V. RAMANADHAM.,1993 **Privatization** John R. Nellis,Mary M. Shirley,1992-01-01 Governance as defined by the World Bank in its 1992 report Governance and Development is the manner in which power is exercised in the management of a

country's economic and social resources for development. The report deemed it is within the Bank's mandate to focus on the following: the process by which authority is exercised in the management of a country's economic and social resources; the capacity of governments to design, formulate and implement policies and discharge functions. Also available: *Governance: The World Bank's Experience* ISBN 0 8213 2804 2 Stock No 12804 Over-stating the Arab State Nazih N. Ayubi, 1996-12-31. The author's objective within this book is to place the Arab world within a theoretical and comparative framework that avoids both orientalist and fundamentalist insistence on the utter peculiarity and uniqueness of the region. The book focuses in detail on eight Arab countries. *New Political Entities in Public and Private International Law* Amos Shapira, Mala Tabory, 1999-03-01. New political entities usually come into being in the midst of political wrangling, often accompanied by security problems and not infrequently violence. This book, taking the Israeli-Palestinian conflict as its starting point, goes on to deal with the general problems of new entities, including such core concepts as sovereignty, autonomy and legal personality. In exploring human rights issues, the complex notions of nationality and minority rights are examined. On a more practical level, several authors inquire into issues of legal assistance in civil and criminal matters, security arrangements, fiscal and monetary policies, foreign investment guarantees, economic privatization and transboundary water pollution. On many of these topics, German and European legal experience is introduced to shed a useful comparative light. Altogether, this volume represents an attempt to provide a primer for those responsible for or interested in the various aspects of new political entities at the end of the second millennium. Handbook of Comparative and Development Public Administration Ali Farazmand, 2019-02-21. With contributions from nearly 80 international experts, this comprehensive resource covers diverse issues, aspects and features of public administration and policy around the world. It focuses on bureaucracy and bureaucratic politics in developing and industrialized countries, and emphasizes administrative performance and policy implementation as well as political system maintenance and regime enhancement. The book covers the history of public administration and bureaucracy in Persia, Greece, Rome and Byzantium, and among the Aztecs, Incas and Mayas; public administration in small island states, Eastern Europe, and ethics and other contemporary issues in public administration. *Bank Lending for Divestiture* Sunita Kikeri, 1990. Divestiture, often used as a synonym, is only one aspect of privatization. Bank involvement has been timely and supportive, but experience indicates that the design and implementation of divestiture are complex and time-consuming due to a web of contextual and practical factors. , Management and International Business Issues in Jordan Kip Becker, Hamed El-Said, 2013-01-11. The Challenges of Privatization Bernardo Bortolotti, Domenico

Siniscalco, 2004-03-11. From 1997 to 2001 more than 4 000 privatization operations have been carried out in more than 100 countries bringing in government revenues of over 1 362 billion dollars. The phenomenon which grew exponentially at the end of the 1990s and then abruptly slowed down had dramatic consequences on the performance of state owned enterprises and a significant impact on industrialized countries as well as emerging and less developed economies. Yet there have been surprisingly few attempts to provide a systematic empirical account of the privatization process at the worldwide level. Why do governments privatize? Why do some countries accomplish large scale privatization programmes and others never privatize at all? Is privatization a trend or a cycle? Furthermore how do governments privatize? Do governments really transfer ownership and control of state owned enterprises or does private ownership tend to coexist with public control? This book provides some answers to these important questions, trying to test research hypotheses set forth by the recent economic theory of privatization. Comprehensive cross country empirical analyses carried out over a period of more than twenty years are used

in the book to show that privatization has taken place all over the world sometimes spontaneously more often under the pressure of economic and budgetary constraints Several of the goals of the privatization have been met but despite proclamations and programmes only a small minority of countries has carried out a genuine privatization process completely transferring ownership of state owned enterprises to the private sector A lack of political will is to some extent at the root of this reluctance However this reluctance can be traced back partly to structural factors that would make an orderly privatization difficult such as the absence of developed capital markets appropriate regulation and suitable institutions

Development, Change, and Gender in Cairo Diane Singerman, Homa Hoodfar, 1996 The authors of these rich ethnographic essays demonstrate that the Egyptian household plays a crucial if largely overlooked role into the dynamics of political economic and social change While Western social scientists have assumed that employment outside the home improves women's autonomy and economic status economic liberalization in Egypt is shown here to have worsened the economic situation of women and undermined their authority within the household The collection explains why such everyday issues as unemployment government subsidies gender relations housing political participation educational mobility and the standard of living have become increasingly politicized at the household level a development that has direct implications in the context of Islamist challenges to the state
