The Outside Child, In and Out of the Book Christine Wilkie-Stibbs,2008-03-25 Christine Wilkie Stibbs juxtaposes the narratives of literary and actual outsider children to explore how Western culture has imagined defined and dealt with various marginalized children whether orphans homeless refugees or victims of abuse

How the Body Shapes the Way We Think Rolf Pfeifer,Josh Bongard,2006-10-27 An exploration of embodied intelligence and its implications points toward a theory of intelligence in general with case studies of intelligent systems in ubiquitous computing business and management human memory and robotics How could the body influence our thinking when it seems obvious that the brain controls the body In *How the Body Shapes the Way We Think* Rolf Pfeifer and Josh Bongard demonstrate that thought is not independent of the body but is tightly constrained and at the same time enabled by it They argue that the kinds of thoughts we are capable of have their foundation in our embodiment in our morphology and the material properties of our bodies This crucial notion of embodiment underlies fundamental changes in the field of artificial intelligence over the past two decades and Pfeifer and Bongard use the basic methodology of artificial intelligence understanding by building to describe their insights If we understand how to design and build intelligent systems they reason we will better understand intelligence in general In accessible nontechnical language and using many examples they introduce the basic concepts by building on recent developments in robotics biology neuroscience and psychology to outline a possible theory of intelligence They illustrate applications of such a theory in ubiquitous computing business and management and the psychology of human memory Embodied intelligence as described by Pfeifer and Bongard has important implications for our understanding of both natural and artificial intelligence

Interdisciplinarity in Entrepreneurship Diego Matricano,2023-06-08 In response to the increasing move by scholars to reference other fields of knowledge in the advancement of entrepreneurship studies this book

offers an interdisciplinary approach to the study of entrepreneurship The author investigates five main issues about entrepreneurial processes the origin of entrepreneurship the purpose to achieve the way decisions are made the creation of entrepreneurial networks and ecosystems Respectively these issues are analysed from new perspectives related to other disciplines such as mythology philosophy mathematics chemistry and biology In this way the book investigates pervading questions about entrepreneurial processes that are still unsolved By adopting this novel interdisciplinary approach the book opens up new avenues of research in entrepreneurship studies

Environmental Change and Human Development Chris Barrow, 2014-04-04 Environmental Change and Human Development focuses on environmental change and human fortunes While there is a large and rapidly expanding literature dealing with how people affect the environment less attention has been given in recent years to how the environment shapes human development In an ever more crowded world there is a need for anticipatory environmental management and a crucial input to this is consideration of the interaction between environment and humans The environment is not as stable benign or controllable as people like to think The world population is vastly larger than it has ever been and is still growing and humans increasingly upset nature through pollution and other activities While modern communications may help environmental managers rapid travel also increases the dispersal of diseases and pests Technological advance and social development is not all beneficial some innovations have the effect of making people more vulnerable to disruption by natural disaster and citizens are often less able to cope with changed conditions than people were in the past Environmental Change and Human Development addresses key issues such as soil degradation natural climatic variations and volcanic activity and provides geography and earth sciences students with an essential introduction to the major debates surrounding this topic

Family, Self, and Human Development Across Cultures Cigdem Kagitcibasi, 2007-03-09 Reflecting author igdem Kagitcibasi's influential work over the last two decades this new edition examines human development the self and the family in a cultural context It challenges the existing assumptions in mainstream western psychology about the nature of individuals The author proposes a new model the Autonomous Related Self which expands on existing theory by demonstrating how culture influences self development The development of competence is examined from a contextual perspective with a view towards global urbanization which is creating increasingly similar lifestyles around the world The implications of this perspective are discussed extensively particularly early intervention policy implications related to promoting human competence in immigration and acculturation Rich in both theory and application each topic is introduced with a historical antecedent and earlier research before current work is discussed This new edition also features a new theoretical perspective that integrates cultural variation with universal human development trajectories in the context of social change globalization and immigration two new chapters on Parenting and the Development of the Autonomous Related Self and Immigration and Acculturation a more student friendly approach with boxed stories summary and main point reviews discussion questions and an extensive bibliography in each chapter and a

comprehensive glossary of all the book's key terms for a quick reference. Intended as a graduate or advanced undergraduate level text for courses addressing cross cultural psychology taught in a variety of departments including developmental, community, family and educational psychology, this comprehensive volume will also appeal to researchers interested in issues of human development in a socio cultural context. *Healing the World's Children* Cynthia Comacchio, Janet Golden, George Weisz, 2008-06-26. In 1990 the UN Convention on the Rights of the Child declared that children's survival, protection, growth and development in good health and with proper nutrition is the essential foundation of human development. Drawing from many disciplines: history, anthropology, demography, art history, disability studies and sociology and across a broad geography, *Healing the World's Children* sheds light on the medical, political and cultural dimensions of the efforts to preserve and protect the lives of our most vulnerable citizens. *How to Defend Humane Ideals* James Robert Flynn, 2000-01-01. One of the principal moral and psychological problems of our time is whether humane ideals can be defended. Loss of faith in the objectivity of ethics has encouraged a sense of hopelessness. The notion that no ideal is better than any other, that a humane commitment has no rational advantage over Nietzsche's contempt for ordinary people, has been accused of leaving our civilization without self confidence or a purpose. James R. Flynn rejects attempts to salvage ethical objectivity as futile and counterproductive. Instead, he uses philosophical analysis to demonstrate the relevance of logic and evidence to moral debate. He then uses modern social science to refute racists, Social Darwinists, Nietzsche and the meritocracy thesis of *The Bell Curve*. Flynn concludes that the great post Enlightenment project, justice for all races and classes, the reduction of inequality and the abolition of privilege, retains its moral dignity and relevance. **Key Studies in Psychology, 5th Edition** Richard Gross, 2007-12-28. *Key Studies in Psychology* 5th edition provides summaries of 40 key studies that have shaped the course of psychology, covering both the classic core studies and more recent contemporary studies. Concise, user friendly and comprehensive, the new edition of this bestselling textbook is ideal for students of psychology at all levels. Before each summary, the Background Context features put each study into a clear theoretical or practical context and explain the aims, hypotheses, methods and design. After each summary, a full Evaluation is provided, focusing on major theoretical and methodological issues, subsequent research and applications, and implications. Each summary is also followed by useful Exercise questions to encourage the student to think critically about methodological, theoretical and ethical features of the study. Full answers to all Exercise questions are also provided in an Appendix. All the classic core studies are covered alongside a number of newer studies which cover topics such as the effects of abortion on young women, adolescent's brains, anorexia nervosa and nurses' understanding of the concept of care. These very recent studies are highly relevant to everyday life, making this text ideal for the study of Applied Psychology. Fully updated and modernised, this brand new edition of *Key Studies in Psychology* is essential reading for Psychology students at all levels. *Developmental Psychology and Early Childhood Education* David Whitebread, 2011-12-01. The importance of high quality early childhood education is now

universally recognised and this quality crucially depends upon the practitioners who work with our young children and their deep understanding of how children develop and learn This book makes a vital contribution to this understanding providing authoritative reviews of key areas of research in developmental psychology and demonstrating how these can inform practice in early years educational settings The book s major theme is the fundamental importance of young children developing as independent self regulating learners It illustrates how good practice is based on four key principles which support and encourage this central aspect of development secure attachment and emotional warmth feelings of control and agency cognitive challenge adults supporting learning and children learning from one another articulation about learning and opportunities for self expression Each chapter includes typical and significant questions which arise in practice related to that area of development an up to date review of key research including insights from observational and experimental work with young children from evolutionary psychology and from neuroscientific studies of the developing brain practical exercises intended to deepen understanding and to inform practice questions for discussion recommended further reading This book provides an invaluable resource for early years students and practitioners by summarizing new research findings and demonstrating how they can be translated into excellent early years practice David Whitebread is Senior Lecturer in Developmental Psychology and Early Years Education in the Faculty of Education University of Cambridge

A Detailed Survey On Religiosity And Paranormal Experiences JACKSAN JUDAN FERNANDES,2020-10-24 This study is about people in their formative years It is about their beliefs and practices It is about their personality and how it relates to their beliefs It involves empirical investigation of 1800 college going men 882 and women 918 with an average age of about 20 years The subjects are predominantly Hindu 85% with 12% Christian and 3% Muslim student attending colleges in Visakhapatnam urban area Data were collected from them using the Myers Briggs Type Indicator MBTI and the two specially developed questionnaires that survey religiosity and paranormal beliefs and experiences Paranormal beliefs and experiences surveyed included sacred as well as secular beliefs experiences and practices While several studies in the West attempted to explore the relationships between personality paranormal beliefs and religious practices and experiences there are hardly any investigations in non Judeo Christian cultures The present study can help by throwing light on the cross cultural relevance of these findings
