Problematic Self Approaches To Identity:

The Problematic Self Elizabeth Brody Tenenbaum, 1977 *Theory's Autoimmunity* Zahi Zalloua, 2018-10-15 Engaging scholars from across humanistic fields grappling with the role and value of theory in our times Theory's Autoimmunity argues for reclaiming theory's skepticism as a value To cultivate theory's skeptical impulses is to embrace what Jacques Derrida has termed autoimmunity a condition of openness to the outside openness of the self the community democracy or other ideals that allows for change Openness to change comes with risks and the self protective temptation to immunize oneself or one's community against these risks is strong Yet without such risks without openness to otherness no encounter with the new with difference can ever take place Without autoimmunity theory becomes stagnant and programmatic unable to receive and respond to the other or the event to address revise and produce new meanings Taking up the challenge of thinking theory as skepticism with and against philosophy this study turns to literature as an interlocutor investigating the ways theory like the literary works of Montaigne Baudelaire Stendhal Morrison or Duras declines to put on the interpretive brakes to stop reading at a point of understanding Undoing and remaking itself theory those critical interpretive practices that revel in the creation and proliferation of meaning becomes autoimmune *The Routledge Handbook of Chinese Discourse Analysis* Chris Shei, 2019-01-14 Chinese is a discourse oriented language and the underlying mechanisms of the language involve encoding and decoding so the language can be correctly delivered and understood To date there has been a lack of consolidation at the discourse level such that a reference framework for understanding the language in a top down fashion is still underdeveloped The Routledge Handbook of Chinese Discourse Analysis is the first to showcase the latest research in the field of Chinese discourse analysis to consolidate existing findings put the language in both theoretical and socio functional perspectives offer guidance and insights for further research and inspire innovative ideas for exploring the Chinese language in the discourse domain The book is aimed at both students and scholars researching in the areas of Chinese linguistics and discourse analysis **The Consciousness of D.H. Lawrence** Daniel J. Schneider, 1986 This biography of Lawrence is unlike any other in its focus on the essential character of the artist and in its synthesis of the facts of his life and thought It is written not for specialists but for general readers who wish to deepen their understanding of the development of Lawrence's thought and feeling over the course of his lifetime The author blends intellectual biography and psychology to focus on Lawrence's religious nature as a shaping force in his life *The Subject of Consciousness* C. O. Evans, 2014-03-18 First published in 2002 This is Volume VI of seventeen in the Philosophy of Mind and Psychology series Written in 1970 this work is an exercise in constructive philosophy looking at the subject of consciousness and a theory offered as an explanation of self awareness *The Structure and Development of Self-consciousness* Dan Zahavi, Thor Grünbaum, Josef Parnas, 2004-01-01 Self consciousness is a topic of considerable importance to a variety of empirical and theoretical disciplines such as developmental and social psychology cognitive neuroscience psychiatry and philosophy This volume presents essays on self

consciousness by prominent psychologists cognitive neurologists and philosophers Some of the topics included are the infants sense of self and others theory of mind phenomenology of embodiment neural mechanisms of action attribution and hermeneutics of the self A number of these essays argue in turn that empirical findings in developmental psychology phenomenological analyses of embodiment or studies of pathological self experiences point to the existence of a type of self consciousness that does not require any explicit I thought or self observation but is more adequately described as a pre reflective embodied form of self familiarity The different contributions in the volume amply demonstrate that self consciousness is a complex multifaceted phenomenon that calls for an integration of different complementary interdisciplinary perspectives

Thinking with Kierkegaard Arne Grøn, 2022-12-31 Arne Grøn's reading of Søren Kierkegaard's authorship revolves around existential challenges of human identity The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard's text with a constant focus on issues in contemporary philosophy Contrary to many approaches to Kierkegaard's authorship Grøn does not read Kierkegaard in opposition to Hegel The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship and Grøn uses these negative phenomena to argue for the basically ethical aim of Kierkegaard's work In Grøn's reading Kierkegaard conceives human selfhood not merely as relational but also a process of becoming the self that one is through the otherness of self experience that is the body the world other people and God This book should be of interest to philosophers theologians
