Current Topics in Veterinary Medicine and Animal Science - V.10 - Problem of Dark-Cutting in Beef

Commission of the European Communities. Directorate-General for Scientific and Technical Information and Information Management, P.V. Tarrant, D.E. Hood, 1981 The Problem of Dark-Cutting in Beef D.E. Hood, P.V. Tarrant, 2012-12-06 This publication contains the proceedings of a seminar The problems of dark cutting in beef held by the Commission of the European Communities CEC at the Commission in Brussels on 7 and 8 October 1980 As part of the CEC programme of coordination of agricultural research this meeting was organised in the framework of the beef and animal welfare activities by Dr D E Hood and Dr P V Tarrant Meat Research Department An Faras Taluntais Dunsinea Castleknock Dublin Ireland The proceedings edited by the organisers assisted by Janssen Services 33a High Street Chislehurst Kent UK provide an authoritative text book on this important aspect of meat technology Reduction of pre slaughter stress and improvement in carcass and meat quality is becoming increasingly important in the international meat trade This results in particular from growing consumer concern about the welfare of meat animals during the pre slaughter period and from specific meat packaging and marketing requirements Technical development of the beef processing industry is dependent on a uniformly high level of meat quality in the raw material *Cattle Behaviour and Welfare* Clive Phillips, 2008-04-15 Cattle are one of our major domesticated animals a higher mammal with complex mental and physical needs The benefit of a knowledge of cattle behaviour means veterinarians and stockpeople can recognise abnormal behaviour signs for disease diagnosis and indication of an inadequate environment This book replaces the book *Cattle Behaviour* written by the same author and published by Farming Press in 1993 The text has been revised and updated and four new chapters on cattle welfare have been added The main interest of many reading a book on behaviour is its relation to the welfare of the species so the combination of welfare and behaviour is a logical one *Meat Quality* PhD, Wieslaw Przybylski, PhD, David Hopkins, 2015-10-15 One of the biggest challenges faced by meat producers today is the requirement to improve the quality of meat while maintaining focus on efficiency and higher yields Numerous studies have shown that consumers are willing to pay premiums for meat products with guaranteed eating quality This book examines the complicated multistep process of production *Evaluation and Control of Meat Quality in Pigs* P.V. Tarrant, G. Eikelenboom, G. Monin, 2012-12-06 A Seminar in the CEC Agricultural Research Programme held in Dublin Ireland November 21 22 1985 Sponsored by the Commission of the European Communities Directorate General for Agriculture Division for the Coordination of Agricultural Research

Journal of Animal Science ,1985 *New Zealand Journal of Agricultural Research* ,1983 Laboratory Diagnosis in Neonatal Calf and Pig Diarrhoea Peter W. de Leeuw, P.A.M. Guinee, 2012-12-06 In recent years several new infectious agents have been associated with neonatal diarrhoea in both calves and pigs Furthermore important additional information has

become available as regards enterotoxigenic *Escherichia coli* infections in both species Although still much has to be learned it is likely that in many field cases different agents act in concert Therefore an integrated approach to the problem of neonatal diarrhoea appears to be necessary particularly in the field research Such an approach requires a series of diagnostic techniques The purpose of this meeting was to bring together a limited number of scientists that are actively involved in neonatal diarrhoea research in order to discuss present knowledge and to produce proceedings containing review articles new developments and laboratory manuals of relevant diagnostic techniques x This publication constitutes a collection of scientific papers and laboratory manuals on diagnostic techniques for enteropathogenic agents in neonatal diarrhoea in calves and pigs presented and discussed during a workshop in the EEC Programme of Coordination of Agricultural Research on Protection of the Young Animal against Perinatal Diseases held at the Central Veterinary Institute Department of Virology Lelystad the Netherlands June 3-5 1980

The Welfare of Pigs W. Sybesma, 2013-04-17 In Europe at the present time there is a growing concern about the welfare of animals kept for production purpose Technical advancements make it possible to produce more and more efficiently However the basic requirements for animal well being are not always taken into account partly because they need to be defined more precisely in order to be able to implement them In the meeting on the welfare of pigs organised under the supervision of the Commission of the European Communities Directorate General for Agriculture Division for the Coordination of Agricultural Research scientists from all over Western Europe brought together relevant experimental data of physiological veterinary ethological and economic origin for a multidisciplinary discussion on this subject The results of research studies were also reviewed in the light of possible practical applications and future research The meeting was a fruitful first step in bringing together different opinions in order to arrive at a universally acceptable common solution for modern pig production

Advances in the Control of Theileriosis A.D. Irvin, M.P. Cunningham, A.S. Young, 2012-12-06

Approximately five years have elapsed since the Conference on Tick borne Diseases and their Vectors Wilde 1978 University of Edinburgh was held at the Centre for Tropical Veterinary Medicine in Edinburgh Theileriosis was one of the main topics at that Conference and some 20 scientific presentations were given Also in the same year a Workshop on Theileriosis was held at the Kenyatta Conference Centre in Nairobi Henson Campbell 1977 IDRC Ottawa Both of these meetings provided a valuable updating of theilerial diseases and the Proceedings have been a constant source of reference for scientists in the

ensuing years The meetings played a significant role in setting the scene for a number of important advances which have been made since then In February of this year attention was focused on these advances when nearly 200 scientists from over 30 countries were assembled at the International Laboratory for Research on Animal Diseases in Nairobi for the international conference on Advances in the Control of Theileriosis The interest and concern shown in this subject has now grown to the extent that more than 70 scientific presentations were given over the course of a very busy week An important facet of the Conference was the attention given to the control of Theileriosis since this must be the ultimate aim of all those involved with the disease Control will be difficult **Housing, Husbandry, and Welfare of Beef Cattle** D'Anna J. Farm Animal Welfare, 1979-March 1987 Charles N. Bebee,1987 *Indicators of milk and beef quality* J.F. Hocquette,S. Gigli,2023-08-28 The farming and agri food sectors are faced with an increasing demand by consumers for high quality products The current major questions are thus how to define quality and how to increase the quality of animal products to satisfy these new requirements This is the reason why the Cattle Commission of the European Association of Animal Production EAAP organised a specific session on this topic at its Annual Meeting which was held in Bled Slovenia in September 2004 This session dealt with the manipulation and evaluation of bovine milk and meat composition and quality with various indicators commercial physical biochemical molecular or other These indicators are any method biological trait or physical property which may be useful to predict a quality trait Quality includes sensory traits nutritional properties of products their ability to be processed and also any consideration about traceability genetic geographic or nutritional traceability Thus the full spectrum of quality attributes are discussed Indicators may also be considered as predictors In this respect contributors discussed the detection early in life of the ability of animals to produce meat or milk of high quality Indicators may also be useful for consumers when they buy meat or milk as official or commercial signs of quality All the review papers and the short communications which were presented in this session will be in this EAAP publication entitled Indicators of milk and beef quality Additional papers either presented in 2003 in the EAAP Annual Meeting or from invited authors were added to complete the publication **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1982 Quick Bibliography Series ,1976 **Proceedings of a Deer Course for Veterinarians** New Zealand Veterinary Association.
