Basic Concepts of Computer

Computer is an electronic device which is used to store the data, as per given instructions it gives results quickly and accurately.

- ❖ Data : Data is a set gathered of informations.
- ❖ Information : Proper collection of the data is called information.

Characteristics of Computer

1. Speed : As you know computer can work very fast. It takes only few seconds for calculations, then we talk hours or days. You will be surprised to know that computer can perform millions (1,000,000) of instructions and even more per second. Therefore, we determine the speed of computer in terms of microsecond.

2. Accuracy : The degree of accuracy of computer is very high and every calculation is performed with the same accuracy. The accuracy level is 7, determined on the basis of design of computer. The errors in computer are due to human and hardware data.

3. Diligence : A computer is free from mistakes, lack of concentration, fatigue, etc. If you work for hours without creating any error, if millions of calculations are to be performed, a computer will perform every calculation with the same accuracy. That is the capability of computer's feature being a robot type of work.

4. Versatility : It means the capacity to perform completely different type of work. You may use your computer to prepare payroll slips. Next moment you may use it for inventory management or for preparing election rolls.

5. Power of Remembrance : Computer has the power of storing any amount of information or data. Any information can be stored and modified as long as you require it. For any quantity of power, it depends entirely upon your hard-ware data you want to store in a computer and when to use or retrieve those data.

6. No IQ : Computer is a dumb machine and it cannot do any work without instructions from the user. It performs the instructions at tremendous speed and with accuracy. It is you to decide what you want to do and in what sequence. Not a computer cannot take its own decisions as you can.

7. Storage : The Computer has an in-built memory where it can store a large amount of data. You can also store data in secondary storage devices such as floppy, which can be large capacity your computer and can be connected to other computers.
