Problems In Economic And Social Archaeology:

Problems in Economic and Social Archaeology Grahame Clark, 1976 Papers by R Jones and N Peterson separately annotated

A History of Archaeological Thought Bruce G. Trigger, 1989 Bruce Trigger's new book is the first ever to examine the history of archaeology from medieval times to the present in world wide perspective At once stimulating and even handed it places the development of archaeological thought and theory throughout within a broad social and intellectual framework The successive but interacting trends apparent in archaeological thought are defined and the author seeks to determine the extent to which these trends were a reflection of the personal and collective interests of archaeologists as these relate in the West at least to the fluctuating fortunes of the middle classes While subjective influences have been powerful Professor Trigger argues that the gradual accumulation of archaeological data has exercised a growing constraint on interpretation In turn this has increased the objectivity of archaeological research and enhanced its value for understanding the entire span of human history and the human condition in general

The Archaeology of Britain John Hunter, Ian Ralston, 1999 A comprehensive and up to date introduction to all the archaeological periods covering Britain from early prehistory to the industrial revolution It provides a one stop textbook for the entire archaeology of Britain

Advances in Archaeological Method and Theory Michael B Schiffer, 2014-06-30 Advances in Archaeological Method and Theory Volume 4 presents the progressive explorations in methods and theory in archeology This book discusses the increasing application of surface collection in cultural resource management Organized into eight chapters this volume begins with an overview of the fundamental aspects of archeoastronomy and explains what kinds of testable hypotheses that archeoastronomy generates This text then examines the general implications for the study of cultural complexity Other chapters consider the use of surface artifacts by archeologists to locate sites establish regional culture histories and to know where to excavate within sites This book discusses as well the interpretative interfaces between archeology on the one hand and ethnohistory and ethnology on the other that is based on a theoretical stance advocating a fundamental holistic approach to anthropology The final chapter deals with understanding the ecology of ancient organisms This book is a valuable resource for archeologists and anthropologists

Economy and Society in Prehistoric Europe A. Sherratt, 2019-08-07 This book brings together a classic collection of Andrew Sherratt's work on the economic foundations of prehistoric Europe which have put forward important new ideas about the development of farming pastoralism early technology and trade In a series of contributions that have included wide ranging syntheses and detailed local studies he discusses their implications for the understanding of settlement patterns social structures material culture and less tangible aspects of prehistoric life such as the spread of languages and the use of narcotics

Grahame Clark and His Legacy John Coles, Arkadiusz Marciniak, 2010-05-11 Grahame Clark was a major figure in European archaeology for over 50 years and pioneered work in prehistoric economies and ecology in science based archaeology and in a world view of ancient societies In this book a

variety of authorities from Europe and beyond assess these major contributions and provide discussions about Clark's own colleagues and contemporaries his major archaeological themes and his varied approaches and his world wide contacts and travels The papers provide surveys and opinions on Clark's role in the development of archaeology in the 20th century and the basis that it provided for archaeological work of today The book will be a valuable source of evidence ideas and references for scholars interested in the development of the discipline **Analytical Archaeology** David L.

Clarke, 2014-10-24 This study was well established as a pioneer work on archaeological methodology the theoretical basis of all archaeological analysis whatever the period or era The first edition of the book presented and evaluated the radical changes in methodology which derived from developments in other disciplines such as cybernetics computer science and geography during the 1950s and 60s It argued that archaeology was a coherent discipline with its own methods and procedures and attempted to define the entities attributes artefacts types assemblages cultures and culture groups rigorously and consistently so that they could be applied to archaeological data The later edition continued the same general theory which is unparalleled in its scope and depth adding notes to help understanding of the advances in method and theory to support the student and professional archaeologist Review of the original publication One might venture that this is the most important archaeological work for twenty or thirty years and it will undoubtedly influence several future generations of archaeologists The Times Literary Supplement The Pleistocene Old World Olga Soffer, 2013-11-11 Regional approaches to past human adaptations have generated much new knowledge and understanding Researchers working on problems of adaptations in the Holocene from those of simple hunter gatherers to those of complex sociopolitical entities like the state have found this approach suitable for comprehension of both ecological and social aspects of human behavior This research focus has however until recently left virtually untouched a major spatial and temporal segment of prehistory the Old World during the Pleistocene Extant literature on this period by and large presents either detailed site specific accounts or offers continental or even global syntheses that tend to compile site specific information but do not integrate it into whole constructs of functioning sociocultural entities This volume presents our current state of knowledge about a variety of regional adaptations that characterized prehistoric groups in the Old World before 10 000 B P The authors of the chapters consider the behavior of humans rather than that of objects or features and present data and models for various aspects of past cultures and for culture change These presentations integrate findings and understandings derived from a number of related disciplines actively involved in researching the past Data and interpretations are offered on a range of Old world regions during the Paleolithic including Africa Asia Australia and Europe and chronological coverage spans from the Early to Late Pleistocene **Hunter-Gatherers in History, Archaeology and Anthropology** Alan Barnard, 2020-05-26 The study of hunter gatherers has had a profound impact on thinking about human nature and about the nature of society The subject has especially influenced ideas on social evolution and on the development of human culture Anthropologists and archaeologists

continue to investigate living hunter gatherers and the remains of past hunter gatherer societies in the hope of unearthing the secrets of our ancestors and learning something of the natural existence of humankind Hunter Gatherers in History Archaeology and Anthropology provides a definitive overview of hunter gatherer historiography from the earliest anthropological writings through to the present day What can early visions of the hunter gatherer tell us about the societies that generated them How do diverse national traditions such as American Russian and Japanese manifest themselves in hunter gatherer research What is the most up to date thinking on the subject and how does it reflect current trends within the social sciences This book provides a much needed overview of the history of thought on one of science s most intriguing subjects It will serve as a landmark text for anthropologists archaeologists and students researching anthropological theory or the history of social anthropology and related disciplines

An Ethnography of the Neolithic Christopher

Tilley,2003-10-30 Archaeological research in Sweden and Denmark has uncovered a startling array of evidence over the last 150 years but until now there has been no comprehensive synthesis and interpretation of the material An Ethnography of the Neolithic bridges this gap giving an accessible and up to date analysis of a wide range of evidence from landscapes to monumental tombs to portable artifacts Christopher Tilley also uses this material as a basis for a provocative and novel reconstruction of late Mesolithic and earlier Neolithic societies in southern Scandinavia over a period of 3 000 years His skilful integration of archaeological evidence with new anthropological approaches makes this book an original contribution to an important topic whose significance stretches outside Scandinavia and beyond the Neolithic

Between Peak and Plain: Excavations on a Multiperiod Site at Mellor, Stockport, 1998-2009 Peter Arrowsmith,2025-03-20 This book details 12 seasons of excavations at Mellor Stockport revealing a multiperiod site from the Mesolithic to post medieval periods Key finds include Iron Age enclosures medieval hall remains Mesolithic lithics and Romano British artefacts all contextualized within the wider region

Early European Agriculture British Academy. Major Research Project in the Early History of Agriculture,1982-10-28 First printed in 1982 this is the third and final volume to be published as a result of the British Academy Major Research Project on the Early History of Agriculture carried out in the Department of Archaeology in Cambridge under the direction of the late Eric Higgs After his death in 1976 the Project was drawn to its conclusion by his associates and this book is effectively a summary of the results of the Project The first two volumes Papers in Economic Prehistory and Palaeoeconomy argued that the development of agriculture was a much more gradual and widespread phenomenon than had been thought previously This book now discusses the origins and early development of prehistoric agriculture within the framework of prehistoric subsistence economies in general Early human economies are viewed in their adaptation to three crucial resource zones the uplands the lowlands and the littorals

The Emergence of Civilization

Charles Keith Maisels,2003-12-16 The Emergence of Civilisation is a major contribution to our understanding of the development of urban culture and social stratification in the Near Eastern region Charles Maisels argues that our present

assumptions about state formation based on nineteenth century speculations are wrong His investigation illuminates the changes in scale complexity and hierarchy which accompany the development of civilisation The book draws conclusions about the dynamics of social change and the processes of social evolution in general applying those concepts to the rise of Greece and Rome and to the collapse of the classical Mediterranean world **An Early Town on the Deh Luran Plain**

Henry T. Wright, 1981-01-01 The site of Tepe Farukhabad in southwestern Iran dates to the fourth millennium BC In this monograph editor Henry T Wright presents archaeological data from the Tepe Farukhabad excavations For each phase of the site the authors give detailed descriptions of the structures and artifacts including ceramics stone bone metal textile and faunal remains With his interpretation of this data Wright advances our understanding of early exchange in southwest Asia and of development of early states *An Introduction to Zooarchaeology* Diane Gifford-Gonzalez, 2018-04-03 This volume is

a comprehensive critical introduction to vertebrate zooarchaeology the field that explores the history of human relations with animals from the Pliocene to the Industrial Revolution The book is organized into five sections each with an introduction that leads the reader systematically through this swiftly expanding field Section One presents a general introduction to zooarchaeology key definitions and an historical survey of the emergence of zooarchaeology in the Americas Europe Asia and Africa and introduces the conceptual approach taken in the book This volume is designed to allow readers to integrate data from the book along with that acquired elsewhere within a coherent analytical framework Most of its chapters take the form of critical review articles providing a portal into both the classic and current literature and contextualizing these with original commentary Summaries of findings are enhanced by profuse illustrations by the author and others *Symbols in Action* Ian Hodder, 1982-01-14 Material culture the objects made by man provides the primary data from which

archaeologists have to infer the economies technologies social organization and ritual practices of extinct societies The analysis and interpretation of material culture is therefore central to any concern with archaeological theory and methodology and in order to understand better the relationship between material culture and human behaviour archaeologists need to draw upon models derived from the study of ethnographic societies First published in 1982 this book presents the results of a series of field investigations carried out in Kenya Zambia and the Sudan into the archaeological remains and material culture of contemporary small scale societies and demonstrates the way in which objects are used as symbols within social action and within particular world views and ideologies **Understanding the Neolithic** Julian Thomas, 2002-02-07 This book

employs contemporary theoretical perspectives to investigate the Neolithic period in southern Britain It is a fully reworked edition of the author's *Rethinking the Neolithic* 1991 **The Prehistoric Settlement of Britain** Richard

Bradley, 2014-10-24 This study first published in 1978 explores the evidence for pre Roman settlement in Britain Four aspects of the prehistoric economy are described by the author colonisation and clearance arable and pastoral farming transhumance and nomadism and hunting gathering and fishing These aspects have been brought together to formulate a structure which

contains the evidence more naturally than chronological schemes that depend on assumed changes in population or technology The book draws upon environmental evidence and recent developments in archaeological fieldwork It also provides an extensive exploration of the published literature on the subject and the scope of the evidence Originally conceived as an ideas book rather than a final synthesis the author's intention throughout is to stimulate argument and research and not to replace one dogma with another

Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Hunter-Gatherer Economy in Prehistory Geoff Bailey, 1983-03-24 A series of case studies which combine an awareness of recent developments in hunter gatherer theory with a commitment to the analysis and interpretation of prehistoric material
