occupational hazards, Consumer products and water, Hazardous waste sites, Contaminated air and water. The bringing together of so many of the world's authorities on these topics plus the comprehensive nature of the text promises to make Human and Ecological Risk Assessment the text against which others will be measured in the coming years. *Ecological Models for Regulatory Risk Assessments of Pesticides* Pernille Thorbek, 2009-11-24 Bringing together more than thirty influential regulators, academics and industry scientists, Ecological Models for Regulatory Risk Assessments of Pesticides: Developing a Strategy for the Future provides a coherent science-based view on ecological modeling for regulatory risk assessments. It discusses the benefits of modeling in the context of r **Population-Level Ecological Risk Assessment** Lawrence W. Barnthouse, Wayne R. Munns Jr., Mary T. Sorensen, 2007-09-25 Most ecological risk assessments consider the risk to individual organisms or organism level attributes. From a management perspective, however, risks to population level attributes and processes are often more relevant. Despite many published calls for population risk assessment and the abundance of available scientific research and technical tool *Sediments Contamination and Sustainable Remediation* Catherine N. Mulligan, Masaharu Fukue, Yoshio Sato, 2009-12-16 Although valuable resources in river basins and other aqueous environments, sediments often receive much less attention from researchers, policymakers and other professionals than other components of the ecosystem. Until now, Highlighting the important role that sediments play in the geoenvironment, *Sediments Contamination and Sustainable Remediation* *Ecological Modeling in Risk Assessment* Robert A. Pastorok, Steven M. Bartell, Scott Ferson, Lev R. Ginzburg, 2016-04-19 Expanding the risk assessment toolbox, this book provides a comprehensive and practical evaluation of specific ecological models for potential use in risk assessment. Ecological Modeling in Risk Assessment: Chemical Effects on Populations, Ecosystems and Landscapes goes beyond current

risk assessment practices for toxic chemicals as applied to individual organism endpoints to describe ecological effects models useful at the population ecosystem and landscape levels The authors demonstrate the utility of a set of ecological effects models eventually improving the ecological relevance of risk assessments and making data collection more cost effective

Environmental Cleanup at Navy Facilities National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Environmental Remediation at Naval Facilities, 2003-08-16 The number of hazardous waste sites across the United States has grown to approximately 217 000 with billions of cubic yards of soil sediment and groundwater plumes requiring remediation Sites contaminated with recalcitrant contaminants or with complex hydrogeological features have proved to be a significant challenge to cleanup on every level technologically financially legally and sociopolitically Like many federal agencies the Navy is a responsible party with a large liability in hazardous waste sites Environmental Cleanup at Navy Facilities applies the concepts of adaptive management to complex high risk hazardous waste sites that are typical of the military EPA and other responsible parties The report suggests ways to make forward progress at sites with recalcitrant contamination that have stalled prior to meeting cleanup goals This encompasses more rigorous data collection and analysis consideration of alternative treatment technologies and comprehensive long term stewardship
