Privatisation, Politics, and Economic Performance in Hungary Zoltan Antal-Mokos, 1998-02-05
Why do some privatisations apparently fail to produce expected positive results? Economic theory tells us that privatisation should improve efficiency but this book originally published in 1998 suggests that political bargaining in the process of privatisation works against the results we expect to achieve. To gain a better understanding of what privatisation is really about power at a firm level needs to be understood. Privatisation is a gradually unfolding evolutionary process often with defective corporate governance. Politicking can take priority over performance with the result that efficiency is ignored and profitability is affected. This is a comprehensive book on privatisation which focuses on micro level behavioural issues and it uses exceptionally rich case evidence to illustrate that privatisation is more about politics than performance.

Different Strategies of Transition to a Market Economy Marek Dąbrowski, 1996
Privatizing Eastern Europe J.M. Van Brabant, 2012-12-06
This volume is meant to be a modest contribution to the ongoing debate about the transitions away from the administrative planning environment typical of the former communist regimes. The central subject matter is a fairly special one namely the privatization of these economies together with the restoration and effective monitoring of property rights. These are paramount tasks of the ongoing transformations once progress toward political democracy is secured. Though I would not allot divestment of existing state owned assets the kind of pivotal importance that some observers reserve for it changing rules on the utilization of these assets is evidently at the core of what the transition toward market based economic systems should be all about. Rather than examining the entire range of issues that surround the controversy on privatization this volume is primarily concerned with the economics of taking the state out of the decision making about existing assets. Among the several aspects of this discussion three stand out. One is the establishment of clear property rights. This is fundamental to

minimize transaction costs in an environment where decisions will increasingly be taken by independent economic agents acting on their own account

Second I look only incidentally at the various angles of creating capital markets particularly for existing assets in these economies

Managing In Emerging Market Economies Daniel S Fogel, 2019-03-08 Since 1989 east central Europe has plunged headlong into reform efforts and firms large and small have been forced almost overnight to adapt to the demands of a market economy This book of case studies on business development in the Czech and Slovak Republics illustrates how various industries and specific companies are responding to the challenge

Privatisation Pamela Wyeth, 1994 The Politics of Equity Finance in Emerging Markets Department of Political Science Case Western Reserve University Kathryn C. Lavelle Professor, 2004-09-24 Emerging market stock issuance relative to GDP rose in the late twentieth century to levels that roughly matched that of advanced industrial markets Nonetheless the connection between owning shares of emerging market stock and the ability to influence the management of these firms remains fundamentally different from the analogous institutional connection that has evolved in industrial markets The reasons for the differences in emerging markets are both historical and political in nature That is local equity markets have had the objective of providing for some degree of local ownership and control of large economic entities since the late nineteenth century However local markets have operated under different global political structures since that time ranging from imperialism to world wars to sovereign developmental states to neo liberal states Shares issued under these different structures have been reconfigured over time resulting in a lack of convergence along either the Anglo American or Continental models of corporate governance The author uses a political science paradigm to explain the growth of emerging equity markets She departs from conventional economic explanations and examines politics at the micro level of large issues of emerging market stock The second half of the book presents case studies dealing with emerging market countries in Latin America Asia Russia and Eastern Europe Africa and the Middle East The case studies connect the regional state and firm levels to detail the multiple ownership and control arrangements and to dispel the notion that mere quantitative growth of these markets will lead to a convergence in financial institutional structures along the lines of the industrial core of the world economy

Privatization, Corporate Governance and the Emergence of Markets E. Rosenbaum, F. Bönker, H. Wagener, 2000-03-23 The volume focuses on privatisation in transition countries addressing issues ranging from corporate governance to the relationship between privatisation and the emergence of markets from a multi disciplinary perspective The contributors investigate both the theoretical groundwork of privatisation and enterprise restructuring as well as recent empirical evidence The contributions show that changes in ownership titles are but one part of the story being closely interwoven as they are with the transformation of corporate governance enterprise restructuring network transformation and the emergence of markets

Havrylyshyn, Donal McGettigan, 1999-09-06
The authors view is that any privatisation is better than none regardless of whether a stable competitive environment has been established first However private companies started from scratch perform best followed by newly privatised firms run by outsiders either local or foreign Privatised companies dominated by insiders do less well but even they regularly outperform state enterprises Without an appropriate market environment though managers may spend more time lobbying the government for support than undertaking painful restructuring
