

Private Sector Cleanup Expenditures And Transactions Costs At 18 Superfund Sites

J Elliott

Private Sector Cleanup Expenditures And Transactions Costs At 18 Superfund Sites:

Private-sector Cleanup Expenditures and Transaction Costs at 18 Superfund Sites Lloyd S. Dixon, Deborah Skoller Drezner, James K. Hammitt, 1993 This report will be of interest to those evaluating Superfund's liability based approach to cleaning up the thousands of abandoned or inactive sites across the U S that are contaminated with hazardous substances

The Total Costs of Cleaning Up Nonfederal Superfund Sites, 1994-03 Analyzes the future costs to the public and private sectors that can be expected under Superfund's current policies Includes glossary of Superfund terms Charts and tables

The Total Costs of Cleaning Up Nonfederal Superfund Sites Perry Beider, 1994

Footing the Bill for Superfund Cleanups Katherine N. Probst, Don Fullerton, Robert E. Litan, 2010-12-01 One of the difficulties associated with Superfund the federal government's program for cleaning up toxic waste sites in the United States is the poor understanding we have about who is actually bearing its costs While it is known that the tax on chemical and petroleum feedstocks raises about 570 million annually for the Superfund Trust Fund and the corporate environmental tax raises another 460 million each year further reliable data are only now becoming available Researchers are beginning to understand how much potentially responsible parties and their insurers are spending on both transaction costs and on site cleanups Unfortunately this is only the first part of the puzzle Ultimately these costs are borne by individuals as consumers of the products or services provided or as share or bond holders employees or managers of the company To date no one has attempted to estimate the distribution of initial costs under the Superfund liability system or examined carefully the indirect effects of the costs of the Superfund program on other industries In this book the authors develop information on who pays the costs and who bears the burden under the current liability scheme in Superfund on a site by site basis They look at short term financial implications of changes in liability and taxes on key sectors affected by Superfund chemicals oil mining wood preserving and commercial property casualty insurers They analyze the incidence of different taxing mechanisms and compare and contrast the financial effects on specific industries of the current Superfund program and of several alternative liability and tax based funding mechanisms available The alternative liability approaches examined include a scenario in which liability is eliminated for all sites created before Superfund was enacted as well as a scenario in which parties are released from liability at sites where municipal and industrial wastes were codisposed Because any change in liability will require a corollary change in trust fund revenues the authors also assess the economic implications of a variety of taxes that could be used to finance the creation of a larger trust fund for site cleanups These include an increase in the corporate environmental tax and the implementation of new taxes such as an excise tax on commercial insurance Don Fullerton is a professor of economics and public policy at Carnegie Mellon H John Heinz III School of Public Policy and Management Robert E Litan is a senior fellow at Brookings and formerly was deputy assistant attorney general in the Antitrust Division of the U S Department of Justice Paul R Portney is vice president and senior fellow at resources for the Future Katherine N Probst is a fellow in the Center for Risk

Management at Resources for the Future *Superfund Reassessment and Reauthorization* United States. Congress. Senate. Committee on Environment and Public Works. Subcommittee on Superfund, Waste Control, and Risk Assessment,1996

Accelerated Cleanup and Environmental Restoration Act United States. Congress. Senate. Committee on Environment and Public Works,1996 **Superfund Reauthorization** United States. Congress. Senate. Committee on Environment and Public Works. Subcommittee on Superfund, Recycling, and Solid Waste Management,1994

Analyzing Superfund Richard L. Revesz,Richard B. Stewart,2016-03-17 Originally published in 1995 Analyzing Superfund outlines the key issues of the superfund reauthorization debate in the United States The Superfund law faced criticism for being wasteful inefficient and expensive These papers sought to shed light on this argument in relation to clean up standards the liability regime transaction costs and natural resource damage This title will be of interest to students of Environmental Studies and professionals **Superfund Reauthorization** United States. Congress. House. Committee on Transportation and Infrastructure. Subcommittee on Water Resources and Environment,1996

Managing Environmental Risk Through Insurance Paul K. Freeman,Howard Kunreuther,2012-12-06 Can insurance be used as a means to obtain compliance with environmental policy Answering this question requires examination of a broad mosaic of academic issues including current systems available for providing compensation and deterrence use of contracts including insurance as substitutes for tort law limitations of regulatory policy making by government agencies pre conditions for creation of insurance products and market mechanisms necessary for insurance to be purchased or sold The purpose of Managing Environmental Risk Through Insurance is to highlight the potential role that insurance and performance standards can play in managing environmental risk Insurance can play a significant role in dealing with one of the most problematic issues facing society today how to compensate for environmental exposures This book analyzes the ability of insurance to play a role in managing environmental risk It begins by outlining the role insurance plays in society in contrast to other societal tools for addressing risk government benefit programs and imposition of involuntary liability using the court system By so doing the book describes the comparative advantages of insurance The book then analyzes the insurability of the risks Finally the book applies the insurability analysis to three concrete environmental examples *Innovations in Ground Water and Soil Cleanup*

National Research Council,Division on Earth and Life Studies,Commission on Geosciences, Environment and Resources,Committee on Innovative Remediation Technologies,1997-10-21 Most books on ground water and soil cleanup address only the technologies themselves not why new technologies are or are not developed Innovations in Ground Water and Soil Cleanup takes a holistic approach to the entire field addressing both the sluggish commercial development of ground water and soil cleanup technologies and the attributes of specific technologies It warns that despite cleanup expenditures of nearly 10 billion a year the technologies remain rudimentary This engaging book focuses on the failure of regulatory policy to link cleanup with the financial interests of the company responsible for the contamination The committee

explores why the market for remediation technology is uniquely lacking in economic drivers and why demand for innovation has been so much weaker than predicted The volume explores how to evaluate the performance of cleanup technologies from the points of view of the public regulators cleanup entrepreneurs and other stakeholders The committee discusses approaches to standardizing performance testing so that choosing a technology for a given site can be more timely and less contentious Following up on *Alternatives for Ground Water Cleanup* NRC 1994 this sequel presents the state of the art in the cleanup of various types of ground water and soil contaminants Strategies for making valid cost comparisons also are reviewed

Economics and Liability for Environmental Problems Kathleen Segerson, 2018-01-12 This title was first published in 2002 This convenient reference brings together notable contributions examining all aspects of the liability for environmental accidents Articles included in the Part I of this volume examine the role of liability as a policy instrument and provide detailed examinations of the incentive effects created by the imposition of liability ie Bankruptcy litigation costs delegation of responsibility and insurance Those in Part II study specific environmental issues such as hazardous waste disposal and oil spills The International Library of Environmental Economics and Policy explores the influence of economics on the development of environmental and natural resource policy In a series of twenty five volumes the most significant journal essays in key areas of the contemporary environmental and resource policy are collected This convenient reference brings together the notable contributions examining all aspects of the liability for environmental accidents

Lapham-Hickey Steel Corporation V. Protection Mutual Insurance Company , 1994 *H.R. 3800, the Superfund Reform Act of 1994, and Issues Related to Reauthorization of the Federal Superfund Program* United States. Congress. House. Committee on Public Works and Transportation. Subcommittee on Water Resources and Environment, 1994 *Breaking the Environmental Policy Gridlock* , The contributions to this volume demonstrate how the principles of fiscal responsibility and individual accountability that have been applied to economic and social policies essentially free market principles can be applied successfully to environmental policy The authors offer ten commonsense reforms as a starting point all based on the compelling arguments that a new system of positive incentives can get us more environmental quality at lower cost These reforms include land lease programs for nontraditional commodity production long term transferable land permits landowner compensation for regulated endangered species property and performance based as opposed to technology based water and air pollution laws

Costs of Inaction on Key Environmental Challenges OECD, 2008-09-19 This report provides introductory perspectives on the costs of inaction on key environmental challenges and discusses some of the future problems likely to be encountered in this very complex area EPA strategic plan 20032008 direction for the future. ,

Lawyers, Lawsuits, and Legal Rights Thomas F. Burke, 2002 Burke drills deep into America s unique culture of litigation and is rewarded with a powerful insight it is not the public or even lawyers that are so darn litigious but American law itself This meticulous dispassionate book stands not only to advance the debate but I hope to reshape it Jonathan Rauch author of

Government's End Why Washington Stopped Working Lawyers Lawsuits and Legal Rights is a fascinating study of the American penchant for public policies that rely on lawsuits to get things done Burke's analysis is insightful and original This book compellingly shows that litigious policies have deep roots in our Constitution culture and politics Charles Epp author of The Rights Revolution Lawyers Activists and Supreme Courts in Comparative Perspective Burke's authoritative book demonstrates that the highly litigious American system is not an isolated anomaly but in fact fits in with deeply rooted elements of American political culture Where citizens of other countries rely on expert or bureaucratic judgment to resolve disputes Americans turn to the courts Equally novel and compelling Lawyers Lawsuits and Legal Rights marshals an impressive set of evidence and delivers a refreshingly well written look at the state of American litigation Frank R Baumgartner co author of Agendas and Instability in American Politics

Environmental Regulation Through Financial Organisations: Comparative Perspectives on the Industrialised Nations Benjamin Richardson, 2002-02-13 This book takes a comparative perspective of practice in the European Union North America Japan and Australasia arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector This sector plays a crucial role in creating the financial conditions that allow much economic development to proceed Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector In terms of specific reforms the book focuses on the role of corporate environmental reporting economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector Beyond the focus on the financial services sector the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental governance

Fixing Superfund Lloyd S. Dixon, 1994 Focuses on the possible effect of the proposed Superfund Reform Act of 1994 on transaction costs resulting not from cleanup but from assigning liability for cleanup among the various parties
