Zone L. Neil Smith, 2025-06-25 In the North American Confederacy People are free really free Free to do as they please whether it be starting a business running for elected office or taking target practice in the back forty There's not a whole lot of government nor is there a lot of crime because everyone who wants to carries a gun and isn't afraid to use it But someone has bombed the Endicott Building killing hundreds of people and Win Bear the only licensed detective in the confederacy has to find out who did this dastardly deed and why Because whoever did it has already shown their willingness to commit more terrorist acts no matter how many people are hurt And that can't go on or soon the confederacy will be just as the bad old United States and that is something they want to avoid at all costs At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied *Space, Time, and Infinity* Brian M. J. Neil Shulman, Joseph Neil Schulman, 1994-12 Did you know that every 13 seconds one of America's 70 million gun owners uses a firearm in defense against a criminal That American women use handguns 416 times a day in defense against rapists which is a dozen times more often than rapists use a gun That a gun kept in the home for protection is 216 times as likely to be used in defense against a criminal than it is to cause the death of an innocent victim in that household These are just a few of the surprises this book has in store for anyone whose belief in gun control is based on TV news or popular magazines Award winning novelist screenwriter and journalist J Neil Schulman challenges the misinformation that pundits ranging from

network anchors to ill informed doctors are promoting about guns Especially for the reader who doesn't own a gun and has never even considered buying one **Stopping Power** should be an eye opener Science Fiction and the Dismal Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-11-27 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject Neoliberal Hegemony Dieter Plehwe, Bernhard J. A Walpen, Gisela Neunhöffer, 2007-05-07 Neoliberalism is fast becoming the dominant ideology of our age yet politicians businessmen and academics rarely identify themselves with it and even political forces critical of it continue to carry out neoliberal policies around the globe How can we make sense of this paradox Who actually are the neoliberals This is the first explanation of neoliberal hegemony which systematically considers and analyzes the networks and organizations of around 1 000 self conscious neoliberal intellectuals organized in the Mont Plerin Society This book challenges simplistic understandings of neoliberalism It underlines the variety of neoliberal schools of thought the various approaches of its proponents in the fight for hegemony in research and policy development political and communication efforts and the well funded well coordinated and highly effective new types of knowledge organizations generated by the neoliberal movement partisan think tanks It also closes an important gap in the growing literature on private authority presenting new perspectives on transnational civil society formation processes This fascinating new book will be of great interest to students of international relations political economy globalization and politics **Brave New Worlds** John Joseph Adams, 2012-12-01 You are being watched Your every movement is being tracked your every word recorded Your spouse may be an informer your children may be listening at your door your best friend may be a member of the secret police You are alone among thousands among great crowds of the brainwashed the well behaved the loyal Productivity has never been higher the media blares and the army is ever triumphant One wrong move one slip up and you may find yourself disappeared swallowed up by a monstrous bureaucracy vanished into a shadowy labyrinth of interrogation chambers show trials and secret prisons from which no one ever escapes Welcome to the world of the dystopia a world of government and society gone horribly
