The European Corporation Richard Whittington, Michael Mayer, 2000 This study examines the evolving strategies and structure of large European firms in a comparative and historical context In particular it looks at these in the context of a range of hypotheses on professional management multidivisional structure and diversification associated with Alfred Chandler Companies examined include Daimler Benz Volkswagen BAT Rhone Poulenc Unilever and Elf Aquitaine

The Oxford Handbook of Business History Geoffrey Jones, Jonathan Zeitlin, 2008-01-25 This Handbook provides a state of the art survey of research in business history Business historians study the historical evolution of business systems entrepreneurs and firms as well as their interaction with their political economic and social environment They address issues of central concern to researchers in management studies and business administration as well as economics sociology and political science and to historians They employ a range of qualitative and quantitative methodologies but all share a belief in the importance of understanding change over time The Oxford Handbook of Business History has brought

together leading scholars to provide a comprehensive critical and interdisciplinary examination of business history organized into four parts Approaches and Debates Forms of Business Organization Functions of Enterprise and Enterprise and Society The Handbook shows that business history is a wide ranging and dynamic area of study generating compelling empirical data which has sometimes confirmed and sometimes contested widely held views in management and the social sciences The Oxford Handbook of Business History is a key reference work for scholars and advanced students of Business History and a fascinating resource for social scientists in general Wealth Effects of Intraholding Company Bank Mergers Gary Whalen,1994 **Perspectives on Financial Control** Mahmoud Ezzamel,David Heathfield,2013-12-14 The purpose of this book is to offer a small token in memory of Ken Hilton who died prematurely at the age of 52 in February 1990 The book contains contributions from a number of leading academics some were close colleagues of Ken s at the University of Southampton some have been at other universities but knew Ken fairly well and still some who never met Ken but who knew of him through his work The unifying motivation for all of them however was their immense sense of loss of an extremely proactive and excellent academic Having led the research group on the Southampton Econometric Model project for three years Ken was appointed to the Chair of Financial Control at the University of Southampton in 1970 at that time this was one of only a handful of similar Chairs in the UK Most of Ken s subsequent academic career was devoted to contributing to the study of financial control initially in the private sector and subsequently in the public sector The breadth of his interests was demonstrated by his enviable ability to contribute to the areas of industrial economics accounting and management science We hope therefore that this volume which embraces contributions from leading academics in each of these three fields is a fitting tribute to Ken s work **Agglomeration, Technology and Business Groups** Giulio Cainelli,Donato Iacobucci,2007-01-01 I consider Giulio Cainelli a serious intelligent and promising scholar and Donato Iacobucci s work is very professional he belongs to a school of economics that is highly considered in Italy Giacomo Becattini University of Florence Italy Agglomeration Technology and Business Groups critically reviews the reasons for the creation of business groups and examines their main characteristics It also explores the way in which structural variables influence their internal organization **Handbook of Economic Psychology** W.F. Van Raaij,G.M. van Veldhoven,K.E. Wärneryd,2013-03-09 The idea to publish a Handbook of Economic Psychology came up as a natural consequence of a discussion concerning appropriate reading material for courses in economic psychology The discussion took place a few years ago in the Department of Economic Psychology at Tilburg University The Netherlands It was noted that there was a surprising lack of collections of pertinent readings to say nothing about the lack of textbooks in the English language So the present editors who had been involved in the discussion decided to start working on a Handbook The situation has changed quite a lot since then There are now a number of books internationally available in the English language in economic psychology or behavioral economics The interest in this field of study is expanding quite impressively The Journal of Economic Psychology

is now 1988 in its ninth volume and many other journals are publishing articles in the field The application of psychological theories and methods to economic problems or the study of economic experiences and behavior is variously referred to as economic psychology or behavioral economics While in principle we do not want to overdo the differences between the two we have a feeling that economic psychology has a slightly stronger flavor of psychology than behavioral economics which in its turn seems to be closer to economics Psychologists tend to feel more at home in economic psychology while economists seem to favor behavioral economics

A Global Guide to Human Resource Management Thomas Klikauer, 2022-06-17 A Global Guide to Human Resource Management is a concise HRM introductory text offering a uniquely non region specific approach to people management in international business organisations The book presents an alternative to standard managerial approaches reflecting the perspectives of multiple stakeholders workers trade unions states and governments NGOs to critically evaluate HRM in practice and in so doing enables students to make effective decisions in their own practice wherever their careers take them Its accessibility and concision make it well suited to short courses for non HRM and non business specialists This text covers all major introductory topics for non specialists introducing the concept and purpose of HRM through recruitment people skills designing work promoting health rewarding success and successful and ethical people management This edition includes a new chapter on green HRM Rich with pedagogical features the book includes five case studies per chapter to connect theory with practice It is also supported with a range of instructor materials including online guest lectures general discussion questions a glossary an index and online documentaries that explain how to manage people It is essential reading for students interested in Human Resources and Personnel Management Organisational Behaviour and Development and Workplace Culture

Accounting for Management Control David Otley and Kenneth Merchant Clive Emmanuel, 2013-11-21 Covers all aspects of accounting management for both programmed and non programmed activities At the end of each chapter there is a set of exercises to facilitate understanding of the topics discussed and case studies have been included in the final chapter

Corporate Risk Management Tony Merna, Faisal F. Al-Thani, 2005-07-15 Corporate Risk Management analyses compares and contrast tools and techniques used in risk management at corporate strategic business and project level and develops a risk management mechanism for the sequencing of risk assessment through corporate strategic and project stages of an investment in order to meet the requirements of the 1999 Turnbull report By classifying and categorising risk within these levels readers will learn how to drill down and roll up to any level of the organisational structure establish the risks that each project is most sensitive to and implement the appropriate risk response strategy to the benefit of all stakeholders

Business Groups in the West Asli M. Colpan, Takashi Hikino, 2018-02-15 This volume aims to explore the long term evolution of different varieties of large enterprises in today's developed economies It focuses on the economic institution of business groups and attempts to comprehend the factors behind their rise growth struggle and resilience their behavioral and organizational characteristics

and their roles in national economic development The volume seeks to enhance the scholarly and policy oriented understanding of business groups in developed economies by bringing together state of the art research on the characteristics and contributions of large enterprises in an evolutionary perspective While business groups are a dominant and critical organization model in contemporary emerging economies and have lately attracted much attention in academic circles and business presses their counterparts in developed economies have not been systematically examined This book aims to fill this gap in the literature and is the first scholarly attempt to explore the evolutionary paths and contemporary roles of business groups in developed economies from an internationally comparative perspective In doing so it argues that business groups actually rose to function as a critical factor of industrial dynamics in the context of Second Industrial Revolution in the late nineteenth century They have adapted their characteristic roles and transformed to fit to the changing market and institutional settings As they flexibly co evolve with the environment the volume shows that business groups can remain as a viable organization model in the world s most advanced economies today
