Navigation Strategy And Tactics:

Virtual Environments 2000 J.D. Mulder, R. van Liere, 2012-12-06 This book contains the proceedings of the sixth Eurographics Workshop on Virtual Environments. The event took place from June 1 to June 2, 2000, in Amsterdam. We hope that readers will find these proceedings to be valuable not only for virtual environment researchers but also for practitioners developing or using virtual environment applications. We are glad to report that visibility of the workshop continues to expand and that virtual environment researchers and practitioners from all over the world are submitting papers. This year 40 papers and case studies were submitted of which 20 were accepted. In addition, we are glad to see that the focus of the workshop is also expanding. We accepted 6 research papers on evaluation of virtual environments and there was a broad sampling of other topics. We would like to thank all those involved in organizing the symposium. In particular, thanks go to Mieke Brune, who was in charge of the local organization. In addition, we want to thank the international program committee for their excellent yet laborious job in reviewing all submitted papers. The quality of the workshop is a reflection of the quality of the submitted papers and the quality of the reviewing process.
