## **Naturalism And Normativity Philosophical Issues:**

*Naturalism and Normativity* Mario De Caro, David Macarthur, 2010 Normativity concerns what we ought to think or do and the evaluations we make For scientific naturalists the moral is reached by reducing the normative to the nonnormative For orthodox nonnaturalists the moral is found in the transcendent realm of norms This book challenges both sides of this debate

**Beyond Description** Marcin Milkowski, Konrad Talmont-Kaminski, 2010 The contributors to this volume engage with issues of normativity within naturalised philosophy The issues are critical to naturalism as most traditional notions in philosophy such as knowledge justification or representation are said to involve normativity Some of the contributors pursue the question of the correct place of normativity within a naturalised ontology with emergentist and eliminativist answers offered on neighbouring pages Others seek to justify particular norms within a naturalised framework the more surprising ones including naturalist takes on the a priori and intuitions Finally yet others examine concrete examples of the application of norms within particular epistemic endeavours such as psychopathology and design The overall picture is that of an intimate engagement with issues of normativity on the part of naturalist philosophers questioning some of the fundamentals at the same time as they try to work out many of the details

*Nietzsche, Naturalism, and Normativity* Christopher Janaway, Simon Robertson, 2012-09-27 This volume comprises ten original essays on Nietzsche one of the western canon s most controversial ethical thinkers An international team of experts clarify Nietzsche s own views both critical and positive ethical and meta ethical and connect his philosophical concerns to contemporary debates in and about ethics normativity and value

**The Routledge Companion to Twentieth Century Philosophy** Dermot Moran, 2008-10-27 Featuring twenty two chapters written by leading international scholars this major publication covers all the key figures and movements from Frege to Derrida and philosophy of language to feminist philosophy

*Nietzsche's Renewal of Ancient Ethics* Neil Durrant, 2022-12-29 Nietzsche s Renewal of Ancient Ethics connects different strands in Nietzsche studies to progress a unique interpretation of friendship in his writings Exploring this alternative approach to Nietzsche s ethics through the influence of ancient Greek ideals on his ideas Neil Durrant highlights the importance of contest for developing strong friendships Durrant traces the history of what Nietzsche termed a higher friendship to the ancient Greek ideal of the Homeric hero In this kind of friendship neither person attempts to tyrannize or dominate the other but rather aims to promote the differences between them as a way of stimulating stronger and fiercer contests Through this exchange they discover new heights new standards of excellence both for themselves and for others Durrant shows how the development of this approach to personal relationships relied on Nietzsche rejecting the Christian ideals of love and compassion to build an ethics which incorporated aspects of evolutionary biology into the ancient Homeric ideals he was himself wedded to The resulting higher friendship is strong enough to include not only love and compassion but also enmity and opposition expanding our notion of what is good and ethical in the process

*Normativity and Naturalism in the Philosophy of the*

*Social Sciences* Mark Risjord, 2016-01-22 Normativity and Naturalism in the Social Sciences engages with a central debate within the philosophy of social science whether social scientific explanation necessitates an appeal to norms and if so whether appeals to normativity can be rendered scientific This collection brings together contributions from a diverse group of philosophers who explore a broad but thematically unified set of questions many of which stem from an ongoing debate between Stephen Turner and Joseph Rouse both contributors to this volume on the role of naturalism in the philosophy of the social sciences Informed by recent developments in both philosophy and the social sciences this volume will set the benchmark for contemporary discussions about normativity and naturalism This collection will be relevant to philosophers of social science philosophers interested in the rule following and metaphysics of normativity and theoretically oriented social scientists

**The Selected Writings of Eva Picardi** Eva Picardi, 2020-07-09 Eva Picardi has been one of the most influential Italian analytic philosophers of her generation She taught for forty years at the University of Bologna raising three generations of students This collection of selected writings honors her work confirming Picardi's status as one of the most important Frege scholars of her generation and a leading authority on the philosophy of Donald Davidson Bringing together Picardi's contributions to the history of analytic philosophy it includes her papers on major 20th century figures such as Wittgenstein Quine Davidson Rorty and Brandom She examines their work in comparison with the philosopher Michael Dummett's illuminating contrasts between American Neo pragmatism and Continental philosophy By considering key contributions made by Gadamer and Adorno and contrasting them with Davidson and Rorty's proposals Picardi is able to bridge the Analytic and Continental divide Featuring an introduction by Annalisa Coliva and new translations of previously unpublished papers this collection emphasizes the significance of Picardi's work for a new generation of readers **Oxford**

**Studies in Metaethics 11** Russ Shafer-Landau, 2016-07-28 Oxford Studies in Metaethics is the only publication devoted exclusively to original philosophical work in the foundations of ethics It provides an annual selection of much of the best new scholarship being done in the field Its broad purview includes work being done at the intersections of ethical theory with metaphysics epistemology philosophy of language and philosophy of mind The essays included in the series provide an excellent basis for understanding recent developments in the field those who would like to acquaint themselves with the current state of play in metaethics would do well to start here

**Christian Ethics and Commonsense Morality** Kevin Jung, 2014-11-27 Christian Ethics and Commonsense Morality goes against the grain of various postmodern approaches to morality in contemporary religious ethics In this book Jung seeks to provide a new framework in which the nature of common Christian moral beliefs and practices can be given a new meaning He suggests that once major philosophical assumptions behind postmodern theories of morality are called into question we may look at Christian morality in quite a different light On his account Christian morality is a historical morality insofar as it is rooted in the rich historical traditions of the Christian church Yet this kind of historical dependence does not entail the evidential dependence of all moral beliefs on historical

traditions It is possible to argue for the epistemic autonomy of moral beliefs according to which Christian and other moral beliefs can be justified independently of their historical sources The particularity of Christian morality lies not in its particular historical sources that also function as the grounds of justification but rather in its explanatory and motivational capacity to further articulate the kind of moral knowledge that is readily available to most human beings and to enable people to act upon their moral knowledge

**Returning to Scientific Practice** Xu Zhu, Wu Tong, 2019-05-17 This book is a result from a collective study on philosophy of scientific practice PSP which began around 2002 and still ongoing There is an apparently increasing interest in scientific practice influenced by the historicistic philosophy of science and the sociology of scientific knowledge SSK Prof WU Tong and his research group believe that it is necessary for PSP to turn from the theory dominant position to the practice dominance PSP has also put forward the possibility of reinterpreting the epistemic status of local knowledge in Chinese tradition which provides the most significant motivation to participate this study In this book we have selected three main cases namely Chinese medicine Fengshui and Ethnobotany to examine the effect of PSP The aim of our collective study is not merely on theoretical construction of PSP but also to consider the various applications of PSP especially for re interpreting and demonstrating the variety of local knowledge from traditional China which seems to be a genuine contribution to the international enterprise of philosophy of science particularly made by Chinese scholars

**A Boole Anthology** James Gasser, 2013-11-11 Modern mathematical logic would not exist without the analytical tools first developed by George Boole in *The Mathematical Analysis of Logic* and *The Laws of Thought* The influence of the Boolean school on the development of logic always recognised but long underestimated has recently become a major research topic This collection is the first anthology of works on Boole It contains two works published in 1865 the year of Boole's death but never reprinted as well as several classic studies of recent decades and ten original contributions appearing here for the first time From the programme of the English Algebraic School to Boole's use of operator methods from the problem of interpretability to that of psychologism a full range of issues is covered The Boole Anthology is indispensable to Boole studies and will remain so for years to come

**The Waning of Materialism** Robert C. Koons, George Bealer, 2010-03-25 The case against materialism comprises arguments from conscious experience from the unity and identity of the person from intentionality mental causation and knowledge

**The Ways Things Are** Christian Kanzian, Winfried Löffler, Josef Quitterer, 2013-05-02 This book is a collection of essays in systematic ontology The parts of its title Things and Ways They Are are indicative of two broadly and intensively discussed issues in current ontology namely what categories of entities there are and in what ways they are relevant for our discourses The three sections of the volume correspond to focuses of ontological research Before Ontology is dedicated to conceptual methodological and meta ontological issues Ontology at Work raises general topics of categorial ontology and the final section Ontology in Application discusses questions such as those relating to free will and our conception of the human being The book is a tribute to Edmund Runggaldier on the

occasion of his 65th birthday Its seventeen papers are authored by such distinguished scholars as Lynne Rudder Baker Franz von Kutschera E J Lowe Otto Muck Paul Weingartner Timothy Williamson and many others *The Oxford Handbook of Moral Realism* Paul Bloomfield, David Copp, 2023 Morality seems to play a special role in human life distinct from conventional norms like those of etiquette or simple preferences based on subjective tastes There are various theories of the foundations of morality some of which treat morality as subjective in an important way Moral realism is however a family of theories that take morality to have an objective factual basis such that morality is not up to us and is not under our control The contributions in this Oxford Handbook explore the central ideas and themes constituting moral realism and defend particular views about it **The Cambridge Handbook of Evolutionary Ethics** Michael Ruse, Robert J.

Richards, 2017-08-11 Evolutionary ethics the application of evolutionary ideas to moral thinking and justification began in the nineteenth century with the work of Charles Darwin and Herbert Spencer but was subsequently criticized as an example of the naturalistic fallacy In recent decades however evolutionary ethics has found new support among both the Darwinian and the Spencerian traditions This accessible volume looks at the history of thought about evolutionary ethics as well as current debates in the subject examining first the claims of supporters and then the responses of their critics Topics covered include social Darwinism moral realism and debunking arguments Clearly written and structured the book guides readers through the arguments on both sides and emphasises the continuing relevance of evolutionary theory to our understanding of ethics today **Compassionate Moral Realism** Colin Marshall, 2018 Colin Marshall offers a ground up defense of objective

morality drawing inspiration from a wide range of philosophers including John Locke Arthur Schopenhauer Iris Murdoch Nel Noddings and David Lewis Marshall's core claim is compassion is our capacity to perceive other creatures pains pleasures and desires Non compassionate people are therefore perceptually lacking regardless of how much factual knowledge they might have Marshall argues that people who do have this form of compassion thereby fit a familiar paradigm of moral goodness His argument involves the identification of an epistemic good which Marshall dubs being in touch To be in touch with some property of a thing requires experiencing it in a way that reveals that property that is experiencing it as it is in itself Only compassion Marshall argues lets us be in touch with others motivational mental properties This conclusion about compassion has two important metaethical consequences First it generates an answer to the question Why be moral which has been a central philosophical concern since Plato Second it provides the keystone for a novel form of moral realism This form of moral realism has a distinctive set of virtues it is anti relativist naturalist and able to identify a necessary connection between moral representation and motivation The view also implies that there is an epistemic asymmetry between virtuous and vicious agents according to which only morally good people can fully face reality **Metaphysics and Cognitive**

**Science** Alvin I. Goldman, Brian P. McLaughlin, 2019-03-27 This volume illustrates how the methodology of metaphysics can be enriched with the help of cognitive science Few philosophers nowadays would dispute the relevance of cognitive science

to the metaphysics of mind but this volume mainly concerns the relevance of metaphysics to phenomena that are not themselves mental The volume is thus a departure from standard analytical metaphysics Among the issues to which results from cognitive science are brought to bear are the metaphysics of time of morality of meaning of modality of objects and of natural kinds as well as whether God exists A number of chapters address the enterprise of metaphysics in general In traditional analytical metaphysics intuitions play a prominent role in the construction of and assessment of theories Cognitive science can be brought to bear on the issue of the reliability of intuitions Some chapters point out how results from cognitive science can be deployed to debunk certain intuitions and some point out how results can be deployed to help vindicate certain intuitions Many metaphysicians have taken to heart the moral that physics should be taken into account in addressing certain metaphysical issues The overarching point of the volume is that in many instances beyond the nature of the mind itself cognitive science should also be consulted

**Evolutionary Debunking Arguments** Diego E. Machuca,2022-09-09 Recent years have seen an explosion of interest in evolutionary debunking arguments directed against certain types of belief particularly moral and religious beliefs According to those arguments the evolutionary origins of the cognitive mechanisms that produce the targeted beliefs render these beliefs epistemically unjustified The reason is that natural selection cares for reproduction and survival rather than truth and false beliefs can in principle be as evolutionarily advantageous as true beliefs The present volume brings together fourteen essays that examine evolutionary debunking arguments not only in ethics and philosophy of religion but also in philosophy of mathematics metaphysics and epistemology The essays move forward research on those arguments by shedding fresh light on old problems and proposing new lines of inquiry The book will appeal to scholars and graduate students interested in the possible skeptical implications of evolutionary theory in any of the above domains

**Speech and Morality** Terence Cuneo,2014-08-07 Terence Cuneo develops a novel line of argument for moral realism The argument he defends hinges on the normative theory of speech according to which speech acts are generated by an agent s altering her normative position with regard to her audience gaining rights responsibilities and obligations of certain kinds Some of these rights responsibilities and obligations Cuneo suggests are moral And these moral features are best understood along realist lines in part because they explain how it is that we can speak If this is right a necessary condition of being able to speak is that there are moral rights responsibilities and obligations of a broadly realist sort

Objective Imperatives Ralph C. S. Walker,2022-09-01 Kant held the moral law to be an objective imperative an entity in its own right It carries with it prescriptive force in parallel to other principles of pure reason like those of logic and mathematics Objective imperatives therefore do not derive their authority from any other source such as common consensus or the will of God In Objective Imperatives Ralph C S Walker seeks to show that this is a highly defensible view Kant s Categorical Imperative properly understood is broadly right The key to it is rationality and not universality which functions only as an approximate test Often Kant sets the matter out badly and most of the common objections to him can be shown to

be due to misunderstandings A morality that gives us an objective imperative does appear incompatible with the determinism to which Kant commits himself but Walker argues that this appearance is misleading
