Uncertainty, Modeling, and Decision Making in Geotechnics Kok-Kwang Phoon,Takayuki Shuku,Jianye Ching,2023-12-11 Uncertainty Modeling and Decision Making in Geotechnics shows how uncertainty quantification and numerical modeling can complement each other to enhance decision making in geotechnical practice filling a critical gap in guiding practitioners to address uncertainties directly The book helps practitioners acquire a working knowledge of geotechnical risk and reliability methods and guides them to use these methods wisely in conjunction with data and numerical modeling In particular it provides guidance on the selection of realistic statistics and a cost effective accessible method to address different design objectives and for different problem settings and illustrates the value of this to decision making using realistic examples Bringing together statistical characterization reliability analysis reliability based design probabilistic inverse analysis and physical insights drawn from case studies this reference guide from an international team of experts offers an excellent resource for state of the practice uncertainty informed geotechnical design for specialist practitioners and the research community

Reliability of Geotechnical Structures in ISO2394 K.K. Phoon,J.V. Retief,2016-11-25 The latest 4th edition of the international standard on the principles of reliability for load bearing structures ISO2394 2015 includes a new Annex D dedicated to the reliability of geotechnical structures The emphasis in Annex D is to identify and characterize critical elements of the geotechnical reliability based design process This book contains a wealth of data and information to assist geotechnical engineers with the implementation of semi probabilistic or full probabilistic design approaches within the context of established geotechnical knowledge principles and experience The introduction to the book presents an overview on how reliability can play a complementary role within prevailing norms in geotechnical practice to address situations where some measured data and or past experience exist for limited site specific data to be supplemented by both objective regional data and subjective judgment derived from comparable sites elsewhere The principles of reliability as presented in ISO2394 2015 provides the common basis for harmonization of structural and geotechnical design The balance of the chapters describes the uncertainty representation of
