Maximum Entropy and Bayesian Methods Garching, Germany 1998 Wolfgang von der Linden, Volker Dose, Rainer Fischer, Roland Preuss, 2012-12-06 In 1978 Edwin T Jaynes and Myron Tribus initiated a series of workshops to exchange ideas and recent developments in technical aspects and applications of Bayesian probability theory The first workshop was held at the University of Wyoming in 1981 organized by C R Smith and W T Grandy Due to its success the workshop was held annually during the last 18 years Over the years the emphasis of the workshop shifted gradually from fundamental concepts of Bayesian probability theory to increasingly realistic and challenging applications The 18th international workshop on Maximum Entropy and Bayesian Methods was held in Garching Munich Germany 27-31 July 1998 Opening lectures by G Larry Bretthorst and by Myron Tribus were dedicated to one of the pioneers of Bayesian probability theory who died on the 30 of April 1998 Edwin Thompson Jaynes Jaynes revealed and advocated the correct meaning of probability as the state of knowledge rather than a physical property This interpretation allowed him to unravel longstanding mysteries and paradoxes Bayesian probability theory the logic of science as E T Jaynes called it provides the framework to make the best possible scientific inference given all available experimental and theoretical information We gratefully acknowledge the efforts of Tribus and Bretthorst in commemorating the outstanding contributions of E T Jaynes to the development of probability theory

Techniques for Nuclear and Particle Physics Experiments William R. Leo, 2012-12-06 Not quite six years have passed since the appearance of the first edition of this book This is not a long period Yet the rapid pace of scientific and technological development today is such that any book on experimental technique must be wary of becoming obsolete in some way or another even in such a short span of time Thus when the publisher Springer Verlag informed me of the need for a new printing of this book I decided it was an opportune moment to update some of the chapters as well as to include some new material The result is this second edition The most notable changes have been in Chapters 2 and 3 In the latter which concerns radiation protection most of the sections have been rewritten to take into account the new recommendations from the International Commission on Radiation Protection the

most important of which are the new dose limits for exposure to ionizing radiation In addition emphasis has now been put on the use of SI units in dosimetry i e the Gray and Sievert which have now become standard
