Problem Of The Essential Indexical And Other Essays:

The Problem of the Essential Indexical John Perry, 1993 A collection of twelve essays by John Perry and two essays he co-authored this book deals with various problems related to self locating beliefs the sorts of beliefs one expresses with indexicals and demonstratives like I and this Postscripts have been added to a number of the essays discussing criticisms by authors such as Gareth Evans and Robert Stalnaker Included with such well known essays as Frege on Demonstratives The Problem of the Essential Indexical From Worlds to Situations and The Prince and the Phone Booth are a number of important essays that have been less accessible and that discuss important aspects of Perry's views referred to as Critical

Referentialism on the philosophy of language and the philosophy of mind **Virtuous Thoughts: The Philosophy of Ernest Sosa** John Turri, 2013-03-14 This collection is a major contribution to the understanding and evaluation of Ernest Sosa's profound and wide ranging philosophy in epistemology and beyond A balanced fair and critical volume it offers a sensitive appreciation of his wide philosophical purview a nuanced assessment of the detail of his thought and a spur to exploring the linkages between the varied topics explored by the subtle mind of this great American scholar The papers explore a wealth of Sosa's academic interests including his work on philosophical method the philosophy of mind and language metaphysics and value theory in addition to his output on epistemology itself It offers for example a rebuttal of the counterarguments to Sosa's reliabilist theory of introspective justification which itself concludes with some objections to Sosa's stated views on the speckled hen problem Other authors track the connections of his virtue theory to his advocacy of bi-level epistemology provide reflections on Sosa's views on the epistemological tradition and examine the nexus of his beliefs on intuition and philosophical methodology This volume is an insightful reckoning of Sosa's academic account **The**

Stalmaszczyk, 2021-12-02 A comprehensive guide to contemporary investigations into the relationship between language philosophy and linguistics **Expressing the Self** Minyao Huang, Kasia M. Jaszczolt, 2018-02-24 This book addresses

different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families including Amharic English French Japanese Korean Mandarin Newari Sino-Tibetan Polish Tariana Arawak and Thai In the domain of speaking about oneself languages use a myriad of expressions that cut across grammatical and semantic categories as well as a wide variety of constructions Languages of Southeast and East Asia famously employ a great number of terms for first person reference to signal honorification The number and mixed properties of these terms make them debatable candidates for pronounhood with many grammar-driven classifications opting to classify them with nouns Some languages make use of egophors or logophors and many exhibit an interaction between expressing the self and expressing evidentiality qua the epistemic status of information held from the ego perspective The volume's focus on expressing the self

however is not directly motivated by an interest in the grammar or lexicon but instead stems from philosophical discussions on the special status of thoughts about oneself known as de se thoughts. It is this interdisciplinary understanding of expressing the self that underlies this volume comprising philosophy of mind at one end of the spectrum and cross cultural pragmatics of self expression at the other. This unprecedented juxtaposition results in a novel method of approaching de se and de se expressions in which research methods from linguistics and philosophy inform each other. The importance of this interdisciplinary perspective on expressing the self cannot be overemphasized. Crucially the volume also demonstrates that linguistic research on first person reference makes a valuable contribution to research on the self tout court by exploring the ways in which the self is expressed and thereby adding to the insights gained through philosophy psychology and cognitive science.

Gottlob Frege: Frege's philosophy of thought and language Michael Beaney, Erich H. Reck, 2005. This collection brings together recent scholarship on Frege including new translations of German material which is made available to Anglophone scholars for the first time.

Understanding Wittgenstein's On Certainty D. Moyal-Sharrock, 2004-04-19. This book sheds unprecedented light on Wittgenstein's third masterpiece *On Certainty* clarifying his thoughts on basic beliefs and rebuttal of scepticism. As an introduction and commentary on Wittgenstein's final major philosophical work, Moyal-Sharrock's book will prove an indispensable guide to the student scholar and general reader.

The Situated Self Jenann Ismael, 2007-01-04. This text focuses on the metaphysics and the philosophy of language and mind. It tackles a philosophical question whose origin goes back to Descartes: What am I? The self is not a mere thing among things but if so, what is it and what is its relationship to the world.

Meanings as Species Mark Richard, 2019-07-23. Mark Richard presents an original picture of meaning according to which a word's meaning is analogous to the biological lineages we call species. His primary thesis is that a word's meaning in the sense of what one needs to track in order to be a competent speaker is the collection of assumptions its users make in using it and expect their hearers to recognize as being made. Meaning is something that is spread across a population inherited by each new generation of speakers from the last and typically evolving in so far as what constitutes a meaning changes in virtue of the interactions of speakers with their linguistic and social environment. *Meanings as Species* develops and defends the analogy between the biological and the linguistic and includes a discussion of the senses in which the processes of meaning change are and are not like evolution via natural selection. Richard argues that thinking of meanings as species supports Quine's insights about analyticity without rendering talk about meaning theoretically useless. He also discusses the relations between meaning as what the competent speaker knows about her language, meaning as the determinant of reference and truth conditions, and meaning qua what determines what sentence uses say. This book contains insightful discussions of a wide range of topics in the philosophy of language including relations between meaning and philosophical analysis, the project of conceptual engineering, the senses in which meaning is and is not compositional, the degree to which to which referential meaning is indeterminate, and what such

indeterminacy might tell us about propositional attitudes like belief and assertion *Modeling and Using Context* Varol Akman, 2001-07-16 This book constitutes the reviewed proceedings of the Third International Conference on Modeling and Using Context CONTEXT 2001 held in Dundee UK in July 2001 The 30 full papers and 15 short papers presented were carefully reviewed selected and revised for inclusion in the proceedings The papers presented deal with the interdisciplinary topic of modeling and using contextual information from various points of view ranging through cognitive science formal logic artificial intelligence and information processing Highly general philosophical and logical theories are complemented by specific applications in a variety of fields **Has Semantics Rested on a Mistake? And Other Essays** Howard K. Wettstein, 1991 The nature of reference or the relation of a word to the object to which it refers has been perhaps the dominant concern of twentieth century analytic philosophy Extremely influential arguments by Gottlob Frege around the turn of the century convinced the large majority of philosophers that the meaning of a word must be distinguished from its referent the former only providing some kind of direction for reaching the latter In the last twenty years this Fregean orthodoxy has been vigorously challenged by those who argue that certain important kinds of words at least refer directly without need of an intermediate meaning or sense The essays in this volume record how a long term study of Frege has persuaded the author that Frege's pivotal distinction between sense and reference and his attendant philosophical views about language and thought are unsatisfactory Frege's perspective he argues imposes a distinctive way of thinking about semantics specifically about the centrality of cognitive significance puzzles for semantics Freed from Frege's perspective we will no longer find it natural to think about semantics in this way **Direct Belief** Jonathan Berg, 2012-04-26 Jonathan Berg argues for the Theory of Direct Belief which treats having a belief about an individual as an unmediated relation between the believer and the individual the belief is about After a critical review of alternative positions Berg uses Grice's theory of conversational implicature to provide a detailed pragmatic account of substitution failure in belief ascriptions and goes on to defend this view against objections including those based on an unwarranted Inner Speech Picture of Thought The work serves as a case study in pragmatic explanation dealing also with methodological issues about context sensitivity in language and the relation between semantics and pragmatics **The Oxford Companion to Philosophy** Ted Honderich, 2005-03-10 Oxford University Press presents a major new edition of the definitive philosophical reference work for readers at all levels For ten years the original volume has served as a stimulating introduction for general readers and as an indispensable guide for students its breadth and depth of coverage have ensured that it is also read with pleasure and interest by those working at a higher level in philosophy and related disciplines A distinguished international assembly of 249 philosophers contributed almost 2 000 entries and many of these have now been considerably revised and updated to these are added over 300 brand new pieces on a fascinating range of current topics This new edition offers enlightening and enjoyable discussions of all aspects of philosophy and of the lives and work of the great philosophers from antiquity to the present day The

Cambridge Companion to Fichte , The Oxford Handbook of the Self Shaun Gallagher,2011-02-10 The Oxford Handbook of the Self explores a fascinating diversity of questions about our understanding of self from a variety of interdisciplinary perspectives including philosophy ethics psychology neuroscience psychopathology narrative and postmodern theories

Modes of Representation Richard Kimberly Heck,2024 Modes of Presentation analyses a collection of problems known as Frege's puzzle resulting from how thinkers and speakers have a limited perspective on reference in thought and language Heck argues that these puzzles have much to teach us both about the foundations of cognition and the nature of linguistic communication *Perspectival Thought* François Recanati,2007-09-27 Recanati examines the nature of thought and

understanding and defends the idea that truth is relative to context The book will be of interest to those working in philosophy of language and linguistics as well as philosophers of mind epistemologists and psychologists and cognitive scientists *Our Knowledge of the Internal World* Robert Stalnaker,2010-07 Starting in the middle Epistemic possibilities

Mathematical Method and Correspondence with Exner Bernard Bolzano,2021-10-25 The Prague Philosopher Bernard Bolzano 1781 1848 has long been admired for his groundbreaking work in mathematics his rigorous proofs of fundamental theorems in analysis his construction of a continuous nowhere differentiable function his investigations of the infinite and his anticipations of Cantor's set theory He made equally outstanding contributions in philosophy most notably in logic and methodology One of the greatest mathematician philosophers since Leibniz Bolzano is now widely recognised as a major figure of nineteenth century philosophy Praised by Husserl as one of the greatest logicians of all times he has also been recognised by Michael Dummett as one of the first modern analytic philosophers and by Alberto Coffa as the founder of the semantic tradition This volume contains English translations of the essay On the Mathematical Method a concise introduction to Bolzano's logic and philosophy of mathematics as well as substantial selections from his correspondence with Franz Exner Professor of Philosophy at the Charles University in Prague in the 1830s and 40s It will be of interest to students of Austrian philosophy the development of analytic philosophy the philosophy of language and the history and philosophy of logic and mathematics **Relative Truth** Manuel García-Carpintero,Max Kölbel,2008-08-14 The truth of an utterance depends on

various factors Usually these factors are assumed to be the meaning of the sentence uttered the context in which the utterance was made and the way things are in the world Recently however a number of cases have been discussed where there seems to be reason to think that the truth of an utterance is not yet fully determined by these three factors and that truth must therefore depend on a further factor The most prominent examples include utterances about values utterances attributing knowledge utterances that state that something is probable or epistemically possible and utterances about the contingent future In these cases some have argued the standard picture needs to be modified to admit extra truth

determining factors and there is further controversy about the exact role of any such extra factors With contributions from some of the key figures in the contemporary debate on relativism this book is about a topic that is the focus of much traditional and current interest whether truth is relative to standards of taste values or subjective informational states It is an issue in the philosophy of language but one with important connections to other areas of philosophy such as meta ethics metaphysics and epistemology
