Whaley, 1993 **Secured Transactions** Paul Barron, Mark B. Wessman, 2011 The core of this law school casebook is an extensive set of hypothetical problems designed to force students to come to grips with Article 9 provisions directly assuming that the student has just been hired as a junior in house counsel for a mythical bank holding company It then takes the student through the series of problems generated by various lending subsidiaries The tone is light with recurring characters and footnotes which include the necessary Code citations and case citations to supplement the included materials This book is intended for teachers who want an in depth treatment of Article 9 believe Article 9 need not be drudgery either for students or instructors and have a sense of humor The new edition adds some new problems and text and includes a

substantial number of recent cases and secondary sources to the footnotes that will help students both answer the problems and extend their understanding of the concepts being covered Problems and Cases on Secured Transactions James Brook, 2012 The problem approach featured in Problems and Cases on Secured Transactions thoroughly engages students with imaginative scenarios presenting the material as easily accessible and as manageable as possible without avoiding the intricacies of secured transactions Students come to appreciate that the principal resource for the course is UCC Article 9 itself While the casebook is an essential tool for study the law is found in the Code Problems and Cases on Secured Transactions is carefully designed for an introductory mainstream course not for an advanced course or seminar The material is presented as completely comprehensible even enjoyable rather than an arcane science than only an insider can understand Cases are heavily edited and liberal editorial note help express the vibrancy of true life situations A good mix of short and long problems gives each lesson a comprehensive linear flow while keeping students focused A progressive mix of problems helps students see the common elements as rules and principals learned in a simpler setting can readily be applied to more complex transactions Earlier problems lean more heavily though not exclusively on the individual and consumer borrower situations As the lessons advance the mix of materials progressively includes more small business and large business transactions The Second Edition updates problems that highlight the changes made by the 2010 Revisions to Article 9 to become effective in 2013 Recently decided cases applying the 2001 revision to Article 9 have been added as well Features problem approach engages students with imaginative scenarios accessible and manageable without losing complexity underscores UCC Article 9 as principal resource for the course The casebook is a tool the law is in the Code makes material completely comprehensible relevant and enjoyable not arcane cases are heavily edited and noted to express vibrancy of individual true life stories specifically designed for introductory course not an advanced course or seminar a mix of short and long problems throughout the text gives each lesson a comprehensive linear flow keeps students focused shows the study of Secured Transactions as far more than a mechanical exercise a progressive mix of problems helps students appreciate the common elements shows how that principals learned in a simpler setting can readily be applied to more complex transactions Earlier problems lean toward individual and consumer borrower situations Later problems progressively mix more small business and large business transactions Thoroughly updated the revised Second Edition presents Updated problems that highlight the changes made by the 2010 Revisions to Article 9 to become effective in 2013 Recently decided cases applying the 2001 revision to Article 9 **SECURED TRANSACTIONS CASES AND MATERIALS** George E. Sepinuck, 2006 A problem oriented book with selective use of cases this new text is enhanced by extensive textual explanation and illustration to prepare students to read the code and solve the assigned problems To assist students in developing statutory construction skills several problems require the students to rewrite code provisions and others ask them to imagine a factual scenario to which a particular
