**Nature Transfigured** John Christie, Sally Shuttleworth, 1989      **Evolution and Imagination in Victorian Children's Literature** Jessica Straley, 2016-06-06 Evolutionary theory sparked numerous speculations about human development and one of the most ardently embraced was the idea that children are animals recapitulating the ascent of the species After Darwin's *Origin of Species* scientific pedagogical and literary works featuring beastly babes and wild children interrogated how our ancestors evolved and what children must do in order to repeat this course to humanity Exploring fictions by Rudyard Kipling Lewis Carroll Frances Hodgson Burnett Charles Kingsley and Margaret Gatty Jessica Straley argues that Victorian children's literature not only adopted this new taxonomy of the animal child but also suggested ways to complete the child's evolution In the midst of debates about elementary education and the rising dominance of the sciences children's authors plotted miniaturized evolutions for their protagonists and readers and more pointedly proposed that the decisive evolutionary leap for both our ancestors and ourselves is the advent of the literary imagination      **Educating the Child in Enlightenment Britain** Jill Shefrin, 2016-12-05 Posing a challenge to more traditional approaches to the history of education this interdisciplinary collection examines the complex web of beliefs and methods by which culture was transmitted to young people in the long eighteenth century Expanding the definition of education exposes the shaky ground on which some historical assumptions rest For example studying conventional pedagogical texts and practices used for girls' home education alongside evidence gleaned from women's diaries and letters suggests domestic settings were the loci for far more rigorous intellectual training than has previously been acknowledged Contributors cast a wide net engaging with debates between private and public education the educational agenda of Hannah More women schoolteachers the role of diplomats in educating boys embarked on the Grand Tour English Jesuit education eighteenth century print culture and education in Ireland the role of the print trades in the use of teaching aids in early nineteenth century infant school classrooms and the rhetoric and reality of children's book use Taken together the essays are an inspiring foray into the rich variety of educational activities in Britain the multitude of cultural and social contexts in which young people were educated and the extent of the differences between principle and practice throughout the period      **'Behind Inverted Commas'** Susanne Stark, 1999-01-01 This text examines the activities of a network of 19th century intellectuals in Britain who were engaged in the rendering of German texts into English It establishes a series of cultural implications of the process of translation in an inter and intra lingual context and explores cross currents between translation and gender studies art history philology historiography and travel writing      **Livingstone's 'lives'** Justin Livingstone, 2014-11-01 David Livingstone the missionary explorer has attracted more commentary than nearly any other Victorian hero Beginning in the years following his death he soon became the subject of a major biographical tradition Yet out of this extensive discourse no unified image of Livingstone emerges Rather he has been represented in diverse ways and in a variety of socio political contexts Until now no one has

explored Livingstone's posthumous reputation in full This book meets the challenge In approaching Livingstone's complex legacy it adopts a metabiographical perspective in other words this book is a biography of biographies Rather than trying to uncover the true nature of the subject metabiography is concerned with the malleability of biographical representation It does not aim to uncover Livingstone's real identity but instead asks what has he been made to mean Crossing disciplinary boundaries Livingstone's lives will interest scholars of imperial history postcolonialism life writing travel writing and Victorian studies *The Oxford History of the Novel in English* John Kucich, Patrick Parrinder, Jenny Bourne Taylor, 2012

This series presents a comprehensive global and up to date history of English language prose fiction and written by a international team of scholars dust jacket Taming Capitalism before its Triumph Koji Yamamoto, 2018-04-20 This study examines the darker side of England's culture of economic improvement between 1640 and 1720 It is often suggested that England in this period grew strikingly confident of its prospect for unlimited growth Indeed merchants inventors and others promised to achieve immense profit and abundance Such flowery promises were then as now prone to perversion however This volume is concerned with the taming of incipient capitalism how a society in the past responded when promises of wealth creation went badly wrong It reveals a history of numerous visible hands taming incipient capitalism a story that Adam Smith and his admirers have long set aside The notion of projecting played a key role in this process Thriving theatre literature and popular culture in the age of Ben Jonson began elaborating on predominantly negative images of entrepreneurs or projectors as people who pursued Crown's and their own profits at the public's expense This study examines how the ensuing public distrust came to shape the negotiation in the subsequent decades over the nature of embryonic capitalism The result is a set of fascinating discoveries By scrutinising greedy projectors the incipient public sphere helped reorient the practices and priorities of entrepreneurs and statesmen away from the most damaging of rent seeking behaviours Far from being a recent response to mainstream capitalism ideas about socially responsible business have long shaped the pursuit of wealth power and profit Taming Capitalism before its Triumph unravels the rich history of broken promises of public service and ensuing public suspicion a story that throws fresh light on England's transition to capitalism especially the emergence of consumer society and the financial revolution towards the end of the seventeenth century

**Uncommon Contexts: Encounters between Science and Literature, 1800-1914** Ben Marsden, Hazel Hutchinson, Ralph O'Connor, 2016-09-12 Britain in the long nineteenth century developed an increasing interest in science of all kinds Whilst poets and novelists took inspiration from technical and scientific innovations those directly engaged in these new disciplines relied on literary techniques to communicate their discoveries to a wider audience The essays in this collection uncover this symbiotic relationship between literature and science at the same time bridging the disciplinary gulf between the history of science and literary studies Specific case studies include the engineering language used by Isambard Kingdom Brunel the role of physiology in the development of the sensation novel and how mass communication made people

traumas and contradictions of the human condition      The Practice of Quixotism S. Gordon,2006-11-13 Using postmodern theory The Practice of Quixotism explores eighteenth century women s texts that use quixote narratives which typically demand that individuals purge their minds of internalized fictions to insist instead that the reality we encounter is inevitably mediated by the texts we have read      **The Ashgate Research Companion to Thomas Hardy** Dr Rosemarie Morgan,2013-04-28 Bringing together eminent Hardy scholars The Ashgate Research Companion to Thomas Hardy offers an overview of Hardy scholarship and suggests new directions in Hardy studies While several collections have surveyed the Hardy landscape no previous volume has been composed specifically for scholars and advanced graduate students This companion is specially designed to aid original research on Hardy and serve as the critical basis for Hardy studies in the new millennium      **A Companion to the Eighteenth-Century English Novel and Culture** Paula R. and writers and oriented their readers relation with the texts She then looks at the various ways in which foreign knowledge was appropriated in the construction of individual social national and continental identities this is done through the study of a number of individual reading experiences and through the analysis of the editions and adaptations of Ackermann's textbooks during the nineteenth century

**Popular Children's Literature in Britain** Julia Briggs, Dennis

Butts, 2016-12-05 The astonishing success of J K Rowling and other contemporary children's authors has demonstrated how passionately children can commit to the books they love But this kind of devotion is not new This timely volume takes up the challenge of assessing the complex interplay of forces that have created the popularity of children's books both today and in the past The essays collected here ask about the meanings and values that have been ascribed to the term popular They consider whether popularity can be imposed or if it must always emerge from children's preferences And they investigate how the Harry Potter phenomenon fits into a repeated cycle of success and decline within the publishing industry Whether examining eighteenth century chapbooks fairy tales science schoolbooks Victorian adventures waif novels or school stories these essays show how historical and publishing contexts are vital in determining which books will succeed and which will fail which bestsellers will endure and which will fade quickly into obscurity As they considering the fiction of Angela Brazil Enid Blyton Roald Dahl and J K Rowling the contributors carefully analyse how authorial talent and cultural contexts combine in often unpredictable ways to generate and sometimes even sustain literary success
