Nature As A Guide Using Nature In Counseling Therapy And Education:

Nature as a Guide Linda Lloyd Nebbe, 1991 This book contains practical activities for teachers counselors and other helping professionals utilizing elements in nature The premise for the utilization of nature therapy is that if people develop an awareness and reverence for life they will also develop self understanding and self respect The first four chapters provide a rationale for nature therapy The therapeutic approaches of nature therapy are defined for instrumental relationship passive cognitive and spiritual therapies The next three chapters explain the approaches to nature therapy which is broken down into animal assisted horticultural and natural environment therapies Each section contains the history research problems evaluation and resources for each therapy The last five chapters form a handbook which contains ways to utilize nature therapy Individual and group techniques are discussed and examples are provided for experiences and activities in the area of nature therapy The experiences are written as lesson plans and are organized into animal horticultural and environmental activities Guidelines are provided for bringing animals into the office or classroom Federal and state laws are described and issues are discussed concerning breeding the office or classroom pet animals used in science projects insect collections white mice hamsters and gerbils rabbits birds cats dogs farm animals and wild animals A sample Humane Society project is included that can be conducted during the summer or after the school day during the school year LLL

Mental Well-Being Corey L.M. Keyes, 2012-11-08 This book provides a new generation of research in which scholars are investigating mental health and human development as not merely the absence of illness or dysfunction but also the presence of subjective well being Subjective well being is a fundamental facet of the quality of life The quality of an individual's life can be assessed externally and objectively or internally and subjectively From an objective standpoint other people measure and judge another's life according to criteria such as wealth or income educational attainment occupational prestige and health status or longevity Nations communities or individuals who are wealthier have more education and live longer are considered to have higher quality of life or personal well being The subjective standpoint emerged during the 1950s as an important alternative to the objective approach to measuring individual's well being Subjectively individuals evaluate their own lives as evaluations made in theory after reviewing summing and weighing the substance of their lives in social context Research has clearly shown that measures of subjective well being which are conceptualized as indicators of mental health or mental well being are factorially distinct from but correlated with measures of symptoms of common mental disorders such as depression Despite countless proclamations that health is not merely the absence of illness there had been little or no empirical research to verify this assumption Research now supports the hypothesis that health is not merely the absence of illness it is also the presence of higher levels of subjective well being In turn there is growing recognition of the personal and social utility of subjective well being both higher levels of hedonic and eudaimonic wellbeing Increased subjective well being has been linked with higher personal and social goods higher business profits more worker productivity greater employee retention increased

protection against mortality increased protection against the onset and increase of physical disability with aging improved cognitive and immune system functioning and increased levels of social capital such as civic responsibility generativity community involvement and volunteering This edited volume brings together for the first time the growing scientific literature on positive mental health that is now being conducted in many countries other than the USA and provides students and scholars with an invaluable source for teaching and for generating new ideas for furthering this important line of research Nature Therapy Yonatan Kaplan, M.D., Petros Levounis, M.D., M.A., 2024-09-10 *Nature as a Guide* Linda Lloyd Nebbe, 1995-01-01 Our human identity and personal fulfillment depend on our relationship to nature Linda Nebbe a practicing elementary school counselor shares knowledge about this natural connection in a form that is useful in working with elementary school children *Nature as a Guide* includes rationale practical application techniques and forty two activities that focus on interaction with animals horticulture and the environment **Resources in Education** , 2000-04

Beyond the Innocence of Childhood: Helping children and adolescents cope with life-threatening illness and dying David Walter Adams, Eleanor J. Deveau, 1995 Death is not a mere possibility but a certainty for all of us Yet today s society unrealistically portrays childhood as a time of unremittant joy and freedom Unfortunately the reality of life may suddenly bring children face to face with tragic circumstances such as the death of their pet the terminal illness of their parent their own struggle with life threatening disease the accidental death of their sibling or the suicide of a friend The gravity of any of these situations takes children beyond the innocence of childhood and plunges them into a world that is frightening and full of uncertainty Unfortunately our perceptions and attitudes toward death do not equip children with the tools to help them cope adequately with such overwhelming experiences Beyond the Innocence of Childhood is a collection of forty chapters which are divided into three separate volumes The overall purpose of this series is to answer the question How do we as educators clinicians other professionals and parents help children and

adolescents deal with threat to their lives dying death and bereavement In this three volume set the editors have brought together a number of well known educators researchers and practitioners who share their knowledge and expertise concerning the care and well being of children and adolescents Rehabilitation with the Aid of a Horse Barbara Teichmann Engel,1997 *The Guide to Play Therapy Documentation and Parent Consultation* Linda E.
