Procedural Politics Issues Influence And Institutional Choice In The European Union:

Procedural Politics Joseph Jupille, 2004-08-30 This book was first published in 2004 Under what conditions in what ways and with what effects do actors engage in politics with respect to rather than merely within political institutions Using multiple methods and original data *Procedural Politics* develops a theory of everyday politics with respect to rules procedural politics and applies it to European Union integration and politics Assuming that actors influence maximizers it argues and demonstrates that the jurisdiction ambiguity of issues provides opportunities for procedural politics and that influence differences among institutional alternatives provide the incentives It also argues and demonstrates that procedural politics occurs by predictable means most notably involving procedural coalition formation and strategic issue definition and exerts predictable effects on policymaking efficiency and outcomes and long run institutional change Beyond illuminating previously under appreciated aspects of EU rule governance these findings generalize to all rule governed political systems and form the basis of fuller accounts of the role of institutions in political life

Procedural Politics Joseph Jupille, 2004-08-30 After developing an argument to determine when actors will try and reshape political rules rather than operate within them Joseph Jupille applies it to European Union EU integration and politics Jupille demonstrates that the European Union is far more deeply rule governed than is traditionally understood and accordingly reveals a much more complete picture of the role of rules in political life than is available in most existing research

Dynamics of Change in the European Union Daniel Naurin, Anne Rasmussen, 2013-09-13 Agreements concerning inter institutional rules in the treaties of the European Union often give rise to reactions and processes of adaptation within the EU institutions Recent literature on EU legislative politics has increasingly examined decision making within the EU institutions but has largely overlooked how these internal processes react and adapt to changes in relations between the EU bodies To fill this gap the authors present a series of empirical studies that examine how shifts in inter institutional rules and procedures affect intra institutional politics They show that the resulting intrainstitutional adaptations may in turn both have

distributive consequences and affect the efficiency of the initial inter institutional reforms In addition they provide some stepping stones for theory building on how treaty reforms affect organizational structure and decision making within the EU institutions by outlining a series of mediating variables that link these two types of change processes This book was originally published as a special issue of West European Politics

Precolonial Legacies in Postcolonial Politics Martha Wilfahrt, 2022-12-22 Why are some communities able to come together to improve their collective lot while others are not Looking at variation in local government performance in decentralized West Africa this book advances a novel answer communities are better able to coordinate around basic service delivery when their formal jurisdictional boundaries overlap with informal social institutions or norms This book identifies the precolonial past as the driver of striking subnational variation in the present because these social institutions only encompass the many villages of the local state in areas that were once home to precolonial polities The book develops and tests a theory of institutional congruence to document how the past shapes contemporary elite approaches to redistribution within the local state Where precolonial kingdoms left behind collective identities and dense social networks local elites find it easier to cooperate following decentralization This title is also available as Open Access on Cambridge Core

[The Price of a Vote in the Middle East](#) Daniel Corstange, 2016-09 Some ethnic communities receive generous material rewards for their political support whilst others only receive very modest payoffs

Electoral Politics and Africa's Urban Transition Noah L. Nathan, 2019-02-28 Explores the political impacts of ethnic diversity and the growth of the middle class in urban Africa

The Political and Economic Dynamics of the Eurozone Crisis James A. Caporaso, Martin Rhodes, 2016 This is the first book to provide a full and dispassionate account of the politics and economics of the Eurozone crisis focusing on the interlinked origins and impacts of the Euro Zone crisis and the policy responses to it The book is distinguished from existing research by its avoidance and rejection of the too often

simplistic analysis that has characterized political media and regrettably some academic coverage and by its attempt to escape from the tyranny of day to day events and short term developments Each of the contributors identifies an important question and undertakes a careful empirical theoretically informed analysis that produces novel perspectives Together they seek to balance many of the existing accounts that have rushed to sometimes unwarranted conclusions concerning for example the locus of institutional power in European crisis management the power and centrality of particular member states notably Germany which has been attributed with hegemonic status the supposed entrapment of EU policy makers by an austerity ideology and the deep flaws that apparently afflict the solutions to the crisis put painstakingly in place such as Banking Union While it will be some time before the EU can put the crisis behind it and the dust finally settles on the revised institutional system that emerges *The Political and Economic Dynamics of the Eurozone Crisis* marks an important step towards a considered reflective analysis of the tumultuous events and developments of the crisis period **Bankers,**

Bureaucrats, and Central Bank Politics Christopher Adolph, 2013-04-15 Adolph illustrates the policy differences between central banks run by former bankers relative to those run by bureaucrats *Boundary Control* Edward L. Gibson, 2013-01-07 The democratization of a national government is only a first step in diffusing democracy throughout a country's territory Even after a national government is democratized subnational authoritarian enclaves often continue to deny rights to citizens of local jurisdictions Gibson offers new theoretical perspectives for the study of democratization in his exploration of this phenomenon His theory of boundary control captures the conflict pattern between incumbents and oppositions when a national democratic government exists alongside authoritarian provinces or states He also reveals how federalism and the territorial organization of countries shape how subnational authoritarian regimes are built and how they unravel Through a novel comparison of the late nineteenth century American Solid South with contemporary experiences in Argentina and Mexico Gibson reveals that the mechanisms of boundary control are reproduced across countries and historical periods As long as subnational authoritarian governments coexist with national democratic governments boundary control will be at play

The Political Construction of Business Interests Cathie Jo Martin, Duane Swank, 2012-03-30 *The Political Construction of Business Interests* recounts employers' struggles to define their collective social identities at turning points in capitalist development *Multi-Ethnic Coalitions in Africa* Leonardo R. Tying the Autocrat's Hands Yuhua Wang, 2015 *Tying the Autocrat's Hands* provides a comprehensive empirical evaluation of legal reforms in contemporary China Based on the author's extensive fieldwork and analyses of original data the book tells a story in which foreign investors with weak political connections push for judicial empowerment in China while Chinese investors struggle to hold on to their privileges **The New Intergovernmentalism** Christopher J. Bickerton, Dermot Hodson, Uwe Puetter, 2015-07-16 The twenty years since the signing of the Maastricht Treaty have been marked by an integration paradox

although the scope of European Union EU activity has increased at an unprecedented pace this increase has largely taken place in the absence of significant new transfers of power to supranational institutions along traditional lines Conventional theories of European integration struggle to explain this paradox because they equate integration with the empowerment of specific supranational institutions under the traditional Community method New governance scholars meanwhile have not filled this intellectual void preferring instead to focus on specific deviations from the Community method rather than theorizing about the evolving nature of the European project The New Intergovernmentalism challenges established assumptions about how member states behave what supranational institutions want and where the dividing line between high and low politics is located and develops a new theoretical framework known as the new intergovernmentalism The fifteen chapters in this volume by leading political scientists political economists and legal scholars explore the scope and limits of the new intergovernmentalism as a theory of post Maastricht integration and draw conclusions about the profound state of political disequilibrium in which the EU operates This book is of relevance to EU specialists seeking new ways of thinking about European integration and policy making and general readers who wish to understand what has happened to the EU in the two troubled decades since 1992 Informal Institutions and Citizenship in Rural Africa Lauren M.

MacLean,2010-05-24 This book challenges previous assumptions about institutions social capital and the nature of the African state by investigating the history of political and economic change in villages on either side of the Ghana Cote d'Ivoire border Prior to European colonial rule these Akan villages had very similar political and cultural institutions By the late 1990s however Lauren M MacLean found puzzling differences in the informal institutions of reciprocity and indigenous notions of citizenship MacLean argues that divergent histories of state formation not only shape how villagers help each other but also influence how local groups and communities define citizenship and then choose to engage with the state on an everyday basis She examines the historical construction of the state role in mediating risk at the local level across three policy areas political administration social service delivery and agriculture Voting for Policy, Not Parties Orit

Kedar,2009-12-14 This book develops an institutionally embedded framework for analyzing voter choice examining three electoral arenas parliamentary presidential and federal Inequality and Democratization Ben W. Ansell,David J.

Samuels,2014-12-18 Research on the economic origins of democracy and dictatorship has shifted away from the impact of growth and turned toward the question of how different patterns of growth equal or unequal shape regime change This book offers a new theory of the historical relationship between economic modernization and the emergence of democracy on a global scale focusing on the effects of land and income inequality Contrary to most mainstream arguments Ben W Ansell and David J Samuels suggest that democracy is more likely to emerge when rising yet politically disenfranchised groups demand more influence because they have more to lose rather than when threats of redistribution to elite interests are low

Regime Threats and State Solutions Mai Hassan,2020-04-02 The administrative state is a powerful tool because it can

control the population and in moments of crisis help leaders put down popular threats to their rule But a state does not act bureaucrats work through the state to carry out a leader s demands In turn leaders attempt to use their authority over the state to manage bureaucrats in a way that induces bureaucratic behavior that furthers their policy and political goals Focusing on Kenya since independence Hassan weaves together micro level personnel data rich archival records and interviews to show how the country s different leaders have strategically managed and in effect weaponized the public sector This nuanced analysis shows how even states categorized as weak have proven capable of helping their leader stay in power With engaging evidence and compelling theory Regime Threats and State Solutions will interest political scientists and scholars studying authoritarian regimes African politics state bureaucracy and political violence
