collection     *Pure Intelligence* Melvyn C. Usselman, 2015-05-21 William Hyde Wollaston was born into a large religious and scientifically informed family in 1766 and died sixty two years later as one of the Western world's most highly regarded scientists. With encouragement from his well connected father he studied medicine at Cambridge and began practicing as a physician in the provinces before moving his practice to London in 1797 arriving in the capital about the same time as his illustrious colleagues Humphry Davy and Thomas Young. After a few years in London Wollaston abandoned the vocation he had come to dislike and bravely set out to make his living as a chemical entrepreneur while pursuing his intellectual interests in a wide range of contemporary scientific subjects. He Davy and Young were to become Britain's leading scientific practitioners in the first third of the nineteenth century and their deaths within a six month time span were seen by many as the end of a glorious period of British supremacy in science. In contrast to his two more famous colleagues Wollaston's life was not recorded for posterity in a contemporary biography and his many remarkable scientific commercial instrumental and institutional achievements have fallen into obscurity as a result. This biography is the first book length study of Wollaston his science and the environment in which he thrived.

*Political Creativity* Sakari Hänninen, 2024-01-18 For several decades Antonio Gramsci has been one of the most studied and discussed political theorists however his originality as a political thinker has not yet been fully understood. In this incisive book Sakari Hänninen explores Gramsci's political theory of transformation and posits that he was altogether too creative a thinker to be simply categorized as an adherent of a certain school of thought or tradition.

*Encountering the Pacific in the Age of the Enlightenment* John Gascoigne, 2014-03-20 The Pacific Ocean was the setting for the last great chapter in the convergence of humankind from across the globe. Driven by Enlightenment ideals Europeans sought to extend control to all quarters of the earth through the spread of beliefs the promotion of trade and the acquisition of new knowledge. This book surveys the consequent encounters between European expansionism and the peoples of the Pacific. John Gascoigne weaves together the stories of British French Spanish Dutch and Russian voyages to destinations throughout the Pacific region. In a lively and lucid style he brings to life the idealism adventures and frustrations of a colourful cast of historical figures. Drawing upon a range of fields he explores the complexities of the relationships between European and Pacific peoples. Richly illustrated with historical images and maps this seminal work provides new perspectives on the significance of European contact with the Pacific in the Enlightenment.

Cowles,2020-04-14 The scientific method is just over a hundred years old From debates about the evolution of the human mind to the rise of instrumental reasoning Henry M Cowles shows how the idea of a single scientific method emerged from a turn inward by psychologists that produced powerful epistemological and historical effects that are still with us today      *Books in Print Supplement* ,1985
