**The Routledge Companion to Landscape Studies** Peter Howard, Ian Thompson, Emma Waterton, Mick Atha, 2013-02-15 Landscape is a vital synergistic concept which opens up ways of thinking about many of the problems which beset our contemporary world such as climate change social alienation environmental degradation loss of biodiversity and destruction of heritage As a concept landscape does not respect disciplinary boundaries Indeed many academic disciplines have found the concept so important it has been used as a qualifier that delineates whole sub disciplines landscape ecology landscape planning landscape archaeology and so forth In other cases landscape studies progress under a broader banner such as heritage studies or cultural geography Yet it does not always mean the same thing in all of these contexts The

Routledge Companion to Landscape Studies offers the first comprehensive attempt to explore research directions into the many uses and meanings of landscape. The Companion contains thirty nine original contributions from leading scholars within the field which have been divided into four parts: Experiencing Landscape, Landscape Culture and Heritage, Landscape Society and Justice, and Design and Planning for Landscape. Topics covered range from phenomenological approaches to landscape to the consideration of landscape as a repository of human culture from ideas of identity and belonging to issues of power and hegemony and from discussions of participatory planning and design to the call for new imaginaries in a time of global and environmental crisis. Each contribution explores the future development of different conceptual and theoretical approaches as well as recent empirical contributions to knowledge and understanding. Collectively they encourage dialogue across disciplinary barriers and reflection upon the implications of research findings for local, national and international policy in relation to landscape. This Companion provides up to date critical reviews of state of the art perspectives across this multifaceted field embracing disciplines such as anthropology, archaeology, cultural studies, geography, landscape planning, landscape architecture, countryside management, forestry, heritage studies, ecology and fine art. It serves as an invaluable point of reference for scholars, researchers and graduate students alike engaging in the field of landscape studies.

Presenting the latest research from a leading team of scholars, *Neoliberalism and Technoscience* will be of interest to scholars of sociology, politics, geography and science and technology studies.

**Ecologies of Grace** Willis Jenkins, 2013-02-12. Christianity struggles to show how living on earth matters for living with God. While people of faith increasingly seek practical ways to respond to the environmental crisis, theology has had difficulty contextualizing the crisis and interpreting the responses. In *Ecologies of Grace*, Willis Jenkins presents a field-shaping introduction to Christian environmental ethics that offers resources for renewing theology. Observing how religious environmental practices often draw on concepts of grace, Jenkins maps the way Christian environmental strategies draw from traditions of salvation as they engage the problems of

environmental ethics He then uses this new map to explore afresh the ecological dimensions of Christian theology Jenkins first shows how Christian ethics uniquely frames environmental issues and then how those approaches both challenge and reinhabit theological traditions He identifies three major strategies for making environmental problems intelligible to Christian moral experience Each one draws on a distinct pattern of grace as it adapts a secular approach to environmental ethics The strategies of ecojustice stewardship and ecological spirituality make environments matter for Christian experience by drawing on patterns of sanctification redemption and deification He then confronts the problems of each of these strategies through critical reappraisals of Thomas Aquinas Karl Barth and Sergei Bulgakov Each represents a soteriological tradition which Jenkins explores as an ecology of grace letting environmental questions guide investigation into how nature becomes significant for Christian experience By being particularly sensitive to the ways in which environmental problems are made intelligible to Christian moral experience Jenkins guides his readers toward a fuller understanding of Christianity and ecology He not only makes sense of the variety of Christian environmental ethics but by showing how environmental issues come to the heart of Christian experience prepares fertile ground for theological renewal
