

# Group Decision Making and Problem Solving

When confronted with a complex problem or one that affects many people, organizations usually form a group to study the problem and make decisions that lead to a solution. Group decision making and participatory management are key facets of the Saudi Vision 2030. Today, many companies use team-based approaches for organizational tasks. Your task can be complicated or enhanced by group dynamics. This unit introduces you to the basics of group dynamics and the ways teams can work together effectively to solve problems.  **Case** You have been working with Omar, the vice president of finance at a travel company, to solve business problems for the company. Omar suspects that the company's future financial health depends on expanding its services to corporate travelers. He talks to company employees who were members of other problem-solving groups and asks them to join a new team exploring business travel services. Omar asks you to be a member of the new team.

## LEARNING OBJECTIVES

Once you have completed this chapter, you should be able to:

- 1 Explain group dynamics
- 2 Evolve from a group to a team
- 3 Use divergent thinking
- 4 Use convergent thinking
- 5 Reach closure
- 6 Build sustainable agreements
