Procedures In Marriage And Family Therapy:

Procedures in Marriage and Family Therapy Gregory W. Brock, Charles P. Barnard, 1999 Most writing in marriage and family therapy presents readers with an established system of how to change families so as to relieve the symptoms of the stress they are suffering. The reader is encouraged to follow a rigid system and adopt one particular theoretical basis for bringing about change. The authors' two hands-on teachers offer something different. They are sharing a clinical anthropologist's view of what happens when a family interacts with a professional who has dallied with the fads but finds success in doing what works. The authors have gathered data and organized it into a multifaceted notebook with value for both the novice and more experienced therapist. Hidden behind the descriptions of what to do and when readers can see the message of gentle care offered to families in pain. Topics covered include first contact procedures, assessment, initial and middle stage treatment procedures, procedures for challenging sessions, and more. A resource all clinicians can draw upon, especially those early in their careers and those just beginning as marriage and family therapists.

An Introduction to Marriage and Family Therapy Joseph L. Wetchler, Lorna L. Hecker, 2014-08-27 Now in its second edition, this text introduces readers to the rich history and practice of Marriage and Family Therapy with 32 professionals from across the US presenting their knowledge in their areas of expertise. This blend of approaches and styles gives this text a unique voice and makes it a comprehensive resource for graduate students taking their first course in Marriage and Family Therapy. The book is divided into three sections. Part 1 focuses on the components on which 21st century family therapy is based and summarizes the most recent changes made to not only therapeutic interventions but to the very concept of family. Part 2 presents an overview of the 7 major theoretical models of the field: structural, strategic, Milan, social constructionist, experiential, transgenerational, and cognitive behavioral family therapy. Each chapter in this section focuses on the founder of the theory, its theoretical tenants, and its key techniques. Shows how the model focuses on diversity. Presents the research that supports the approach. Part 3 addresses specific treatment areas that are common to marriage and family therapists such as sex therapy, pre-marital therapy, research, and ethics and legal issues. As an introduction to the field of Marriage and Family Therapy, this volume stands above the rest. Not only will readers gain an understanding of the rich history of the field and its techniques, but they will also see a complete picture of the context in which families are embedded, such as gender, culture, spirituality, and sexual orientation. This knowledge is the key to understanding what differentiates Marriage and Family Therapy from individual psychotherapy. Glossaries, case studies, tables, figures, and appendices appear generously throughout the text to present this information and give students a thorough overview to prepare them for their professional lives.

Handbook of Family and Marital Therapy Sharon A. Shueman, Benjamin B. Wolman, 2012-12-06 Family and marital therapies are rapidly becoming highly used methods of treatment of mental disorders and are no longer ancillary methods to individual psychotherapy The last few decades have brought about an increasing awareness of the fact that excluding organic etiology practically all mental disorders are caused fostered and or related to faulty interpersonal relations As a rule the earlier in life one is exposed to noxious factors the more severe is the damage Thus early child parents and child siblings interactions are highly relevant determinants of mental health and mental disorder Moreover parents themselves do not live in a vacuum Their marital interaction significantly contributes to their own mental health or to its decline and parent child relationships are greatly influenced by the nature of intraparental relationships Parental discord conflicts and abandonment affect the child s personality development Thus family and marital therapy is more than therapy it is an important contribution to the prevention of mental disorder The present volume is comprised of three parts The first primarily theoretical analyzes the fundamental aspects of marital and family therapy The second part describes the various therapeutic techniques and the last deals with several specific issues It gives me great pleasure to acknowledge my gratitude to my coeditor Dr George Stricker Without his thorough and devoted efforts this volume could not have come into being I am also profoundly indebted to our consulting editors Dr James Framo Dr
