Cytokines, Novel Cell Death Models and Pathways in Cardiovascular Diseases Yuli Huang,Ruofeng Qiu,Hai-Feng Zhang,Yunzhao Hu,Weiye Mai,2023-09-26 Cytokines are soluble proteins secreted by a wide variety of cells in the body playing crucial roles in many physiological responses and are involved in the pathophysiology of cardiovascular diseases CVDs Recently there is great progress in discoveries that some novel cytokines including secreted frizzled related proteins SFRPs adiponectin and C1q TNF Related Proteins CTRPs can perform a protective effect in cardiometabolic diseases heart failure and coronary heart disease However the mechanisms underlying the molecular and pathophysiological actions of these cytokines in CVDs are still vague Novel mechanisms of cell death including pyroptosis autophagy ferroptosis cuproptosis and PANoptosis have been

considered novel therapeutic targets for CVDs Some cytokines have been shown to regulate the cell death pathway in the incidence and development of CVDs Further investigations are needed to understand the link between these novel cytokines and novel cell death models and pathways in CVDs **Death, Contemplation and Schopenhauer** R. Raj Singh, 2016-05-13

The connections between death contemplation and the contemplative life have been a recurrent theme in the canons of both western and eastern philosophical thought This book examines the classical sources of this philosophical literature in particular Plato's *Phaedo* and the *Katha Upanishad* and then proceeds to a sustained analysis and critical assessment of the sources and standpoints of a single thinker Arthur Schopenhauer whose work comprehensively pursues this problem Going beyond the well examined western influences on Schopenhauer Singh offers an in depth account of Schopenhauer's references to eastern thought and a comprehensive examination of his eastern sources particularly Vedanta and Buddhism The book traces the pivotal issue of death through the whole range of Schopenhauer's writings uncovering the deeper connotations of his crucial notion of the will to live *Death Penalty: A Punishment or Problem* Dr Ashutosh

Mishra, 2021-07-05 The death penalty otherwise called capital punishment is an administration authorised practice whereby the State executes an individual as a punishment for a crime The sentence requesting that somebody is penalised in such a way is alluded to as a death sentence though the demonstration of such a sentence is known as an execution A prisoner who has been sentenced to death and is anticipating execution is alluded to as condemned and is said in certain nations to be on death row Violations that are deserving of death are known as capital crimes capital offences or capital felonies and changes according to jurisdiction yet in most of the circumstances involve heinous attacks for example murder mass homicide aggravated cases of rape child assault child sexual abuse terrorism treason espionage sedition offences against the State for example endeavouring to overthrow the government airplane hijacking drug dealing and drug possession violations against humanity and slaughter and sometimes the cruelest act of recidivism and exasperated robbery Deterrence is presumably the most generally communicated reason for the death penalty The pith of the theory is that the danger of being executed later on will be adequate to make a critical number of individuals avoid from committing an appalling crime they had in any case planned Deterrence isn't mainly worried about the anticipation of further killing by a previously convicted death penalty defendant That falls under the subject of incapacitation Retentionists of Capital Punishment believe that capital punishment is essential to preserve stability in the world because it serves as a deterrent to potential offenders In the beginning public opinion was still in favour of capital punishment rather than life imprisonment The objective of this research article is to find out whether death penalty is a problem or a punishment for society *Respiratory Diseases; Task Force Report on Problems, Research Approaches, Needs* National Heart and Lung Institute. Task Force on Research in Respiratory

Diseases, 1972 **The Metaphysics of Death** John Martin Fischer, 1993 This collection of seventeen essays deals with the metaphysical as opposed to the moral issues pertaining to death For example the authors investigate among other things the

issue of what makes death a bad thing for an individual if indeed death is a bad thing This issue is more basic and abstract than such moral questions as the particular conditions under which euthanasia is justified if it is ever justified Though there are important connections between the more abstract questions addressed in this book and many contemporary moral issues such as euthanasia suicide and abortion the primary focus of this book is on metaphysical issues concerning the nature of death What is the nature of the harm or bad involved in death If it is not pain what is it and how can it be bad Who is the subject of the harm or bad if the person is no longer alive how can he be the subject of the bad And if he is not the subject who is Can one have harm with no subject When does the harm take place Can a harm take place after its subject ceases to exist If death harms a person can the harm take place before the death occurs If death can be a bad thing would immortality be a desirable alternative This family of questions helps to frame the puzzle of why and how death is bad Other subjects addressed include the Epicurean view that death is not a misfortune for the person who dies the nature of misfortune and benefit the meaningfulness and value of life and the distinction between the life of a person and the life of a living creature who is not a person There is an extensive bibliography that includes science fiction treatments of death and immortality

Diarrhoeal Diseases Research, 1991-12 **Life After Death** James Hervey Hyslop, 1919 **Sheep and Lamb Nonpredator Death Loss in the United States, 2004**, 2006 Death: A Philosophical Inquiry Paul Fairfield, 2014-09-19

From Nietzsche's pronouncement that God is dead to Camus' argument that suicide is the fundamental question of philosophy the concept of death plays an important role in existential phenomenology reaching from Kierkegaard to Heidegger and Marcel This book explores the phenomenology of death and offers a unique way into the phenomenological tradition Paul Fairfield examines the following key topics the modern denial of death Heidegger's important concept of being toward death and its centrality in phenomenological ideas such as authenticity and existence the philosophical significance of death rituals what explains the imperative toward ritual around death and what is its purpose and meaning death in an age of secularism the philosophy and ethics of suicide death as a mystery rather than a philosophical problem to be solved the relationship between hope and death Death: A Philosophical Inquiry is essential reading for students of phenomenology and existentialism and will also be of interest to students in related fields such as religion anthropology and the medical humanities

Dialect Death Charles E. Holloway, 1997-02-13 The Brule Dwellers of Ascension Parish are descendants of Canary Island immigrants who came to Louisiana in the late 1700s A few residents in and around the Ascension Parish area still speak an archaic dialect of Spanish which is at the brink of linguistic extinction Because the Brule dialect is in the final stages of what is commonly known as language death the case of Brule Spanish presents an exciting opportunity to investigate commonly held assumptions regarding the structural changes often associated with vestigial languages Its relative isolation from other dialects of Spanish for over two hundred years serves as a sort of linguistic time capsule which provides information that is relevant to critical outstanding issues in Hispanic dialectology and historical linguistics In addition to examining these issues documenting the

specific characteristics of Brule Spanish and comparing Brule Spanish with other modern Spanish dialects this book presents a very accessible introduction to the field of language death *Premature Death in the New Independent States* National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1997-06-27 In recent years there have been alarming reports of rapid decreases in life expectancy in the New Independent States former members of the Soviet Union To help assess priorities for health policy the Committee on Population organized two workshops the first on adult mortality and disability the second on adult health priorities and policies Participants included demographers epidemiologists public health specialists economists and policymakers from the NIS countries the United States and Western Europe This volume consists of selected papers presented at the workshops They assess the reliability of data on mortality morbidity and disability analyze regional patterns and trends in mortality rates and causes of death review evidence about major determinants of adult mortality and discuss implications for health policy *Infant Mortality Problems in Norway* Julie E. Backer, Øystein Aagenæs, 1967 Values at the End of Life Roi Livne, 2019-06-10 Once defiant of death or even in denial many American families and health care professionals are embracing the notion that a life consumed by suffering may not be worth living Sociologist Roi Livne documents the rise and effectiveness of hospice and palliative care and the growing acceptance that less treatment may be better near the end of life
